

**CLARIFICATION no. 3
to call for tender
ENV.C.3/SER/2009/0035**

- 1. What kind of survey is to be carried out under the item "Survey current activities by car makers, electricity utilities, parts suppliers (motors and batteries), including joint ventures, product announcements and pilot projects"?**

The word "survey" is used here in a generic form, in the sense of "provide an overview of". It does not mean a survey in the sense of a poll or establishing statistically significant samples.

- 2. regarding payment terms: is there any option to obtain additional pre-financing or interim financing or do we really need to wait 18 months to obtain 70% of the payment?**

The financing conditions as laid down in Part 2, section 5 of the tendering documents should be sufficiently clear. We cannot deviate from these.
