

Public consultation - Update for units of measurement directive

Subject : COMMISSION STAFF WORKING DOCUMENT on units of measurement (Directive 80-181-EEC)

Request the commission bear in mind:

- n There need only be one measurement system throughout the EU. Thus the Directive should be implemented in full with the absolute minimum of exceptions to allow for US trade
- n And if supplementary indications are to be continued for labelling packages, they should not be allowed for 'loose goods' sold from bulk.

Regards ...
