

Angela Camenita

SCM HELIOS MEDICA

Sector HEALTH AND HOSPITAL AMBULATORY MEDICAL SERVICES

Region SUD-VEST OLTENIA, CRAIOVA

Nomination as an Ambassador

Angela Camenita has always been in search for something new to conquer, new experiences, frequently testing her intellectual capacities and abilities to strive to succeed. This trait has represented over time one of the motivations of later success. Although her own business has developed into a regional area where recognizing the success of women was not very well defined, she has though in the past 12 years managed to impose herself on the medical services market both locally and nationwide. I believe that for any business, one needs toughness, to establishing the exact goal, and most importantly trust in one's own strengths. Also in developing a business you need a team, belonging to a group within which to share successes, to exchange messages and ideas, to find solutions. The profession that she chose- that being a doctor - has opened new horizons for Angela, causing her to get closer to people, understand their needs and their sufferings and to contribute to finding solutions for them. In this context, she is a member of the Rotary Club for the last three years, giving her the opportunity to participate in various charities for people in need. Angela Camenita is a member of the AFIR organization- the organization of business women from Romania.

About the company

Helios Medical Center has a history of 12 years, being among the first private clinics established in Craiova. It started in a commercial space at the ground floor of a building in 1998. Within two years due to the seriousness and professionalism of the medical staff, another location was to be found, where the number of medical services increased as well. In 2006, through Angela's own efforts, she acquired a building in the center of Craiova, where due to a bigger available area, 1500 mp, the clinic has thus developed comprehensive ambulatory services and imaging services. Due to the quality of the medical services, many partnerships with local players were established -banks, the County Mayor, Ford, etc. Helios is a member of the first network of private clinics in the country, and the patient belonging to any of these clinics has the same benefits of treatment at the same prices and under the same conditions at any clinic in the network. Angela is a member of ANA, engaging in combating youth drug usage. By partnering with Renaissance Foundation, Helios has been active in breast cancer screening in women over 30 years. Angela is a member of the Chamber of Commerce County. She is a member of CIGNA INTERNATIONAL based in USA, the entity through which, Helios can provide medical services to any local expatriate. She is a member of the Europe Assistance, providing medical evacuation by her clinic's own ambulance to foreign patients from the scene, to the place of contact with their land or air ambulance.

Raising awareness

Camenita Angela is ready anytime to be actively involved in women's lives both professionally and humanitarian, considering the medical sector as a less valued sector, more directly exposed to fails and dropouts, driven by a total lack of their support. A radical change in the general mentality is required, considering that the woman is structured on a more spiritual and social dimension. I consider we are currently passing through an economic and social period in which the involvement of women in all sectors is imperative, for it has been demonstrated over the time that women can be actively involved in social, economic, and politic life, resulting generous outcomes.

Further information

Angela believes that encouraging women to start their own business, is a valuable idea. Through their involvement in this predominantly male world, women should try to offer the business environment in Romania beauty, purity, tenacity, intelligence, and the greatness female character, letting it unfold in all its dimensions, and we will definitely be amazed by the image output. As a mother, as a business partner and as a life partner, the woman is the balance of moral and spiritual legacy of a society.
