

2M Energy Solutions is a clean-tech company, specializing in energy and cost reduction technologies for commercial, industrial and retail use. Our products are aimed at reducing consumption and increasing efficiency with special attention given to establishing and maintaining a good environmental disposition. Our company endorses well experienced technical personnel who can provide you with the best solutions for your business and efficient after-sales services that will guarantee your satisfaction.

At 2M Energy Solutions, our aim is to provide energy saving and green tech solutions. Through the technology we supply and assist our clients in meeting their obligations in dealing with the reduction of greenhouse gases together with the reduction of electrical energy costs. Our company focuses on the supply of technologies that can be integrated with various other technological products, providing optimum results in various sectors of the economy and environmental forces.

2M Energy Solutions boasts a strong management team, bringing together years of invaluable knowledge and experience in the energy conservation sector. Acknowledging the reality of today's escalating energy costs, the team is committed to supplying its customers with high-quality robust solutions, which, not only reduce clients' overall operating expenses but ultimately increases the worth of their company.

Thanks to an energetic, practical and dedicated team, 2M Energy Solutions is proved to be at the forefront of providing innovative products that will assist our clients in meeting their environment and at the same time providing cost savings to our clients.

“Setting up this new company was a great deal of work. There was a huge amount of product research and still is. Supplier meetings, sales and technical training and so forth that made it very difficult to coordinate family and business life. But our family is great at these times and we really pull together on such matters”
