## Your career

After a solid formation at the school of Architecture and the Institut d'Administration des Entreprises (Managerial School), I have developed my competences through a diversified path in the field of housing, its funding and its renovation. As project manager and manager, I have taken over the running of a painting company in France. At 40, I passed the vocational training certificate in painting and tapestry-making and set up LDP S.A , a painting and decorating company, in Luxembourg.

## Your motivations

On the one hand, I would like to share my professional experiences, show the know-how in the feminine and meet other women. On the other, I am eager to give rise to managerial vocations, stimulate and strengthen the feminine entrepreneurship, bring out the dynamism in Luxembourg and represent this country with dignity.

“Going beyond borders”

She has chosen Luxembourg because its environment favors the setting up of firms, in particular for feminine entrepreneurs, and launched her painting company LDP S.A.. She shows the know-how in feminine as she passed at 40 a vocational training certificate in painting and tapestry-making, which was added to her degree in architecture, her master in business management and her 15 years of managing. She leads a balanced professional and familial life.
