Brussels, 6 July 2006  
ENV B.3/PC D(2006)

## **CLARIFICATION ON OXINE-COPPER AND NAPHTHENIC ACIDS, COPPER SALTS**

Oxine-copper and naphthenic acids, copper salts have been notified for product-type 8 (wood preservatives), for which dossiers had to be submitted to the Rapporteur Member States by 28 March 2004.

After the non-submission of dossiers by the original deadline of 28 March 2004 and the publication of such information on 30 April 2004 in accordance with Article 9(5) of Regulation 2032/2003, two companies indicated their intention to take over the role of participant with a view to have these two substances included in Annex I, IA or IB of Directive 98/8/EC.

A new deadline for the submission of dossiers was fixed at 31 March 2006.

However, on 31 March 2006, again, no dossiers were submitted.

In accordance with Article 9(5) of Regulation 2032/2003, the Commission has published this information through a notice dated 14 June 2006 (which is attached) that no dossiers had been submitted for these two substances.

However, and to avoid any misunderstanding, the Commission will no longer accept the taking over of the role of participant for these two substances and a subsequent decision will be taken to remove them from the review programme.

Products containing oxine-copper and naphthenic acids, copper salts will therefore have to be removed from the market at the latest 12 months after the date of such decision entering into force.

Such products could however in future be placed again on the market following the granting of a marketing authorisation in accordance with the procedure laid down in article 11 of Directive 98/8/EC.

**Active substances / product type combinations  
for which all participants have withdrawn or for which no dossier has been submitted within the  
time period specified in Annexes V and VIII to Commission Regulation (EC) No 2032/2003**

In accordance with Articles 8 (3) and 9(5) of Regulation (EC) No 2032/2003, the Commission shall inform the Member States if a situation arises where, as regards a particular existing active substance/product type combination, all the participants have withdrawn or no dossier has been received within the time period specified in Annexes V and VIII to that Regulation. That information shall also be made public by electronic means.

The following list contains:

- the active substances notified in product types 16, 18, 19 and 21, for which no dossiers were submitted by the deadline of 30 April 2006 or for which participants had withdrawn in accordance with Article 8(2) of the Regulation before that deadline;
- the active substances notified in product types 8, for which no dossiers were submitted by the new deadline of 31 March 2006;
- other active substance / product type combinations, for which all participants have withdrawn recently;

Within three months of the publication of this notice, a producer, formulator, association or other person wishing to take over the role of participant as regards the existing active substance/product type combination shall inform the Commission accordingly. Such information shall be sent to:

European Commission  
Directorate-General Environment  
Unit B-4, Office Bu-9, 6-163  
B-1049 Brussels  
Or by e-mail to: ENV-Biocides@cec.eu.int

Within the same time period, Member States may indicate to the Commission that they are interested to take over the role of a participant for one or more of the listed active substance / product type combinations.

Where the Commission receives no response within three months, a decision shall be taken not to include the existing active substance in Annex I, IA or IB to Directive 98/8/EC for the product type(s) concerned.
