

Environmental Policy

The basis of TripleNine's environmental policy is to reduce the effect of the factory on its surroundings as far as technologically and economically possible.

Intermediate aim:

- To ensure a positive reputation for TripleNine in environmental issues.
- To minimise the factory's effect on the environment through directed development.
- To ensure that the company is seen to address the environmental concerns raised by the local authorities.
- To ensure that all employees are aware of the need to protect the environment.

EMAS Registration

EMAS registration of TripleNine is a proof that the company is working systematic on protecting the environment. TripleNine is in this way, also concerning the environmental sphere as reliable contraction and co-operating partner.

Energy Policy

TripleNine's aim is to be the most energy efficient fishmeal and oil factory, taking into consideration both the quality of the product and the demands made to the internal and external environment, as far as it is technologically and economically possible.

Intermediate Aim:

- To be regarded as an energy efficient and environmentally concerned company.
- To constantly reduce the company's energy consumption.
- To actively revise energy consumption.
- To motivate all employees to be aware of energy consumption.
