Structural Stability in REACH

- A unique mix of objectives
- Each with its indispensable contribution
- One fails - and other would follow

Protection
of
Health

Protection
of
Environment

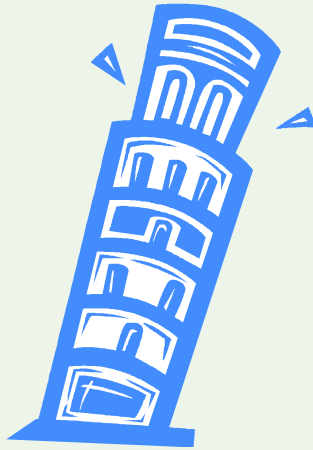

Free
circulation

Enhancing
competitiveness
& innovation

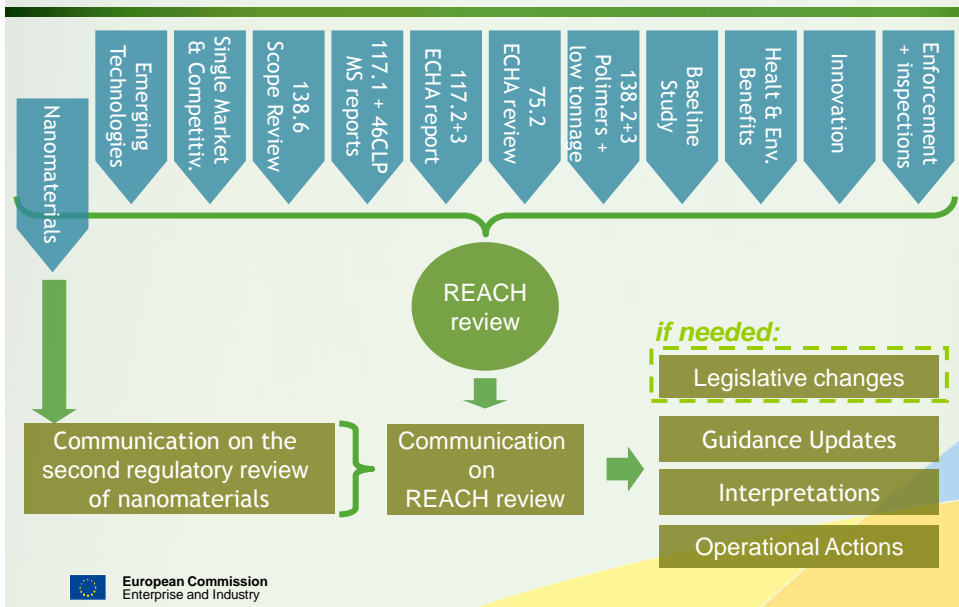

Is our REACH temple stable?

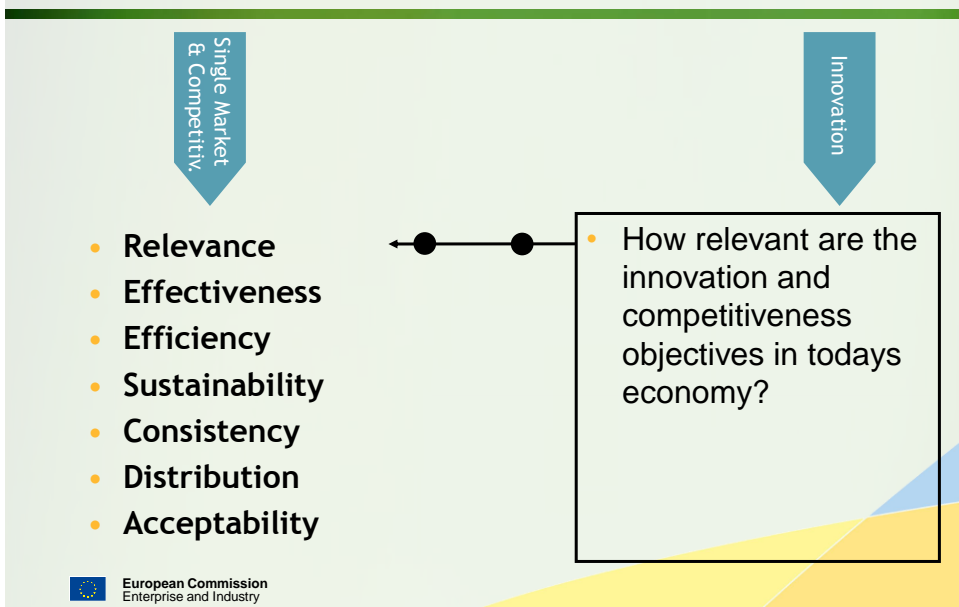

We need to have a complete reievew:

- **Relevance** - would we do it again ?
- **Effectiveness** - do we see any difference ?
- **Efficiency** - was it (too)expensive ?
- **Sustainability** - will it last ?
- **Consistency** - any gaps / overlaps ?
- **Distribution** - who are the losers/winners ?
- **Acceptability** - is everybody happy ?

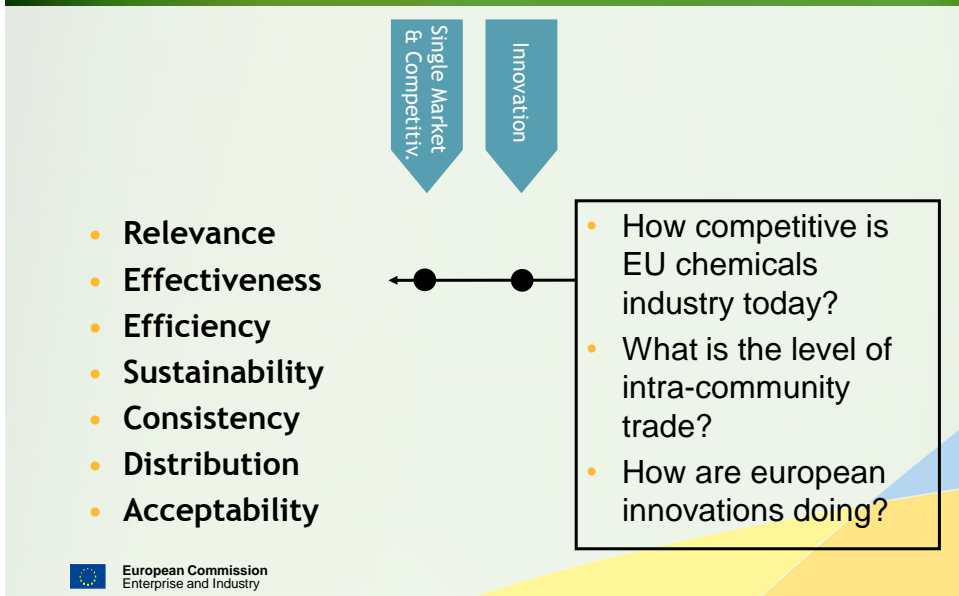

The Review of REACH - design:

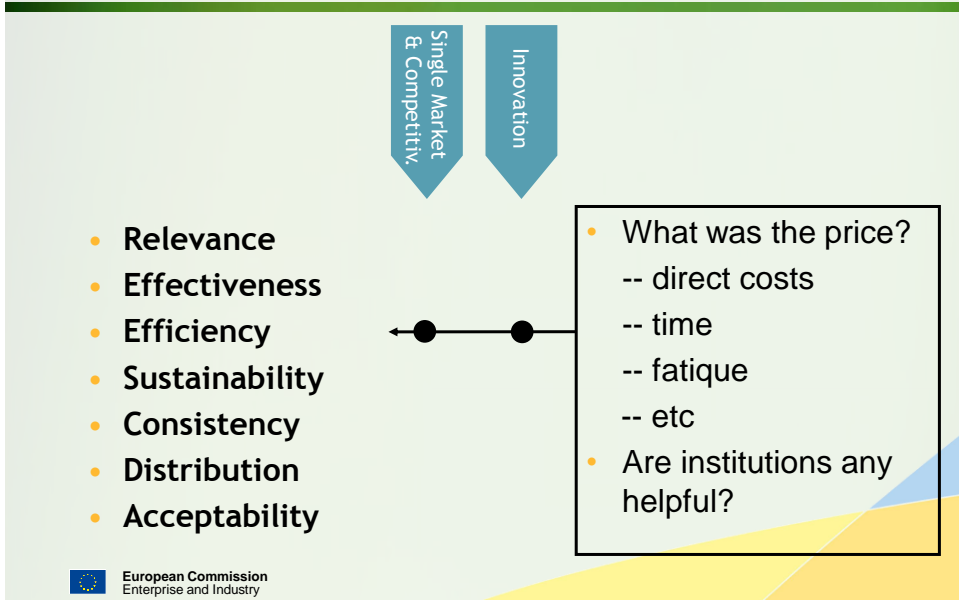

The Review of REACH - design:

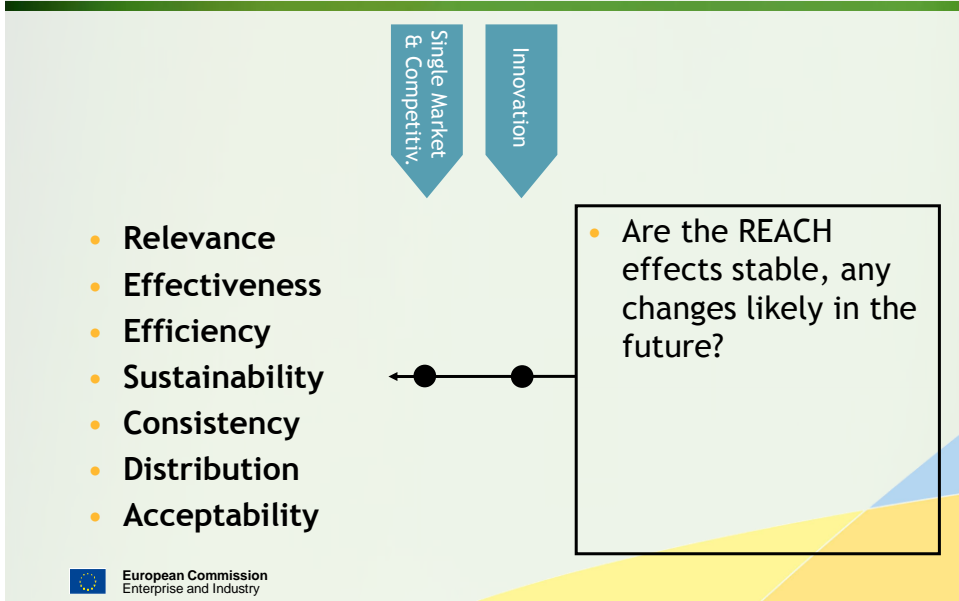

The Review of REACH - design:

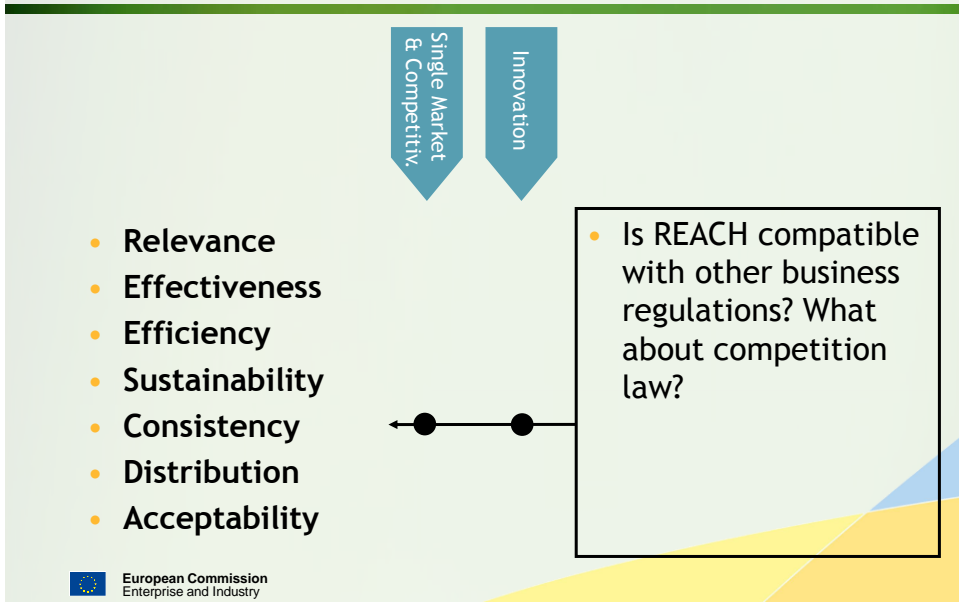

The Review of REACH - design:

The Review of REACH - design:

The Review of REACH - design:

The Review of REACH - design:

Single Market
& Competitiv.

Innovation

- Relevance
- Effectiveness
- Efficiency
- Sustainability
- Consistency
- Distribution
- Acceptability

- Is REACH market 'transparent'. Do the procedures favor any group/sub-sector
- Are SMEs treated fairly?

The Review of REACH - design:

Single Market
& Competitiv.

Innovation

- Relevance
- Effectiveness
- Efficiency
- Sustainability
- Consistency
- Distribution
- Acceptability

- Does industry believe in REACH - do we are equally committed to make it success?
- Does business see any benefit for itself?

We are about to find this out.

Thank you

Any questions?
