1	<p><b>[436] Coordination of national accounts methodology</b>            Description: Operation of the Directors of Macroeconomic Statistics and National Accounts Working Group.            Output(s): • Improved strategic guidelines and national accounts coordination. • Coordination of ESA (European System of Accounts) methodology and other accounting standards between Eurostat NA (National Accounts), GFS (Government Finance Statistics) and other statistical domains. • Methodological guidance, as needed, on COVID-19 and post-crisis measures.</p>	Process
1	<p><b>[EPSAS] European Public Sector Accounting Standards</b>            Description: Harmonisation of public sector accounting standards under the accruals basis of accounting.            Output(s): • European Public Sector Accounting Standards (EPSAS).</p>	Process
1	<p><b>[MIP] Scoreboard of indicators of the Macroeconomic Imbalance Procedure</b>            Description: Development, improvements, and regular publication of data and news releases concerning the scoreboard of indicators in the context of the Macroeconomic Imbalance Procedure (MIP). Follow up of quality management of MIP indicators (Level 1 report).            Product(s): • [MIP] MIP scoreboard.</p>	Process
1	<p><b>[PEEIs] Principal European Economic Indicators</b>            Description: Supply of Principal European Economic Indicators (PEEIs) including publication, quality assessment statistical improvements and analysis of PEEIs with expected monthly or quarterly output. Methodological handbooks and guidelines to enhance harmonization of PEEIs.            Product(s): • [PEEIs] Principal European Economic Indicators.            Other output(s): • Economic and Financial Committee status report on information requirements in the Economic and Monetary Union. • Horizontal methodological activities related to PEEIs, revision analysis, methodological papers. • Innovative dissemination tools for PEEIs.</p>	Process
1	<p><b>[FIXCAP] Stocks of fixed assets and estimation of consumption of fixed capital under ESA 2010</b>            Description: The project will further harmonise the recording of stocks of fixed assets and consumption of fixed capital under ESA 2010. It will apply a cross-domain approach and cover the whole economy as well as various breakdowns (e.g. institutional sectors, industries, assets).            Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts. • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASQ] Quarterly Sector Accounts. • [GovA] Annual government finance. • [GovQ] Quarterly government accounts.            Other output(s): Guidance documents, data analysis reports.</p>	Project (2020-2024)
1	<p><b>[GPAProd] Labour and capital productivity indicators *NEW*</b>            Description: Compilation and publication of labour and capital productivity indicators.            Product(s): • [GPA] Growth and Productivity Accounts.</p>	Process
1	<p><b>[MNY] Monetary and other finance statistics</b>            Description: Publication of monetary and financial statistics on the Eurostat web site.            Output(s): • Monetary and other financial indicators (including Euro yield curves, interest rates, exchange rates).</p>	Process
1	<p><b>[MUFA] Quarterly financial accounts</b>            Description: Processing and dissemination of quarterly financial accounts data from the ECB.            Product(s): • [MUFA] Quarterly Financial Accounts.</p>	Process
1	<p><b>[NA-MA] National Accounts - quarterly and annual</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual accounts data, regular estimation of European aggregates and contribution to publications.            Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts.            Other output(s): • Post COVID-19 crisis measures as appropriate.</p>	Process
1	<p><b>[NA-Pen] Pension entitlements in social insurance</b>            Description: Processing, validation and dissemination of data on pensions as defined by the European System of Accounts (ESA) 2010.            Product(s): • [NA-Pen] Pension entitlements in social insurance.</p>	Process

1	<p><b>[NAPS-III] Extension of the Eurostat's National Accounts Production System</b>            Description: This project represents the third development phase of Eurostat's national accounts production system.            Product(s): • [NAMA] Annual national accounts. • [NAMQ] Quarterly national accounts. • [NA-Pen] Pension entitlements in social insurance. • [NA-Reg] Regional accounts. • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASA-F] Annual Sector Accounts - financial flows and stocks. • [NASQ] Quarterly Sector Accounts. • [NAIO] Supply, use and Input-Output tables.            Other output(s): • Automated estimation procedures (test results). • Integration of regional accounts into the production environment for main aggregates. • Vintage database (design and tests). • Other rationalisation, integration and consolidation actions.</p>	Project (2017-2022)
1	<p><b>[NA-Q] ESA 2010 statistical infrastructure for data production</b>            Description: Implementation of horizontal measures developing the statistical infrastructure for data production under the ESA 2010 Transmission programme.            Output(s): • Quality reports on national and regional accounts. • ESA 2010 metadata in line with SIMS 2.0. • Analysis results based on the 2019 benchmark revisions. • Analysis of results on the impact of COVID-crisis.</p>	Process
1	<p><b>[NA-Reg] Regional Accounts</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 regional accounts data, contribution to publications.            Product(s): • [NA-Reg] Regional accounts.            Other output(s): • Post COVID-19 crisis measures as appropriate.</p>	Process
1	<p><b>[NASA] Non-financial sector accounts</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 quarterly and annual non-financial sector accounts data, contribution to publications.            Product(s): • [NASA] Annual Sector Accounts - non-financial flows and stocks. • [NASQ] Quarterly Sector Accounts.            Other output(s): • Development of quality framework for distributional results of income and consumption. • Post COVID-19 crisis measures as appropriate. • Publication of recommendations on developing a common approach to improve vertical consistency.</p>	Process
1	<p><b>[NASA-F] Financial Accounts (financial flows and stocks)</b>            Description: Processing, validation and dissemination of European System of Accounts (ESA) 2010 annual financial accounts data, dissemination of quarterly financial accounts data, contribution to publications.            Product(s): • [NASA-F] Annual Sector Accounts - financial flows and stocks.            Other output(s): • MIP indicators of financial accounts. • Post COVID-19 crisis measures as appropriate.</p>	Process
1	<p><b>[457] Monitoring Own Resources GNI</b>            Description: Verification of Gross National Income (GNI) data with Member States and GNI Expert Group, replies to European Court of Auditors reports, support to DG BUDG.            Output(s): • Opinion of GNI Committee on the appropriateness of GNI data for use as input into DG BUDG's Own Resources calculations.</p>	Process
1	<p><b>[458] Monitoring Own Resources VAT</b>            Description: Verification of the Member States' annual statements of their Value Added Tax (VAT) own resource bases, in particular the calculation of the correction for the special flat-rate scheme for farmers and of the Weighted Average Rate.            Output(s): • Technical advice to DG BUDG on the use of VAT statistics for Own Resources purposes.</p>	Process
1	<p><b>[459] Support in National Accounts to Enlargement Countries</b>            Description: Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.            Output(s): • Advice to Enlargement Countries concerning their future legal obligations regarding National Accounts.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
1	<p><b>[460] Remunerations of EU Staff</b>            Description: Calculation of the statistics needed for the annual and intermediate adaptation of EU officials' salaries and pensions, correction coefficients, mission allowances; Article 64/5 Working Group.            Output(s): • Annual adjustment of remuneration of EU officials and correction coefficients (intra-EU and extra-EU) - for Commission and other EU institutions, non-EU bodies; mission allowances. • Annual report on remunerations and appendices.</p>	Process
1	<p><b>[461] Pension Scheme European Officials - assessment</b>            Description: Assessment of the Pension Scheme European Officials (PSEO) actuarial balance in accordance with Annex XII of the Staff Regulations; Article 83 Working Group. Annual report on pensions and appendices.            Output(s): • Contribution rate of members of staff to the PSEO, coefficients for pension transfer upon request of DG HR.</p>	Process
1	<p><b>[462] Liabilities related to social benefit schemes of the personnel of the European Institutions</b>            Description: Calculation of liabilities related to social benefits of personnel of the European Institutions (Pension Scheme European Officials (PSEO) + Pension Scheme of Members of the EU Institutions (PSMI) + Pension Scheme of Members of the European Parliament (PSMEP) + Joint Sickness Insurance Scheme (JSIS).            Output(s): • Liabilities of PSEO, PSMI, PSMEP, JSIS.</p>	Process
1	<p><b>[COICOP2018] Introduction of COICOP 2018 in the HICP *NEW*</b>            Description: The COICOP (Classification of Individual Consumption by Purpose) 2018 classification, developed by the United Nations Statistical Division, is expected to replace the utilised ECOICOP (European Classification of Individual Consumption by Purpose) by 2026.            Output(s): • Algorithm for calculation of back series in COICOP 2018. • Report on NSI readiness and needs for implementation of COICOP 2018.</p>	Project (2021-2026)
1	<p><b>[CREI] Development of Commercial Real Estate Indicators</b>            Description: Development of commercial real estate indicators.            Output(s): • Development of methodology and concepts, further steps towards a manual, steering of a task force with Member States and international organisations, development of short term solutions and a long-term strategy. The project covers price indices, rent indices, yields and vacancy rates.</p>	Project (2019-2023)
1	<p><b>[EURONA] Eurostat Review of National Accounts and Macro-Economic Indicators</b>            Description: Editor's work for the biannual publication of EURONA.            Output(s): • Two editions of EURONA per year.</p>	Process
1	<p><b>[FPMT] Food Price Monitoring Tool</b>            Description: Further development of statistical information on food supply chains and continued updating of the monitoring tool.            Product(s): • [Price-FSCM] Food Price Monitoring Tool.            Other output(s): • Monitoring tool.</p>	Process
1	<p><b>[HICP] Harmonised Indices of Consumer Prices</b>            Description: Production and dissemination of monthly HICPs (Euro area flash estimate, mid-month estimates, HICP sub-indices and special aggregates, HICP at constant tax rates, HICP administered prices); further development of HICP methodology and guidance; compliance monitoring.            Product(s): • [Price-HICP] Harmonised Indices of Consumer Prices.            Other output(s): • HICP methodological guidance and recommendations, including related to COVID-19; compliance monitoring reports; manuals.</p>	Process
1	<p><b>[HPS] Housing Price Statistics</b>            Description: Compilation of the house price index and the owner occupied housing price index.            Product(s): • [Price-HPS] Housing price indices.            Other output(s): • Methodological guidance, including related to COVID-19.</p>	Process
1	<p><b>[PPP(IT)] Purchasing Power Parities - IT part</b>            Description: Maintenance and development of Purchasing Power Parities (PPP) database and tools.            Output(s): • Improved and maintained PPP IT tools.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
1	<p><b>[PPP] Purchasing Power Parities</b>            Description: Production and dissemination of purchasing power parities; supervision of price surveys; methodological work; compliance monitoring; ICP (International Comparison Programme) activities.            Product(s): • [PPP] Purchasing Power Parities.            Other output(s): • Methodological developments, including related to COVID-19. • Compliance monitoring reports. • Contribution to the ICP process.</p>	Process
1	<p><b>[970] Full International and Global Accounts for Research in Input-Output Analysis (FIGARO)</b>            Description: Compile and publish full International and Global Accounts for Research in Input-Output Analysis (FIGARO).            Product(s): • [EU-ICIO] EU inter-country supply, use and input-output tables.            Other output(s): • Annual European inter-country supply, use and input-output tables (EU-IC-SUIOT). • COVID-19 impact analysis.</p>	Process
1	<p><b>[997] Support the dissemination of balanced international trade used in the compilation of FIGARO *NEW*</b>            Description: Provide expertise on the IT tools and infrastructure for the dissemination and visualisation of balanced international trade used in the compilation of FIGARO.            Product(s): • [NATRADE] National Accounts International Trade.</p>	Project (2021-2023)
1	<p><b>[BoP] Balance of Payments</b>            Description: Processing, validation and dissemination of BPM6 BOP/IIP data, contribution to publications. (BPM6=Balance of Payments and International Investment Position Manual, 6th edition, BoP=Balance of Payments, IIP=international investment position).            Product(s): • [BoP] Balance of payments and international investment positions. • [MIP] MIP scoreboard.            Other output(s): • Draft legal acts. • Balance of Payments (BoP) Vademecum. • BoP Working Group. • Quality reports. • Commission working document to the EP and the Council on data quality. • Methodological development.</p>	Process
1	<p><b>[FIGARO] Full International and Global Accounts for Research in Input-Output Analysis</b>            Description: Establishing an annual production of EU Multi-country Input-Output Tables (EU-MC IOT) and a five-yearly production of EU Multi-country Supply, Use and Input-Output Tables (EU-MC SUIOT) with extensions to environmental accounts.            Product(s): • [EU-ICIO] EU inter-country supply, use and input-output tables.            Other output(s): • Project reports. • Publication of 2010-2018 experimental data.</p>	Project (2015-2023)
1	<p><b>[NAIO] Input/Output and supply/use tables</b>            Description: Processing and validation of SUT IOT (supply/use tables and input/output tables) data. Estimation of national data and their aggregation to Euro Area and EU supply/use tables and input/output tables data.            Product(s): • [NAIO] Supply, use and Input-Output tables.</p>	Process
1	<p><b>[1011] Development of the ESA accounts of EU institutions *NEW*</b>            Description: The project comprise the overview and evaluation of direct and indirect data sources, pilot/test exercise, reconciliation of flows between the EU and Member States, establishing the compilation methods.            Output(s): • Publication of EU institutions accounts starting from the reference year 2021.</p>	Project (2021-2024)
1	<p><b>[EDP] Verification of EDP statistics</b>            Description: Maintaining on-going direct contacts with Member States and selected candidate countries to ensure a preventive approach for the quality of statistics used for the Excessive Deficit Procedure (EDP), including dialogue visits, and where appropriate, methodological visits. Monitoring of the appropriateness, exhaustiveness and timeliness of the upstream public finance data by reference to European System of Accounts (ESA) requirements, within an Excessive Deficit Procedure, as part of the dialogue visits. Provide timely ex-ante and ex-post methodological advice. Data collection in the context of the requirements of Council Directive 2011/85/EU relating to information on contingent liabilities.            Output(s): • Excessive Deficit Procedure (e.g. EDP notification tables + "Maastricht debt" + Financial crisis + Summary table on the COVID-19 measures' impact).            Mission reports including conclusions and recommendations. Report to the Economic and Financial Committee. • Annual press release and associated documentation on contingent liabilities and non-performing loans. • Quality reports to the Council and the European Parliament.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
1	<p><b>[EDPMeth] Coordination of methodological tasks for EDP</b></p> <p>Description: (1) Update of European System of Accounts (ESA) on government sector, of Manual of General Government deficit and debt according to ESA 2010. (2) Preparation of Eurostat decisions, guidance notes and clarifications. (3) Organisation of the Excessive Deficit Procedure (EDP) Statistics Working Group, and relevant task forces. Coordination of the implementation of manuals in all Member States. (4) Organisation of training on Government Finance Statistics (GFS). (5) Coordination of methodology with the National Accounts Directorate in Eurostat and other accounting standards. (6) Coordinating the EDP part of IPA (Instrument for Pre-Accession Assistance) projects and providing guidance to candidate and potential candidate countries (for EDP).</p> <p>Output(s): • Methodological work stemming from the updated Manual of Government Deficit and Debt. • Organisation of Task force and Working Group meetings. • Greater knowledge of EDP Statistics in countries, leading to higher and more harmonised EDP/GFS data. In particular, on statistical recording of government interventions to mitigate the economic and social impact due to the COVID-19 pandemic.</p>	Process
1	<p><b>[EDPn] Validation of EDP notification</b></p> <p>Description: Verifying the quality of the bi-annual Excessive Deficit Procedure (EDP) notifications sent by Member States, preparing the bi-annual EDP press release, and associated documentation, and examining notifications of selected Candidate Countries.</p> <p>Output(s): • Bi-annual EDP press release and associated documentation.</p>	Process
1	<p><b>[Gov(IT)] IT for EDP and GFS statistical production</b></p> <p>Description: Contribute to continuity of administration, maintenance and technical support for applications and databases used in the EDP (Excessive deficit procedure) and GFS (Government statistics - Financial and non-Financial) related National Accounts statistical production. Continuous support for EDP/GFS related National Accounts Statistical Production Systems and data. Administration and developments related to FAME (Forecasting Analytical Modelling Environment) database domains in the unit in charge and technical support for the related units.</p> <p>Output(s): • Technical support for GFS related National Accounts Statistical Production Systems. • Corrective and evolutionary maintenance for GFS related National Accounts Statistical Production Systems.</p>	Process
1	<p><b>[Gov] Quarterly and Annual Government statistics - Financial and non-Financial Accounts for general government</b></p> <p>Description: Collection, validation and dissemination in Eurobase, in press releases and publications on government finance statistics, for example in Statistical Books and on Statistics Explained. Maintenance of Government Finance Statistics (GFS) web site. Improvement of the quality of GFS data transmitted by Member States. Presentation of regular progress reports to the Excessive Deficit Procedure (EDP) Statistics Working Group meetings, Classification of the Functions of Government (COFOG) and GFS Task Forces. Promotion of the quality and relevance of General Government quarterly accounts. It includes statistics on the annual Structure of Government Debt, European Financial Stability Facility (EFSF) lending and bilateral Intergovernmental lending. Transmission Reports and follow-up.</p> <p>Product(s): • [GovA] Annual government finance. • [GovQ] Quarterly government accounts. • [GovD&amp;D] Government deficit and debt. • [CL&amp;NPL] Contingent liabilities and non-performing loans.</p> <p>Other output(s): • Progress report on annual and quarterly GFS data transmission and quality issues integrated and regularly presented in EDP Statistics Working Group meetings, in the GFS Task Force and in the COFOG Task Force.</p>	Process
1	<p><b>[GovMeth] Coordination of methodological tasks for GFS</b></p> <p>Description: (1) Update of remaining relevant Government Finance Statistics (GFS) manuals according to European System of Accounts (ESA) 2010 and publication of GFS interpretations (2) Coordination of GFS methodological issues with Member States where appropriate, in coordination with Excessive Deficit Procedure (EDP) methodological developments (3) Timely organisation of Classification of the Functions of Government (COFOG) Task Force and GFS Task Force, dealing with transmission and methodological issues related to GFS. (4) Provision of advice to Member States. (5) Contribution to GFS training courses. (6) Coordinating the GFS part of IPA (Instrument for Pre-Accession Assistance) projects and providing guidance to candidate and potential candidate countries (for GFS).</p> <p>Output(s): • Methodological issues addressed in GFS Task Force and EDPS Working Group meetings and raised in transmission reports, correspondence with Member States. • Organisation of COFOG and GFS Task Forces. • Contribution to the methodology regarding GFS. • Guidance related to GFS produced, discussed and published where appropriate. • Update and production of methodological manuals and GFS interpretations. • Contribution to GFS training.</p>	Process

1	<p><b>[487] Identifying, assessing and monitoring risks</b>            Description: Organisation of the annual country risk assessment in the framework of Excessive Deficit Procedure. Identifying, assessing and monitoring risks or problems from upstream data sources with a view to initiating corrective action at the earliest possible point (Early Warning System (EWS)).            Output(s): • Annual country risk assessment (confidential).</p>	Process
1	<p><b>[569] Accounting and statistics</b>            Description: Follow-up of developments in accounting, International Financial Reporting Standard (IFRS) desk, accounting and statistics.            Output(s): • Co-ordination of Accounting and Statistics, International Financial Reporting Standard (IFRS) desk.</p>	Process
1	<p><b>[BRs] National Statistical Business Registers</b>            Description: Coordination, monitoring and quality improvements of national statistical business registers. International cooperation in the area of Business Registers. Ensuring quality reporting and compliance monitoring.            Output(s): • Quality of national statistical business registers monitored and improved. • European Business Statistics Regulation 2019/2152 National Statistical Business Registers related provisions implemented. • ESS framework of statistical business registers improved. • Facilitation and monitoring of the implementation of the legal frame. • Organisation of the Joint UNECE/OECD/ESTAT Expert Group on business registers (September 2022).</p>	Process
1	<p><b>[EGRdev] Development of the EuroGroups Register to respond to new user needs arising from Bratislava DGINS conference</b>            Description: Specify the EGR 2.1 and EGR 3.0 functionalities, develop them and plan their implementation.            Output(s): • EGR 2.1 and EGR 3.0 business goals agreed.</p>	Project (2020-2025)
1	<p><b>[EGRprod] EuroGroups Register- production</b>            Description: Production and dissemination of EuroGroups Register data, evolutive maintenance of the EGR.            Product(s): • [EGR] EGR statistical frame of microdata and statistics.            Other output(s): •EGR annual frame published. • Evolutive maintenance of the EGR ensured.</p>	Process
1	<p><b>[GLOBE] Globalisation: MNEs in business statistics -Profiling, Statistical Units, Early Warning System and Large Cases Units</b>            Description: Support the development of a systematic approach to addressing Multinational Enterprise Groups (MNE) in business statistics. Coordinate the European Profiling Programme. Assist the Member States in their profiling activities, both national and European. Lead the European Network of MNE coordinators and assist the Member States in setting up a Large Cases Unit (LCU). Coordinate the Early Warning System. Facilitate cooperation across domains and countries.            Output(s): • Assistance for the implementation of the definition of Statistical Units. • Coordinating the European Profiling Programme. • Leading the European Network of MNE coordinators to ensure a systematic approach to MNE related activities and cooperation on data consistency related work. • Assistance for the use of profiling as method for delineating enterprises, for better understanding the MNE activities and their impact on business statistics and for improving business statistics. • Organisation of workshops, European Statistical Training System. (ESTP) courses. • Coordination of the Early Warning System. • Assistance in the creation of LCUs.</p>	Process
1	<p><b>[IPTandESBRs] Supporting the European profiling programme by evolutive maintenance of the IPT tool and its integration with the EGR, ensuring ESBRs follow-up</b>            Description: Support European Profiling activities by maintaining the IPT tool operational and developed according to user needs. Ensuring the follow-up of the ESS.VIP ESBRs outcomes.            Output(s): • European profiling supported and the IPT tool upgraded and operational. ESS.VIP ESBRs project deliverables used in the development of the Business Registers/EGR area.</p>	Process
1	<p><b>[CLASS] Classifications for international trade statistics</b>            Description: Updating and maintenance of the Combined Nomenclature and the Geonomenclature for trade in goods.            Output(s): • Classifications for international trade statistics up to date.</p>	Process
1	<p><b>[Comext(IT)] Comext Database – IT part</b>            Description: (1) IT Maintenance of the Comext Databases. (2) Comext IT user support for Commission services, Member States and users in general.            Output(s): • IT Maintenance of the Comext databases. • Evolutive maintenance of the Comext ATI interface and functionalities of the different Comext applications (e.g. Comext Loader, Metadata Editor, Nomenclature Production System, Easy Comext Metadata organiser) for both production and dissemination purposes.</p>	Process

1	<p><b>[FATS] Foreign affiliates statistics</b>            Description: Validation and processing of annual Statistics on foreign affiliates (FATS) data received from Member States and other reporting countries. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured.            Product(s): • [FATS] Foreign affiliates of EU enterprises.</p>	Process
1	<p><b>[FDI] Foreign direct investment statistics</b>            Description: Validation and processing of annual statistics on foreign direct investment data received from Member States and other reporting countries. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured. Maintenance and development of the Foreign Direct Investment Network, including the work to reduce asymmetries. The IT needs comes from the fact that the Foreign Direct Investment Network should in the future use the network and tools developed for international trade in goods and maintenance for MDT should be provided.            Product(s): • [FDI] Foreign direct investments.            Other output(s): • Reuse of the IT infrastructure for micro data exchange. • Structured approach to reduce asymmetries.</p>	Process
1	<p><b>[GVC2] Globalisation - Trade statistics</b>            Description: Developing activities related to globalisation and international trade statistics. In particular, actions related to developing a statistical framework model for global value chains (GVC) and the further development of existing statistics on international trade in goods (ITGS) and services (ITSS).            Product(s): • [GVC-Ind] Globalisation indicators. • [GVC-IS] International sourcing. • [IntServ] International trade in services. • [STEC] Services trade by enterprise characteristics.            Other output(s): • Recommendations manual on international trade in services by modes of supply. • Experimental statistics on international trade in services by modes of supply. • Experimental statistics on GVC and international trade (STEC and BEC). • Methodological development in the classification of services. • Finalisation of the implementing act on GVC survey.</p>	Project (2020-2024)
1, 2	<p><b>[434] Improvement of national accounts methodology</b>            Description: Development of methodology and methodological advice at Eurostat, EU and international level, with respect to System of National Accounts (SNA) 2008 and European System of Accounts (ESA) 2010.            Output(s): • Methodological guidance and manuals.</p>	Process
1, 2	<p><b>[CREI-STIS] Short-Term Commercial real estate indicators</b>            Description: Methodological development (including pilots) in order to set up new short-term indicators for Commercial Real Estate (CREI) (building starts, work completions and vacancy rates).            Product(s): • [STIS-Co] Short-term business statistics - construction.            Other output(s): • New CREI indicators (as experimental statistics, after the evaluation of the pilot studies).</p>	Project (2019-2023)
1, 2	<p><b>[ITGS] International Trade in Goods Statistics</b>            Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of international trade in goods statistics. Specific focus on asymmetries in intra- and extra-EU trade in goods statistics.            Product(s): • [IntGood] International trade in goods. • [TEC] Trade in goods by enterprise characteristics. • [TIC] Trade in goods by invoicing currency.            Other output(s): • Production of PEEI 'International trade in goods balance'. • Production processes further improved. • Up to date methodological framework available. • Structured approach to reduce asymmetries.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
1, 2	<p><b>[ITGS2] Globalisation - Trade statistics - ITGS</b>            Description: Developing activities related to globalisation and international trade statistics, with regard to International Trade in Goods Statistics (ITGS), including Trade by Enterprise Statistics (TEC). These activities include, in particular, actions to deploy the customs data exchange (CDE) in the context of the new regulation on European business statistics; to make the best use of the data exchanged in the context of the CDE and of the intra-EU micro-data exchange (MDE); to enhance the capability of ITGS (and TEC) to describe globalisation-related aspects; and to analyse and address asymmetries, mainly in the context of intra-EU trade. In 2020, this project is being run with resources allocated to the project 'Implementation of a redesigned and modernised Intrastat system following the ESSC orientation on the results of the ESS Vision 2020 projects REDESIGN and SIMSTAT'.</p> Product(s): • [TEC] Trade in goods by enterprise characteristics. • [IntGood] International trade in goods. • [TIC] Trade in goods by invoicing currency. Other output(s): • Asymmetries, mainly in intra-EU trade, analysed and addressed. • Innovative compilation methods in intra-EU trade in goods statistics, in the context of the micro-data exchange (MDE) developed and deployed. • Enhanced dissemination of trade by enterprise characteristics (TEC) statistics. • Methodological developments in ITGS and TEC enabling the production of experimental statistics.	Project (2020-2024)
1, 2	<p><b>[ITSS] International trade in services statistics</b>            Description: Validation and processing of annual statistics on international trade in services (ITSS) data received from Member States and other reporting countries. Dissemination of national data and EU aggregates on Eurostat website. Quality reporting and methodological development ensured, including the work to reduce asymmetries. The IT request comes from MDT work on the new data series STEC, BEC and MoS.</p> Product(s): • [IntServ] International trade in services. Other output(s): • Structured approach to reduce asymmetries. • MDT development for STEC, BEC and MoS.	Process
2	<p><b>[BD] Business Demography Statistics</b>            Description: Production (collection, processing, validation, quality and compliance control) and timely dissemination of annual business demography (BD) statistics. Further development of BD statistics.</p> Product(s): • [BD] Business demography.	Process
2	<p><b>[CIS] Innovation statistics</b>            Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of biennial Community Innovation Survey; Implementation of the Oslo (Innovation) manual.</p> Product(s): • [CIS] Innovation.	Process
2	<p><b>[CollEcon] Collaborative Economy</b>            Description: Collecting data from platforms with a view to compile and disseminate data on collaborative economy as experimental statistics and, subsequently, integration into regular statistics.</p> Product(s): • [TourAcc] Tourism industry - accommodations. Other output(s): • Methodological guidelines on Measurement of the Collaborative Economy. • Experimental statistics on short-term accommodation. • Integration with other sources.	Project (2019-2023)
2	<p><b>[SBS] Structural Business Statistics</b>            Description: Production (collection, processing, validation, quality and compliance control) and timely dissemination of annual Structural Business Statistics. Further development of Structural Business Statistics.</p> Product(s): • [SBS] Structural Business Statistics. Other output(s): • Explore possibilities for deriving new SBS indicators, e.g. through micro data linking or modelling, related to Blue Economy, Defence, etc.	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
2	<p><b>[TOUR] Tourism statistics</b>            Description: Production (collection, processing, validation, quality and compliance control) and timely dissemination of tourism statistics. Further development of tourism statistics.            Product(s): • [TourAcc] Tourism industry - accommodations. • [TourEco] Tourism industry - economic dimension. • [TourTrip] Trips of EU residents.            Other output(s): • Assess options for improving the quality of tourism statistics. • Improve tourism statistics in the area of collaborative economy. • Implementation of improved geographical granularity of accommodation statistics.</p>	Process
2	<p><b>[BTS-STRATEGY] Operationalisation of the strategy on European business and trade statistics</b>            Description: Operationalising the Directorate's strategy on business and trade statistics by e.g. organising the Business Statistics Directors Group meetings, harmonising metadata, quality reporting and data transmission, coordination of the updating of methodological manuals. Facilitating and monitoring the implementation of the EBS Regulation including the compliance reporting using as much as possible automated processes. Enhancing dissemination. (EBS = European Business Statistics).            Coordination of the planning and the reporting for the business and trade statistics activities as well as of the answers to consultations at the Directorate level.            Output(s): • BSDG and BSDG-SDG meetings organised. • Coordination of the updating the Directorate's methodological manuals. • Facilitating the Directorate's use of modern dissemination tools. • Improved promotion of and communication to users of business statistics e.g. by enhanced story telling. • Harmonisation of the metadata and quality reporting and the data transmission standards for business and trade statistics. • Harmonisation of the compliance monitoring and reporting by using as much as possible automated processes.</p>	Process
2	<p><b>[PRODCOM] Statistics on industrial production</b>            Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of industrial production statistics (Prodcum).            Product(s): • [PRODCOM] Production of manufactured goods.            Other output(s): • maintenance and fine-tuning of the PRODCOM production system including the implementation of the EBS harmonised exchange format and of the sub-contracting data processing. • Adoption and implementation of updated PRODCOM list. • Improved Prodcum methodology available. • More PRODCOM data disseminated, e.g. on circular economy.</p>	Process
2	<p><b>[ISoc] ICT Statistics (digitalisation)</b>            Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of statistics on the information society and digitalisation: • ICT usage in households and by individuals, • ICT usage and e-commerce in enterprises. Production (compilation, processing) and dissemination of secondary statistics related to ICT, i.e. output of ICT producing industries, employment in the ICT sector, demand and employment of ICT skilled personnel, etc. This process supports the policies under the Digital Agenda and the Digital Single Market. (ICT = Information and Communication Technologies).            Product(s): • [ISocEnt] Information society - enterprises. • [ISocHI] Information society - households and individuals. • [ISocICT] ICT sector and ICT skills.            Other output(s): • Adoption of a Commission regulation implementing Regulation (EU) 2019/2152 of the European Parliament and of the Council (EBS) and Commission implementing and delegated regulations for the Regulation (EU) 2019/1700 of the European Parliament and of the Council (IESS). • Development of two model questionnaires for the use of ICT in enterprises and in households and by individuals.</p>	Process
2	<p><b>[R&amp;D] R&amp;D statistics</b>            Description: Development (methodology), production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of R&amp;D (Research and Development) statistics, High-Tech statistics and Human Resources in Science and Technology statistics, European Research Area (input in the ERA progress report), European Innovation Scoreboard and for Research and Innovation Observatory; Implementation of the 2015 Frascati (R&amp;D) manual.            Product(s): • [R&amp;D] Research and Development. • [HRST+HTec] High-tech industry, knowledge-intensive services and HR in S&amp;T.            Other output(s): • Implementation of new methodology and appropriate quality measures in Member States in the area of R&amp;D statistics.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
2, 1	<p><b>[STS] Short-term business statistics</b>            Description: Development (methodology) production (collection, processing, validation, analysis, quality and compliance control) and timely dissemination of short-term business statistics.            Product(s): • [STS-Co] Short-term business statistics - construction. • [STS-In] Short-term business statistics - industry. • [STS-TS] Short-term business statistics - trade and services. • [STS-BD] Short-term Business demography.            Other output(s): • More STS indicators on services disseminated. • New indicators on the Total Market Production disseminated as experimental statistics.</p>	Process
3	<p><b>[Culture] Culture statistics</b>            Description: Production and dissemination of culture statistics based on existing data collections. Support to further development of culture statistics.            Product(s): • [Culture] Culture.            Other output(s): • Methodological papers.</p>	Process
3	<p><b>[QoLupdate] Indicators on Quality of Life - Update</b>            Description: Update of the set of indicators on QoL - production activity.            Product(s): • [QoL] Quality of life.</p>	Process
3	<p><b>[SocStat27] Social statistics strategy 2027 *NEW*</b>            Description: The project aims at building on the recent achievements of modernising social statistics, taking stock of the current situation, the new and evolving needs, in a strategic manner for social statistics. At this stage, several directions have been identified, linked to the evolution of the survey based data, the improvement of the population and census data, better information on labour market business based data, long term care information. This project will evolve over time, in order to adapt to the new needs, on the basis of an initial integrated strategy.            Output(s): • Strategic guidelines for development of social statistics.</p>	Project (2022-2027)
3	<p><b>[Sport] Sport statistics</b>            Description: • Production and dissemination of sport statistics based on existing data collections. • Support to further development of sport statistics.            Product(s): • [Sport] Sport.</p>	Process
3	<p><b>[Youth] Youth statistics</b>            Description: • Production and dissemination of youth statistics based on existing data collections. • Development of new indicators for EU policies for young people.            Product(s): • [Youth] Youth.            Other output(s): • Further dissemination of data and indicators on youth.</p>	Process
3	<p><b>[AdEvMigr] Asylum, Managed Migration &amp; Migrant Integration</b>            Description: Data collections: (1) Asylum. (2) Enforcement of immigration legislation. (3) Residence permits. (4) Dublin statistics. (5) Indicators on migrants integration in the context of new Regulation 2020/851.            Product(s): • [MngdMigr] Asylum &amp; Managed Migration. • [LFS21Mig] Labour market situation of migrants 2021.            Other output(s): • Methodological advice in support of data collections: definitions and data. • Addressing temporary derogations where granted to Member States. • Support to the European Migration Network (EMN) and Migrant Integration. • Improvement of methodology, harmonisation and expanding the use of data sources.</p>	Process
3	<p><b>[AMM-Pilots] Pilot studies for new asylum and managed migration statistics *NEW*</b>            Description: Development of new statistics on asylum and managed migration in line with Article 9a, Regulation (EC) 862/2007. This includes study and access to EU level data sources and implementing pilot studies with Member States.            Output(s): • Reports concerning Union level data sources and pilot studies.</p>	Project (2021-2024)
3	<p><b>[DemoMigr] Demography &amp; migration</b>            Description: Data collections: (1) URESPOP Usual Residence Population data collection. (2). DEMOBAL Demographic Balance data collection. (3). NOWCAST demographic data collection. (4). UNIDEMO Unified Demographic data collection. (5) Weekly deaths statistics and monthly excess mortality.            Product(s): • [DemoMigr] Demography and migration.            Other output(s): • Improvement of the methodology, harmonisation and data publication.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3	<p><b>[ESOP] Redevelopment of European population statistics beyond 2021 *NEW*</b>            Description: Modernising and integrating demographic, migration and census statistics which are currently organised in several separate data collections of different periodicities and under different legal bases. This includes conducting evaluation, impact assessment, consultations, developing a legislative proposal and implementing the adopted new legislation.            Output(s): • Evaluation and impact assessment report. • Public consultation report. • Proposal for a framework regulation on European population statistics. • Related delegated and implementing acts. • Methodological guidance.</p>	Project (2021-2026)
3	<p><b>[PopCens] Census 2021</b>            Description: (1) Support to the national implementations of the 2021 census on the basis of the implementing acts based on the European Parliament and Council regulation 763/2008 on population and housing censuses and Temporary Statistical Action implementing regulation for 1 sq. km grid data for the 2021 round of censuses. (2) Early activities for the preparation for Population and housing census 2031.            Product(s): • [PopCens] Population and Housing Census.            Other output(s): • Methodological advice and harmonisation. • Support of preparatory actions in Member States. • High quality data and information available to users.</p>	Process
3	<p><b>[PopProj] Population projections</b>            Description: Population Projections 2023 exercise production preparation: in line with the procedures, publication of EU, national and regional population projections. Development of methodology for short-term annual updates.            Product(s): • [PopProj] Population projections.            Other output(s): • Methodological documents.</p>	Process
3	<p><b>[977] Modernisation of Labour Market statistics based on Businesses (LMB)</b>            Description: Modernise all Labour Market statistics based on Businesses, including job vacancies (JVS), Structure of Earnings Survey (SES), Gender Pay Gap, Labour Costs Index (LCI) and Labour Costs Survey (LCS) and develop a new legal framework.            Output(s): • Draft framework regulation on all Labour Market Statistics based on Businesses adopted by the Commission.</p>	Project (2021-2024)
3	<p><b>[AL] Adult Learning</b>            Description: Methodological work, collection, validation and dissemination of data from surveys on education and training (adult and continuing learning - AES every 6 years and CVTS every 5 years). Use of data on education and training from the EU-LFS for annual dissemination (including policy indicators). Methodological support to countries for the implementation of the 2022 AES and the new adult learning variables in the LFS; validation and dissemination of results of the 2020 CVTS.            Product(s): • [Educ-CVTS] Continuing Vocational Training Survey. • [Educ-LFS] Education and training policy indicators. • [Educ-AES] Adult learning*.            Other output(s): • Implementation of 2020 Continuing Vocational Training Survey (CVTS) &amp; 2022 Adult Education Survey (AES).</p>	Process
3	<p><b>[Gender] Gender and discrimination statistics</b>            Description: Provision and dissemination of gender and discrimination statistics as well as analysis on gender related aspects. Gender and discrimination statistics do not necessarily entail the collection of additional statistics from existing surveys but rather make full use of existing data to illustrate possible gaps e.g. between men and women. The main purpose of the activity is to extend the visibility of equality statistics available in the European Statistical System. The sets of gender and age equality indicators which are published by Eurostat use data from the following surveys: EU SILC (Community statistics on income and living conditions), LFS (Labour Force Survey), SES (Structure of Earnings Survey) and EHIS (European Health Interview Survey).            Product(s): • [Gender] Gender and discrimination.            Other output(s): • Dissemination of gender pay gap for 2020 and of detailed gender and discrimination statistics.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3	<p><b>[Labour] Statistics on labour costs (labour cost survey and labour cost index) and earnings; job vacancies; minimum wages</b></p> <p>Description: Collection, processing, dissemination and quality assurance of Labour Cost Index, Labour Cost Survey, Structure of Earnings Survey, Annual net earnings, Job Vacancy Survey, Minimum Wages data. Adoption of the reports to the EP and the Council on the implementation of the regulations on the labour cost index and of Job Vacancy Survey.</p> <p>Product(s): • [Earn] Earnings. • [JVS] Job vacancy. • [LC] Labour costs. • [Educ-CVTS] Continuing Vocational Training Survey.</p> <p>Other output(s): • Final dissemination of Structure of Earnings Survey 2018 data (SES 2018). • Updated version of the Working Paper on the adjusted gender pay gap based on SES 2018 data. • Update of the salary calculator with SES2018 data.</p>	Process
3	<p><b>[LFS+Unempl] Labour Force Survey and monthly unemployment rates</b></p> <p>Description: Collection, processing, dissemination and quality-assurance of LFS data under regulation 2019/1700; including transmission of data to the ECB. Dissemination of micro data for research purposes. Transmission of monthly unemployment data is also based on a legal basis.</p> <p>Product(s): • [EmplUnempl] Employment and unemployment. • [Une] Unemployment rates.</p> <p>Other output(s): • Seasonally adjusted key labour market indicators. • EU LFS special tabulations on request from other DGs and Agencies, including transmission to ECB. • Labour market dynamics and transitions and other labour market indicators. • Variance estimation for scoreboard indicators.</p>	Process
3	<p><b>[556] Re-design and development of SILC, including improved timeliness, under Regulation 2019/1700 ("IESS")</b></p> <p>Description: Methodological, practical and legal developments are required in the context of the modernisation of social statistics under Framework Regulation 2019/1700 ("IESS"), of the upgrading of social indicators, of the European Pillar of Social Rights and of the increased demands on SILC, in particular demands of regional estimates, needs for dramatically improve the timeliness and effectiveness of data on poverty and social inclusion (including for the purpose of flash estimates of the income distribution and monetary poverty). It encompasses better information on income, consumption and wealth, material and social deprivation, over-indebtedness, valuation of non-cash social transfers and data on poverty dynamics, health, children, transmission of disadvantages, housing conditions and difficulties, labour, quality of life and social participation. A better information on break in series is also implemented. (IESS = Integrated European Social Statistics, SILC = Statistics on Income and Living Conditions).</p> <p>Product(s): • [EU-SILC] Income and living conditions. • [SocRights] European Pillar of Social Rights. • [ICW] Distribution of income, consumption and wealth.</p> <p>Other output(s): • Further implementing regulations for SILC under IESS to be adopted by the ESSC and delegated acts by the Commission, guidelines to be further set up. • Further improvement in timeliness, regional coverage and effectiveness; support to Member States, developments on improved policy indicator (material and social deprivation, low work intensity, etc.). • Develop the longitudinal analysis and indicators with the every 3-year and 6-year modules. • Study of the methodologies suited for advanced estimations of risk of poverty, data for the European Pillar of Social Rights. • SILC data production compliant with revised legislation, with state-of-the-art, transparent and well-documented structure, workflows and processes. • Voluntary module on evolution of income and living conditions due to COVID-19. • Piloting infra-annual data collection on social inclusion, income and well-being.</p>	Project (2012-2022)
3	<p><b>[850] Innovative sources and tools for HBS and TUS</b></p> <p>Description: Development of innovative sources and tools for living conditions surveys. New technologies can be used at the level of collection of survey data from households and individuals using modern IT tools, smart devices and e-technologies, to facilitate it and minimise the survey costs. The modernisation shall also relate to direct data collection directly from new sources such as administrative or Big Data including privately owned microdata. The modernisation for HBS (Household Budget Survey) and TUS (Time Use Survey) is foreseen in Regulation 2019/1700.</p> <p>Product(s): • [HBS] Household consumption expenditure. • [TUS] Time use.</p> <p>Other output(s): • In 2022 the aim is to achieve having tools now re-usable in various MS following developments over 2019-2021 by MS and Eurostat for HBS and TUS. • The work will also be ongoing targeting the provision of sound recommendations and proposals for a large use of innovative tools and sources for the next round of HBS in 2025, and in a longer term the 2030 round of TUS.</p>	Project (2017-2023)

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3	<p><b>[EHIS] European Health interview survey</b>            Description: Preparation of the EHIS methodology. Management of the required legal basis. Collection of data from Member States. Editing and validation. Dissemination and publication.            Product(s): • [Health-EHIS] Health.            Other output(s): • Further dissemination and analysis of EHIS Wave 3 microdata. • Further analysis of the piloting additional modules in volunteering MS for possible use in the next survey in 2025. • Feasibility and pilot studies for data collection on disable persons living in collective households as foreseen by Regulation 2019/1700.</p>	Process
3	<p><b>[EU-SILC] Income and living conditions statistics, including ad hoc modules – collection, dissemination, quality assurance, methodology and analysis of SILC data under regulation 2019/1700</b>            Description: Preparation and dissemination of EU-SILC data and EU quality report. Analysis and publications (Statistics Explained). Every 2-year development of the ad hoc modules under regulation 2019/1700, including the legal basis. (EU-SILC = Statistics on Income and Living Conditions, IESS = Integrated European Social Statistics).            Product(s): • [EU-SILC] Income and living conditions. • [EU-SILC2020] Over-indebtedness, consumption and wealth as well as labour. • [EU-SILC2021] Children. • [EU-SILC2022] Health; Quality of life. • [EU-SILC2023] Labour market and housing; Energy efficiency. • [EU-SILC2024] Access to services.            Other output(s): • Statistics Explained. • Preparation and assessment of annual ad hoc modules. • Papers.</p>	Process
3	<p><b>[GBV] Gender based violence survey</b>            Description: Implement the Gender Based Violence and other interpersonal violence (EU-GBV) survey in order to report on the situation and evolution of violence against women and domestic violence in the context of the Convention on "Preventing and Combating violence against women and domestic violence" signed in 2011 and ratified by the EU and its Member States.            Product(s): • [Crime] Crime and criminal justice.            Other output(s): • Launching the full-scale survey in the Member States over 2020-2023 supported by the 2019-2020 grants and using the final methodology, questionnaire and guidelines finalised in 2019.</p>	Project (2017-2023)
3	<p><b>[HBS] Household Budget Survey</b>            Description: • Follow-up the implementation of the 2020 wave. • Follow-up the implementation of COICOP (Classification of Individual Consumption by Purpose) 2018. • Follow-up the implementation of new tools in national data collection. • Preparing data reception, validation and dissemination. • Further dissemination of HBS 2015 microdata for researchers. • Development and production of indicators. • Preparation and adoption of the HBS implementing and delegated regulations under IESS for HBS (first round 2026).            Product(s): • [HBS] Household consumption expenditure.            Other output(s): • Progressive reception, processing and dissemination of HBS 2020 data. • Draft HBS implementing and delegated regulations under IESS for HBS (first round 2026).</p>	Process
3	<p><b>[IT4SocStat] Use and maintenance of IT tools for EU-SILC, HBS, EHIS, TUS and GBV</b>            Description: Data validation, processing and dissemination (Eurobase) of EU-SILC, HBS, EHIS, TUS and GBV. Dissemination of microdata to researchers (User Data Base - UDB). Maintenance, developments for new indicators and ad hoc modules and revision of EU-SILC. (EU-SILC = Statistics on Income and Living Conditions, HBS = Household Budget Survey, EHIS = European Health Interview Survey, TUS = Time Use Survey, GBV = Gender Based Violence).            Output(s): • Revision of the EU-SILC data production chain. • New indicators required by policy DGs and Indicators Sub-group, Social Protection Committee.</p>	Process
3	<p><b>[TUS] Time Use Survey</b>            Description: • Follow-up the implementation of the 2020 wave. • Follow-up the implementation of new tools in national data collection. • Preparing data reception, validation and dissemination. • Dissemination of TUS 2010 microdata for researchers. • Development and production of indicators.            Product(s): • [TUS] Time use.            Other output(s): • Progressive reception, processing and dissemination of TUS 2020 data.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3	<p><b>[128] Developing statistics on health - health care non-expenditure, morbidity and occupational diseases</b>            Description: Developing health statistics based on administrative sources within the framework regulation 1338/2008 on public health and health and safety at work statistics.            Output(s): • Health care statistics: work towards a new Commission regulation on Health care non-expenditure statistics. • Morbidity statistics: pilot data collection (2019-2021) for some diseases in volunteer countries. Assessment of results, improvement of the methodology and possible further round of pilot data collection. • Occupational diseases: development of an improved pilot data collection. Development of dissemination tables.</p>	Project (2013-2025)
3	<p><b>[EDUCATION] Education and training statistics</b>            Description: Collection, validation and dissemination of annual education and training data based on administrative sources (UOE data collection). Methodological work. (UOE=The administrative data collection on education and training systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat).            Product(s): • [Educ-UOE] Education and training.            Other output(s): • Education and training statistics: update of UOE Manual, enhanced dissemination of data and indicators. • UOE education expenditure: work towards improvement of UOE methodology, update of UOE Manual and possible revision of Implementing Regulation 912/2013.</p>	Process
3	<p><b>[ESSPROS] Social protection statistics</b>            Description: Collection, validation and dissemination of annual data on social protection based on administrative sources. Methodological work.            Product(s): • [ESSPROS] Social protection.</p>	Process
3	<p><b>[HEALTH-exp] Health statistics - expenditure</b>            Description: Collection, validation and dissemination of annual healthcare expenditure data based on administrative sources. It is an annual data collection based on the Joint health accounts questionnaire (JHAQ) that countries submit to Eurostat (JHAQ is jointly managed with OECD and WHO). Methodological work.            Product(s): • [Health-CARE] Health care.            Other output(s): • Implementing new legal act replacing Regulation 2015/359.</p>	Process
3	<p><b>[HEALTH-nonexp] Health statistics - Public health (non expenditure) and Occupational health</b>            Description: Collection, validation and dissemination of data. It includes annual data based on administrative sources (Public Health: Health care non expenditure data and Causes of Death data). It also includes annual data collection on Accidents at work.            Product(s): • [COD] Causes of death. • [Health-ESAW] Health and safety at work. • [Health-CARE] Health care.</p>	Process
3	<p><b>[LTC] Development of Long-term care statistics *NEW*</b>            Description: Develop a conceptual framework and recommendations on the way forward for creating a data collection on long-term care statistics.            Product(s): • [Health-CARE] Health care.            Other output(s): Support the methodological developments of Long-term care statistics via a dedicated task force.</p>	Project (2022-2023)
3	<p><b>[SPHE] Developing links with National Accounts in the area of Social Protection, Health and Education and training</b>            Description: Based on existing experiences and methodologies in the area of social protection (ESSPROS) and health (SHA), the project aims at developing the links with national accounts for education and training, health and social protection. The availability of satellite accounts covering these statistical fields is planned in the long-term perspective, taking into account ongoing recent developments in these areas that are under discussion for the future System of National Accounts and ESA.            Output(s): • Methodological documents and guidance on the links between ESSPROS (EU Social Protection Statistics System) and national accounts. • Methodological documents and guidance related to the improvement of UOE education and training expenditure data (including their links to national accounts). (UOE=The administrative data collection on education and training systems, jointly managed by the UNESCO Institute for Statistics, the OECD and Eurostat). • Methodological documents and guidance on the links between Health care expenditure data from SHA (System of Health Accounts - administrative data jointly managed with OECD and WHO) and national accounts. Analysis of available administrative data on long-term care beneficiaries.</p>	Project (2014-2023)
3	<p><b>[UBR+EE] Improve timeliness and scope of social protection data</b>            Description: Collection, validation and dissemination of early estimates for social protection expenditure and data for number of beneficiaries beyond pensioners. Methodological work and voluntary new data collections.            Output(s): • Methodological documents. • Voluntary data collections.</p>	Project (2021-2026)

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3, 1	<p><b>[EPSRI] European Pillar of Social Rights indicators</b>            Description: Maintain the set of indicators for Social Scoreboard.            Product(s): • [SocRights] European Pillar of Social Rights.</p>	Process
3, 1	<p><b>[RRSI] Reinforced Role of Social Indicators</b>            Description: The Reinforced Role of Social Indicators (RRSI) project aims at achieving a sustainable upgrading and modernisation of European social statistics in key areas in support of the Commission's priorities: an economy that works for people. The RRSI thus aims at reinforcing the development, production and dissemination of Social Statistics by Eurostat particularly in the domains of income, poverty and social exclusion timeliness, labour market, social fairness, better links between income, consumption and wealth and between micro and macro data on income, consumption and wealth. This will allow Eurostat to make substantial, measurable advancements in these areas of social statistics in response to direct policy needs and with a view to bringing key social indicators up to a level considered to be on an equal footing with macroeconomic indicators. To ensure this, a suite of new and improved statistical indicators will be created in a way that, when taken together, will represent a coherent upgrading of key social statistics. This will require the project to be managed as a set of interrelated work packages that will fall under the overarching RRSI heading and which will ultimately deliver a set of indicators that will demonstrably improve key attributes of social statistics including with respect to statistical quality as defined in Article 12 of the Statistical Regulation ((EC) No.223/2009) and also with reference to the ESS Code of Practice.            Product(s): • [Skills] Improved data on skills. • [ICW] Distribution of income, consumption and wealth.            Other output(s): • Methodological documents. • Experimental statistics in the fields of ICW (Income, Consumption, Wealth) and flash estimates.</p>	Project (2015-2022)
3, 1	<p><b>[552] Further modernise the Labour Force Survey under regulation 2019/1700</b>            Description: Modernising further the Labour Force Survey including: • implementing in the EU-Labour Force Survey in 2022 a pilot data collection on digital platform employment; • managing the break in time series exercise linked to implementation of regulation 2019/1700 and producing break-free time series; • developing a list of variables for implementation of the ICSE (International Classification of Status in Employment)-18 classification and run to be tested and used to define a final list of variables for a future implementation in the LFS; •disseminating quarterly LFS data on employment, unemployment and labour market slack at T+75 days as from the results of 2022 Quarter 2.            Product(s): • [EmplUnempl] Employment and unemployment. • [SocRights] European Pillar of Social Rights.            Other output(s): • Pilot data collection on digital platform employment implemented at national level• List of variables related to the ICSE-18 classification ready for testing • A first document with first reflections on LFS-based monthly information available. • Break-free time series available.</p>	Project (2011-2023)
3, 2	<p><b>[LFS-Mod] Statistics from the Labour Force Survey ad hoc modules</b>            Description: • 2020 module on accidents at work and other work-related health problems: dissemination of results. • 2021 module on labour market situation of migrants: dissemination of EU results. • 2022 ad hoc subject on job skills: implementation at national level. • 2023 regular module on pension and labour market situation: preparation at national level. • 2024 regular module on young people: preparation at national level. • 2025 regular module on reconciliation of work and family life: preparation at national level.            Product(s): • [LFS21Mig] Labour market situation of migrants 2021. • [LFS22Ski] Job Skills 2022. • [LFS23Pens+LM] Pension and labour market situation 2023. • [LFS24YoungP] Young people on the labour market 2024. • [LFS25Rec] Reconciliation of work and family life 2025.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
3, 5	<p><b>[Crime] Crime and criminal justice</b>            Description: Police-recorded crime, prosecution, court and prison statistics, police numbers: joint collection with UNODC, validation and dissemination of data (and associated meta-data), including data on victims of violent crime broken down by sex. Technical advice to policy DG as required, including technical advice on improving statistics on European judicial training, money laundering, corruption. Improvement of data quality; extension of the data collection, where possible, to other areas of crime (in particular to asset freezing and confiscation, fire arms if and when the quality of the data makes it possible in European statistics and limited collection on statistics on trafficking in human beings), to the different stages of proceedings (in contact with police - investigation - prosecution - conviction - prison sentence; pre- and post-conviction phase) and specified per type of offence (cybercrime) with disaggregation by relevant demographic characteristics; statistics on the number of convicted third country nationals. Promotion of the ICCS (UN international crime classification for statistical purpose). (UNODC=United Nations Office on Drugs and Crime).            Product(s): • [Crime] Crime and criminal justice.            Other output(s): • Joint data collection with UNODC. • Implementation of the new international classification of crimes for statistics ICCS of UNODC. • Progressive inclusion on further organised crime data on request of policy DG. • Technical advice to policy DG, if required.</p>	Process
4	<p><b>[511] Strategy for agricultural statistics towards 2020 and beyond</b>            Description: • Set-up of the legal basis for the European Agricultural Statistical System 2020 and beyond. • Adapt data collections under regulations handled by DG AGRI(organic production statistics and hatchery statistics) to legal updates (integration in draft Implementing Regulations on Statistics on Agricultural Input and Output - SAIO). • Formalise data collections via ESS agreements or regulations. • Improve dissemination and methodological aspects for statistics on agriculture and fisheries. • Eurofarm: Information system to support the production of integrated farm statistics (linked to IT project Eurofarm2020); further development for the IFS modules and the tabular data to be collected under SAIO.            Output(s): • Statistics required under SAIO / Legal base for SAIO and proposal for its Implementing Regulations. • Implementing regulations for Integrated Farm Statistics / Proposal for amending Regulation 138/2004 as regards regional economic accounts for agriculture.</p>	Project (2010-2023)
4	<p><b>[AAct] Economic Accounts for Agriculture</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [AAct] Economic accounts for agriculture.</p>	Process
4	<p><b>[AEI] Agro-Environmental Statistics</b>            Description: Collection, validation, production, dissemination of data and metadata.            Product(s): • [AEI] Agro-environment. • [OrgFarm] Organic farming. • [Fertilizers] Fertilizers. • [GNB] Gross Nutrient Balances. • [PlantProtect] Plant Protection Products sales and use in agriculture.            Other output(s): • Coordination role according to specific Memorandum of Understanding on agro-environmental indicators (EC services involved: Eurostat, DG AGRI, DG CLIMA, DG ENV, DG SANTE, JRC and EEA). Harmonized risk indicator for pesticides in the meaning of Directive 2009/128/EC will be provided to DG SANTE.</p>	Process
4	<p><b>[APri] Agricultural Prices and Indices</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [APri] Prices of agricultural products (input and output). • [APriInd] Agricultural price indices. • [AgriPR] Prices and rents of agricultural land.</p>	Process
4	<p><b>[APro] Animal production statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [AProMe] Animal production - meat. • [AProPo] Animal production - poultry. • [AProMi] Milk, milk products and dairies structure.</p>	Process
4	<p><b>[Crop] Crop statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [Crop] Crop production. • [PermCrop] Permanent crops. • [CropBal] Crop balances.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
4	<p><b>[Fish] Fisheries statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [FishCatch] Catches by fishing area. • [FishFleet] Fishing fleet. • [Aqua] Aquaculture. • [FishLand] Landing of fishery products.            Other output(s): • 4th assessment report on the Regulation (EC) No 1921/2006 (Landings of fisheries).</p>	Process
4	<p><b>[FishSimpl] Streamlining and simplification of European fishery statistics</b>            Description: Streamlining and simplification of fisheries statistics legal basis and data collection.            Output(s): • Preparatory work for future update of the legal base.</p>	Project (2017-2025)
4	<p><b>[IFS] Integrated farm statistics</b>            Description: Collection, validation, production and dissemination of data and metadata.            Product(s): • [FSS] Structure of agricultural holdings. • [IFS] Integrated farm statistics (core). • [IFS_AH] Integrated farm statistics (animals and manure). • [IFS_IR] Integrated farm statistics (irrigation). • [IFS_LF] Integrated farm statistics (Labour force). • [IFS_MA] Integrated farm statistics (machinery). • [IFS_ORCH] Integrated farm statistics (orchards). • [IFS_RD] Integrated farm statistics (rural development). • [IFS_SM] Integrated farm statistics (soil management). • [IFS_VIN] Integrated farm statistics (vineyards).            Other output(s): • Ad hoc extractions from farm structure data for other DGs/Agencies (not available in the online database) / Preparatory work for the IFS 2023.</p>	Process
4	<p><b>[CEWasOR] Modernise waste statistics with a view to contribute to the European Green Deal, to the EU own resource on plastic packaging waste and to circular economy monitoring</b>            Description: Adapt waste statistics and circular economy monitoring to new legal acts and new action plans, contribute to the European Green Deal and prepare for own resource on plastic packaging waste not recycled.            Product(s): • [CircEco] Circular economy indicators. • [MFA] Material flow accounts. • [Waste] Waste statistics.            Other output(s): • Service to DG ENV, DG GROW, SG and DG BUDG in setting up improved waste statistics adapted to new legislation and improved circular economy monitoring, including for purposes of own resources calculation. • Service to DG SANTE: collect, validate and disseminate data on generation of food waste.</p>	Project (2020-2024)
4	<p><b>[EnvCircEco] Circular economy indicators</b>            Description: Develop and maintain the circular economy indicator set and its metadata to support the monitoring of policies on circular economy and contributing to the European Green Deal. Maintain the set of indicators to monitor the effectiveness of the EU chemicals policy. Develop and update the diagram on material flows.            Product(s): • [CircEco] Circular economy indicators. • [ChemInd] Chemical indicators.            Other output(s): • Dedicated section on circular economy monitoring.</p>	Process
4	<p><b>[EnvClimChange] Climate change related statistics and indicators</b>            Description: Promoting the use of official statistics for climate change information purposes.            Product(s): • [ClimChange] Climate change.            Other output(s): • Maintain and further develop a data hub with links to relevant statistics and indicators. • Regular updating of the climate change Statistics Explained article. • Support the CES (Conference of European Statisticians) initiative on climate change related statistics.</p>	Process
4	<p><b>[EnvDirCoord] DIMESA secretariat, coordination and cooperation activities at Eurostat, EU and international level</b>            Description: Secretariat of the directors group on sectoral and environmental statistics and accounts (DIMESA). Contribute to the environmental knowledge community, involving several Commission DGs and the European Environment Agency. Contribute to international handbooks related to the System of Environmental Economic Accounts (SEEA).            Output(s): • DIMESA planning and follow up (secretariat). • Assistance to DG ENV in the context of the environmental knowledge community. • International handbooks related to the System of Environmental Economic Accounts (SEEA).</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
4	<p><b>[EnvKIP] Assistance on ecosystem accounts</b>            Description: Assistance to DG ENV on ecosystem accounts including to support the 2030 Biodiversity Strategy and the European Green Deal.            Product(s): • [BioDivInd] Biodiversity indicators.            Other output(s): • Service to DG ENV: assistance on ecosystem accounts. • Service to DG ENV: advice on the statistical needs and options for monitoring the biodiversity strategy.</p>	Process
4	<p><b>[EnvMonAcc] Monetary environmental accounts</b>            Description: Collect and disseminate environmental goods and services sector accounts, environmental taxes and environmental protection expenditure accounts including estimates for the main EU aggregates.            Product(s): • [EGSS] Environmental goods and services sector accounts. • [EnvTax] Environmental taxes. • [EPEA] Environmental protection expenditure accounts.            Other output(s): • Service to DG FISMA: technical advice on sustainable finance.</p>	Process
4	<p><b>[EnvPhysAcc] Physical environmental accounts</b>            Description: Collect and disseminate air emissions accounts, physical energy flow accounts and material flow accounts data including estimates for the main EU aggregates. It includes indicators on greenhouse gases and air pollution and footprints as well as estimates of raw material consumption.            Product(s): • [AirEmAcc] Air emissions accounts. • [EnerAcc] Physical energy flow accounts. • [MFA] Material flow accounts. • [ClimChange] Climate change. • [CircEco] Circular economy indicators.            Other output(s): • Service to DG ENV: technical advice on material flow accounts.</p>	Process
4	<p><b>[EnvWaste] Waste statistics</b>            Description: Collect and disseminate data on: generation and treatment of waste (Regulation EC No 2150/2002); municipal waste; transboundary waste shipments (Regulation (EC) No 1013/2006); waste electrical and electronic equipment; packaging waste; end-of-life vehicles; construction and demolition waste; waste batteries and accumulators; food waste. Maintain and further improve the quality of indicators on waste management and recycling.            Product(s): • [Waste] Waste statistics. • [RegEnv] Regional environment. • [CircEco] Circular economy indicators.            Other output(s): • Dedicated section on waste statistics. • Service to DG ENV: collect, validate and disseminate data on transboundary shipment of waste. • Service to DG ENV: collect, validate and disseminate data on generation and management of different waste streams.</p>	Process
4	<p><b>[EnvWat] Water statistics and accounts</b>            Description: Collect and disseminate water statistics and accounts.            Product(s): • [Water] Water statistics and accounts. • [RegEnv] Regional environment.</p>	Process
4	<p><b>[ForStAcc] Forestry statistics and accounts</b>            Description: Collect and disseminate forestry statistics and accounts.            Product(s): • [Forest] Forestry statistics and accounts.            Other output(s): • Dedicated section on forestry.</p>	Process
4	<p><b>[INCA(IT)] Maintenance of the information system on ecosystem accounting (INCA landing page)</b>            Description: Assistance to DG JRC for maintaining and hosting an information system on ecosystem accounts.            Output(s): • Operational information system for the public on ecosystem accounting. • Service to DG JRC: Assistance on maintaining and hosting an information system on ecosystem accounts.</p>	Process
4	<p><b>[SDI] Sustainable development indicators</b>            Description: Maintain and further develop the set of indicators to monitor progress towards the sustainable development goals (SDG) in an EU context as well as any future European growth strategy in cooperation with other services and Member States. Prepare analyses and dissemination products for the main users. Maintain the set of sustainable development indicators on the Eurostat website. Contribute to the development of indicators to measure the SDGs at global level.            Product(s): • [SDI] Sustainable development indicators.            Other output(s): • SDI dedicated section. • Annually revised EU SDG indicator set. • Monitoring report on sustainable development in the EU. • Overview brochure on sustainable development in the EU. • Digital publication on sustainable development in the EU. • Input for the European Semester.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
4	<p><b>[UpESA] Upgrading of environmental statistics and accounts</b>            Description: The upgrading of environment statistics and accounts aims to meet the new demands created by the European Green Deal by developing new modules in line with the European Strategy on environmental accounts and with Regulation 691/2011 on European environmental economic accounts with a focus on the areas of forestry, water, ecosystem accounts and monetary environmental accounts (the latter primarily with a view to extending the European Semester to integrate the SDGs).            Product(s): • [BioDivInd] Biodiversity indicators. • [ClimChange] Climate change. • [EGSS] Environmental goods and services sector accounts. • [EnvSubSimTra] Environmental subsidies and similar transfers accounts. • [EPEA] Environmental protection expenditure accounts. • [Forest] Forestry statistics and accounts. • [ResManExpAcc] Resource management expenditure accounts. • [Water] Water statistics and accounts.            Other output(s): • Further develop methodologies, handbooks, etc. to assist implementation of new modules.</p>	Project (2020-2024)
4	<p><b>[926] Common Questionnaire (Eurostat/ITF/UNECE)</b>            Description: Manage the common questionnaire on transport statistics in collaboration with International Transport Forum (ITF) and UNECE.            Product(s): • [Tran-Road] Road transport. • [Tran-IWW] Inland waterway transport. • [Tran-Rail] Rail transport.</p>	Process
4	<p><b>[Avia] Air transport statistics</b>            Description: Annual/quarterly/monthly data collection on the carriage of passengers, freight and mail by commercial air services as well as on civil aircraft movements to or from Community airports, based on Regulation (EC) No 437/2003 of the European Parliament and of the Council, including regional and infrastructure statistics.            Analysis and comparison with data of previous periods to reveal the impact of the COVID-19 crisis.            Product(s): • [Tran-Avia] Air transport.</p>	Process
4	<p><b>[IWW] Inland WaterWay transport statistics</b>            Description: Annual/quarterly data collection (goods transported by type, transport by nationality and type of vessels, vessel traffic) on inland waterway freight transport, based on Regulation (EU) 2016/1954 of the European Parliament and of the Council of 26 October 2016 amending Regulation (EC) No 1365/2006 on statistics of goods transport by inland waterways, including infrastructure and regional data statistics. Methodological work to develop passengers' statistics and study on the feasibility to collect these data. Analysis and comparison with data of previous periods to reveal the impact of the COVID-19 crisis.            Product(s): • [Tran-IWW] Inland waterway transport.</p>	Process
4	<p><b>[Mar] Maritime transport statistics</b>            Description: Annual/quarterly data collection (carriage of goods and passengers by sea) on maritime transport statistics, based on Directive 2009/42/EC of the European Parliament and of the Council and Regulation (EU) 1090/2010, including regional statistics. Besides the currently produced statistics, Eurostat will continue the exploratory work on possible use of administrative data for maritime statistics in collaboration with the Member States. Analysis and comparison with data of previous periods to reveal the impact of the COVID-19 crisis.            Product(s): • [Tran-Mar] Maritime transport.</p>	Process
4	<p><b>[Rail] Rail transport statistic</b>            Description: Quinquennial/annual/quarterly data collection (goods and passengers) on rail transport, based on Regulation (EU) 2018/643 of the European Parliament and of the Council, including regional and infrastructure statistics. Analysis and comparison with data of previous periods to reveal the impact of the COVID-19 crisis.            Product(s): • [Tran-Rail] Rail transport.</p>	Process
4	<p><b>[Road] Road transport statistics</b>            Description: Freight transport: quarterly/annual data collection (vehicle, journey and goods-related data) on road freight transport, based on Regulation (EU) 70/2012 of the European Parliament and of the Council, including regional and infrastructure statistics. Road traffic volumes and passenger mobility: annual voluntary data collection on the volume of road transport measured in VKm (Vehicle Kilometre); improving methodology for a data collection on passenger mobility, including indicators and survey design, collection of data for the 2 activities and dissemination of the data received. Develop methodology and examine possible data collection on statistics on Light Utility Vehicles (LUV). Analysis and comparison with data of previous periods to reveal the impact of the COVID-19 crisis.            Product(s): • [Tran-Road] Road transport.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
4	<p><b>[TranInd] Indicators and development of new transport statistics</b></p> <p>Description: Modal split indicators (the relative share of each individual mode in the total transport performance measured in tonne kilometre and passenger kilometre); Intermodal transport statistics, including logistic indicators (support, with grants, the development of data collection on intermodal transport); Transport safety - accident data by transport mode; Development of additional transport policy relevant indicators that may be produced on the basis of Eurostat statistics or on the basis of data from other trusted sources. Such indicators may also regard new means of transport (e.g. drones, e-bikes) and safety issues related to them.</p> <p>Product(s): • [Tran-Ind] Transport indicators.</p>	Process
4	<p><b>[LUCAS] Land use and land cover statistics</b></p> <p>Description: Preparation and carrying out of the regular Land use and land cover statistics (LUCAS) Survey. Collecting, processing and dissemination of European data on land use and land cover; by assessing and collecting available data in countries and by taking into account the need for harmonisation of these data and by co-operating with Commission DG, the European Economic Area, other international bodies and Member States. Develop a long-term strategy for land use land cover statistics. Integrate statistics, administrative sources and geospatial data for land use land cover information.</p> <p>Product(s): • [LUCAS] Land cover and use, landscape.</p> <p>Other output(s): • LUCAS in-situ micro data (including photos) on land-cover/land use, soil samples, land-cover/land use detailed data for specific modules, e.g. grassland.</p>	Process
4	<p><b>[751] Supporting the Energy Union and the European Green Deal</b></p> <p>Description: Compile data and provide services to facilitate the monitoring of progress towards the Energy Union objectives. Support the monitoring of the European Green Deal. Support DG ENER - and DG CLIMA where appropriate - in proposing, evaluating and reviewing legal acts with monitoring requirements. Support DG ENER and DG CLIMA in implementing the 'Clean energy for all' legal package which entered into force in Dec 2018/May 2019, notably the Governance Regulation on Energy Union and Climate Action (including the e-reporting platform); where needed, adapt and complement energy statistics. Support priority areas and their data needs such as on energy security or energy poverty. Follow up and contribute to other legal acts with implications for energy statistical reporting (e.g. energy efficiency directive and renewable energy directive). Contribute to conceptual and methodological developments of statistical indicators to design and monitor energy policies. Disseminate statistical information related to the Energy Union, including through high visibility publications.</p> <p>Output(s): • Contribute to DG ENER's State of the Energy Union report, country factsheets, SWD key indicators and other similar indicators. • Support DG ENER and DG CLIMA in implementing the new Regulation on Governance of the Energy Union and Climate Action and related legislation under the 'Clean energy for all' package, notable the National Energy and Climate Plans. • Support the conceptual and methodological development of statistical data to design and monitor Energy Union objectives. • Disseminate statistical information related to the Energy Union. • Possibly launch call for interest in 2022 to support MS in developing new indicators and data collections as European statistics for Energy Union purposes and/or the European Green Deal.</p>	Project (2016-2024)
4	<p><b>[77] Energy prices - natural gas and electricity; competition indicators</b></p> <p>Description: Collect, validate, produce and disseminate natural gas and electricity prices according to Regulation (EU) No 2016/1952; produce and disseminate energy market statistics. Reports on compliance monitoring and quality assurance, user support output.</p> <p>Product(s): • [NRG-Price] Energy prices.</p>	Process
4	<p><b>[919] Europe 2030 - energy indicators</b></p> <p>Description: Produce indicators to support and monitor the Europe 2030 targets (energy efficiency and share of renewable energy); produce early estimates of CO2 emission to contribute to monitoring the greenhouse gas emission target. Manage the statistical methodology for Europe 2030 energy indicators.</p> <p>Product(s): • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources. • [CO2] CO2 emission estimates from fossil fuel combustion.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
4	<p><b>[920] Energy statistics - quantities</b></p> <p>Description: Collect, validate and disseminate annual and monthly energy statistics data on solid fossil fuels, oil, natural gas, renewables and waste, nuclear energy, electricity and heat in accordance with Regulation (EC) No 1099/2008 on energy statistics (ESR) and its last amendment (Commission Regulation (EU) 2019/2146). Collect, validate and disseminate data on crude oil imports and crude oil supply costs as European statistics (on basis of the amended ESR). Produce energy policy indicators such as import dependency, energy security. Produce energy balances and prepare energy balance sheets. Republish indicators developed and produced by other Commission services (for example: heating and cooling degree-days from JRC). Publish reports on compliance monitoring and quality assurance. Update 'Statistics Explained' articles and other publications.</p> <p>Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency. • [HDD+CDD] Heating degree days and Cooling degree days. • [CO2] CO2 emission estimates from fossil fuel combustion. • [NRG-RES] Share of energy from renewable sources.</p>	Process
4	<p><b>[921] Improving relevance of energy statistics</b></p> <p>Description: Adapt energy statistics to evolving policy needs and legislative initiatives at the EU level, notably for the Energy Union and the European Green Deal. Identify and fill data gaps; accommodate new data needs; devise and implement methodological improvements. Follow up on tender awarded in 2020, i.e. the decomposition of energy production and consumption trends.</p> <p>Output(s): • Build on grant launched in 2020 to showcase a more detailed breakdown of final energy consumption (services, transport). • Implement methodological improvements if needed. • Identify and prioritise data gaps to be filled.</p>	Project (2019-2022)
4	<p><b>[922] Improving timelines of energy statistics to support the Energy Union</b></p> <p>Description: Improve the timeliness of data transmission defined in Regulation (EC) No 1099/2008 on energy statistics. Follow up on ECA report (on solar and wind) calling for transmission of annual data by end of September and reflect this in the amendment of the energy statistics regulation. Follow up on grant awarded to three Member States in 2020 on improving the timeliness of energy statistics. Assess pilot projects launched in 2020 to encourage reporting before the mandatory deadline. Continue follow-up on tender launched in 2019 investigating the feasibility of using monthly data for nowcasting of energy balances. Collect, produce and disseminate early estimates of energy balances; analyse their accuracy. Finalise developing a methodology for estimating the consumption side of energy balances and key indicators.</p> <p>Product(s): • [NRG] Energy. • [NRG-BS] Energy balance sheets. • [NRG-DE] Energy dependence and efficiency. • [NRG-RES] Share of energy from renewable sources.</p> <p>Other output(s): • Test, produce and improve year-0 estimates for the supply side of energy balances and key indicators (tender awarded in 2019). • Publish methodological manual for early estimates of energy balances and key indicators.</p>	Project (2019-2024)
4, 6	<p><b>[923] Improving accessibility and clarity of energy statistics</b></p> <p>Description: Develop additional visualisation tools for energy statistics, including on monthly energy statistics. Develop new questionnaires for reporting annual energy statistics; follow up on respective tender launched in 2020. Follow up on tender launched in 2020 on tapping new data sources, including from ACER, ENTSO-E and ENTSO-G, administrative data or from big data sources.</p> <p>Output(s): • Prepare and launch tender on additional visualisation tools for energy statistics, including monthly statistics. • Facilitate the reporting of annual energy statistics by considerably simplifying the questionnaire used by the NSI.</p>	Project (2019-2023)
5	<p><b>[GEOSTAT] Integration of statistical and geospatial information</b></p> <p>Description: Series of projects in cooperation with Member States to advance the integration of statistical and geospatial information within NSI (Merging Statistics and Geospatial Information), and at European level (ESSnets GEOSTAT). Participation in working groups of UN-GGIM (United Nations Global Geospatial Information Management).</p> <p>Output(s): • Methodological framework for the integration of geospatial and statistical information and for geospatial information management in statistics (Statistical Geospatial Framework (SGF): GEOSTAT 4 project (2020-2022) as a continuation of previous Geostat 3 project will complete the methodological guidance on SGF Europe and support its implementation and utilisation in the organisations in this field). • Closer cooperation within Member States between NSI and NMCAs (National Mapping and Cadastre Agencies), improved production systems and enhanced information. • High visibility for statistical matters in UN-GGIM (United Nations Global Geospatial Information Management).</p>	Project (2009-2022)

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
5	<p><b>[GISCO(IT)] GISCO geographical information system - IT part</b></p> <p>Description: IT part of the operation and maintenance of the GISCO (Geographic Information System for the Commission) in terms of further development of the technical system and related tools in Eurostat and the Commission Data Centre: Provision of GIS (Geographical Information System) tools. Development of ad-hoc IT programs for the different GISCO services.</p> <p>Product(s): • [GISCO] Demographic data at geospatial grid level.</p> <p>Other output(s): • Technically improved tools for the operation and further development of GISCO services. • Maintenance of the Commission internal Geoportal. • Design and evolutive maintenance of the distance calculation tool for transport statistics. • Design and evolutive maintenance of the tool for the creation of statistical and thematic maps.</p>	Process
5	<p><b>[GISCO] GISCO geographical information system</b></p> <p>Description: Operation and evolutive maintenance of the GISCO (Geographic Information System for the Commission) system as well as related tools and services in Eurostat and the Commission Data Centre: - Procurement, processing and dissemination of reference geographic datasets for Eurostat and the Commission. - Production of statistical and thematic maps in paper and electronic format based on extractions from statistical databases. - Design and provision of GIS (Geographical Information System) tools.</p> <p>Product(s): • [GISCO] Demographic data at geospatial grid level.</p> <p>Other output(s): • Geospatial reference spatial datasets and services for Eurostat and Commission DGs. • Generalised reference datasets for the general public. • Statistical maps in electronic and paper format. • Data and services for the Commission internal Geoportal. • Spatial analyses for statistical or policy relevant issues.</p>	Process
5	<p><b>[NUTS] Maintenance of the Nomenclature of Territorial Units for Statistics Classification and related Regulations</b></p> <p>Description: Implementation Regulation for the Regulation on Territorial Typologies (TERCET). Coordination of the Nomenclature of Territorial Units for Statistics (NUTS) classification and regular revision via amendment regulations as well as Implementing Regulations in order to coordinate the adaptation of statistics to the NUTS changes. The process includes annual collection of Local Administrative Unit (LAU, commune level) as basis for definition of NUTS boundaries as well as dissemination. Support candidate countries, EFTA countries and third countries in their efforts to establish and maintain territorial classifications compliant with the TERCET Regulation.</p> <p>Product(s): • [DegUrb] Degree of urbanisation. • [Reg] EU regions and regions' typology.</p> <p>Other output(s): • Implementation of the NUTS changes. • Preparation of the next NUTS update.</p>	Process
5	<p><b>[Reg] Coordination of Regional Statistics</b></p> <p>Description: Cooperation with Eurostat thematic units on regional statistics data collection in all phases of the statistical production cycle, the further evolution of indicators, metadata maintenance and their methodological basis as well as dissemination issues including the Eurostat Regional Yearbook and Statistical Atlas. Coordination with policy DGs of the Commission on regional, maritime, rural and urban statistics. Cooperation with ESS on regional, maritime, rural and urban statistics related issues. The process includes the actions related to the revision and maintenance of the thematic classifications, such as urban-rural typology. The process also includes activities to support the voluntary commitment by the European Commission to develop a global, people-based definition of cities and settlements together with OECD, UN and World Bank.</p> <p>Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Degree of urbanisation.</p> <p>Other output(s): • System of regional typologies and its maintenance, such as urban-rural and degree of urbanisation. • Geographic and statistical analyses for defining functional regions as well as other regional boundaries and characteristics for other DGs. • Eurostat Regional Yearbook.</p>	Process
5	<p><b>[SubN] Sub-National statistics</b></p> <p>Description: The process covers: • Regional labour market statistics both at NUTS 2 and NUTS 3 level, including the calculation of structural indicators. • Compilation of indicators important for maritime policy. • Compilation of aggregates based on regional typologies. (NUTS=Nomenclature of Territorial Units for Statistics).</p> <p>Product(s): • [Reg] EU regions and regions' typology. • [DegUrb] Degree of urbanisation.</p>	Process
5	<p><b>[Urb] Urban statistics</b></p> <p>Description: Urban Statistics cover a range of statistical indicators for European cities. A smaller set of indicators are produced on an annual basis and a larger one on a multi-annual basis complemented by methodological work using small area statistics harvesting big data sources and open data sources.</p> <p>Product(s): • [Urb] Key indicators on European cities.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
5, 4, 7	<p><b>[531] Coordination of geospatial information in the Commission within the European Statistical System and on international level</b>            Description: Coordination within the Commission via the Inter-service Group (COGI), the related technical committee (UTC) and within the European Statistical System via a Member States Working Group. Key aspects are: • The link between geospatial information and statistics. • INSPIRE (Infrastructure for Spatial Information in Europe), particularly its implementation in the Commission. • Active participation in the United Nations initiated UN-GGIM and its European branch UN-GGIM: Europe. (COGI=Commission interservice group for geographical information, UTC=User and Technical Committee, UN-GGIM=United Nations Global Geospatial Information Management).            Output(s): • Coordination of geographic information in the Commission, operation of the COGI Interservice Group and the GISCO (Geographical Information System of the Commission). User and Technical Committee. • Services to assist Commission DGs and Eurostat units in GIS (Geographical Information System) work, such as via framework contracts. • Capacity building and exchange of best practices within the European Statistical System and on international level. • Improving data quality of geospatial data through better specifications and guidelines.</p>	Process
6	<p><b>[885] Advice to management on communications</b>            Description: Improve communication with external partners of Eurostat. Improve communication in house on senior management's decisions and actions.            Output(s): • Maintain strategic overview and plan of external communications • Provide regular fora for exchanges of views and feedback • Enhance reporting and transparency of senior management meetings and decision-making. • Provide advice and support for communication materials of strategic importance. • Strategic communication as well as public relations. • Communication with other EU institutions including Commission DGs.</p>	Process
6	<p><b>[972] Eurostat's Communication and Dissemination Strategy</b>            Description: Communication.            Output(s): • Implementation of communication strategy. • Organising meetings and drafting action points of the Coordination Group on Communication.</p>	Process
6	<p><b>[973] Cooperation in the area of communication in the ESS and internationally</b>            Description: Cooperation in the area of communication in the ESS. Participation in UNECE meetings on the development of strategic communications for official statistics.            Output(s): • Organisation of meetings of the ESS Task Force on Strategic Communication. • Strategy for communication in the ESS. • Contributions to international initiatives in the field of strategic communication.</p>	Process
6	<p><b>[Trust] Measuring the public's trust in official statistics *NEW*</b>            Description: EU wide survey.            Output(s): • Analysis in response to the ESGAB recommendation.</p>	Project (2022-2023)
6	<p><b>[DARA] Infrastructure for the release of confidential data for scientific purposes - decentralised and remote access to confidential data in the ESS</b>            Description: To set up a network of national safe centres in the European Statistical System (ESS) providing access to EU secure use files.            Output(s): • Remote access infrastructure implemented. • ESS governance in place. • Eurostat workflows developed and implemented.</p>	Project (2014-2022)
6	<p><b>[402] Manage and improve the Reference environment for dissemination.</b>            Description: Manage and improve the Reference environment for dissemination including: • Improve the quality of data presentation. • Maintain and monitor the data navigation tree (EN, FR, DE). • Create and maintain the derived tables, including EU policy indicators. • Implement and maintain code lists (EN, FR, DE). • Contribute to the definition of data structures and standard code lists and their management. • Contribution to the code lists' management. • Supply statistical support to domain managers in Eurostat and upon request to other Commission DGs.            Output(s): • Central data production and dissemination services provided for European and other statistics. • Further harmonised and unified data structure and code lists.</p>	Process
6	<p><b>[403] Manage the production, dissemination and standardisation of reference metadata in the European Statistical System</b>            Description: • Manage the production, dissemination and standardisation of ESS reference metadata using the Single Integrated Metadata Structure (SIMS); • Provide reference metadata services to other DGs of the European Commission reusing the Eurostat dissemination chain; • Deliver training on the SIMS standard and on the ESS Metadata Handler; • Collect feedback and formulate new user requirements for the evolution of the metadata management including ESS Metadata Handler.            Output(s): • Production and dissemination of standardised reference metadata at both European and national level. • Training on the SIMS standard and the ESS Metadata Handler. • Organisation of the Standards Working Group.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
6	<p><b>[697] Statistical services to DGs</b>            Description: Manage the framework contract for external data acquisition. Manage the Eurostat Catalogue of Statistical Services.            Output(s): • Contribution to the rationalisation of external data purchases within the European Commission. • Availability of framework contracts.</p>	Process
6	<p><b>[707] Standardisation of ESS structural metadata (code lists) and alignment with the SDMX code lists</b>            Description: This process contains standardisation of code lists and their harmonisation with the Statistical Data and Metadata Exchange (SDMX) code lists and the dissemination code lists used in Eurobase.            Output(s): • Availability of standardised code lists. • Harmonisation of processes and coordination.</p>	Process
6	<p><b>[1020] Eurostat visual style guide *NEW*</b>            Description: Update of the Eurostat visual style guide to ensure coherence of Eurostat visuals and take into account new Commission requirements.            Output(s): • Improved coherence of Eurostat visuals across different platforms. • Improved accessibility of Eurostat visuals for users with disability, in line with Commission requirements. • Improved alignment with Commission visual identity. • Improved tools and skills available to Eurostat communication staff and contractors.</p>	Project (2021-2022)
6	<p><b>[412] Eurostat website</b>            Description: The website provides a stable access to Eurostat products and services, with enhancements for users. Evolutionary maintenance and quality assurance of the website, including purchases of hardware and software.            Output(s): • Make Eurostat website an attractive and easy source of information on European statistics for citizens. Ensure high availability, performance and continuous improvements of functionality, usability and web content. • The website will be completely revamped in line with the results of a benchmarking exercise in 2020 and following the revamping of the dedicated sections and Statistics Explained.</p>	Process
6	<p><b>[421] Publications</b>            Description: Widespread dissemination of Eurostat's high quality output through electronic and paper publications. Production, dissemination and stock management of statistical dissemination products, including the implementation of the annual publications programme.            Output(s): • Full range of publications oriented to users' needs, all available via the website. Editorial services offered to the production units.</p>	Process
6	<p><b>[504] Media relations</b>            Description: Press office activities such as preparation and dissemination of news releases, preparation and organisation of press briefings, visits and interviews, preparation of LTTs (lines to take), relations with the spokesperson service, maintaining networks of journalists and of press officers within the ESS.            Output(s): • Publication of euroindicator news releases in three languages. • Dissemination of other main data releases to journalists. • Press briefings, visits and interviews, if and when appropriate. • LTTs upon request. • Activity of networks: journalists, data journalists, prESSnet.</p>	Process
6	<p><b>[613] Face-to-face promotion of European statistics</b>            Description: Production and development of different communication and promotional tools about Eurostat and European statistics. Promotion of European statistics in events.            Output(s): • Production and dissemination of communication tools for representation of Eurostat in events. • Participation in international events and fairs to promote European statistics to users.</p>	Process
6	<p><b>[614] User support</b>            Description: Support for users from the EU institutions, the media and the public. Management of external user support network.            Output(s): • Answering user requests from media and the public. • Providing training on Eurostat and its data as required.</p>	Process
6	<p><b>[745] Continuous adaptation of dissemination products and services to user needs</b>            Description: Engage with users of European statistics in order to better identify their needs. Production of (shareable) visualisation tools/info graphics strengthening the user-orientation of Eurostat website. Development of dissemination products which enable users to obtain statistics on a range of mobile devices, including smartphones, tablets and e-readers.            Output(s): • Innovative shareable visualisation tools/info graphics on Eurostat website and dissemination products for mobile devices. • Release of digital publications.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
6	<p><b>[802] Promotion of European statistics through social media and What's new section</b>            Description: Editorial planning. Dissemination of Eurostat output via social media; relations with the Commission social media network and ESS social media officers. Coordination, editing and publishing What's new articles.            Output(s): • Weekly editorial calendar. • Regular dissemination of latest statistics via social media. • What's new articles on Eurostat website.</p>	Process
6	<p><b>[963] European Statistics Competition</b>            Description: Organisation of the annual European Statistics competition.            Output(s): • European Statistics competition.</p>	Process
6	<p><b>[Chatbot] Chatbot for user support</b>            Description: Development of chatbot (conversation software) for user support.            Output(s): • Chatbot for user support.</p>	Project (2021-2022)
6	<p><b>[ModernNews] Modernisation of news releases</b>            Description: Improve the production and design of news releases in order to ensure quality and security of the production and dissemination and to make the news releases more attractive to users, with innovative visualisation solutions.            Output(s): • Improved user friendly format of news releases. • Digital workspace for the production of news releases. • Automated production of drafts and dissemination.</p>	Project (2020-2022)
6	<p><b>[StatExpl] Statistics Explained</b>            Description: Maintenance, further development and content management (including translation) of the on-line dissemination system "Statistics Explained".            Output(s): • Wide range of explanatory information and analysis is continuously updated and delivered to users through an on-line dissemination system. • All articles are presented in a more visual and attractive way.</p>	Process
6	<p><b>[368] Maintain and further develop the quality management system of the European Statistical System</b>            Description: Maintain and further develop/enhance the quality management framework of the European Statistical System.            Output(s): • Continued reflections on a revised Single Integrated Metadata Structure following the first round of implementation of SIMS v2.0 (SIMS = Single Integrated Metadata Structure) taking account of the revised ESS Handbook on quality and metadata reports. • Continuously updated ESS Quality Glossary available, as appropriate. • Advices and positions on quality standards provided and published, as appropriate. • Proposals for further enhancing the quality framework collected from peer reviews.</p>	Process
6	<p><b>[375] Coordinate and communicate quality work in the ESS and ensure its governance</b>            Description: • Coordinate and communicate quality work in Eurostat through the Coordination Group Quality (internal Eurostat group). • Coordinate and communicate quality work in the ESS through the working group on quality in official statistics, the Directors of Methodology group, the European Statistical System Committee, the European Statistical System Task Force on peer reviews, the European Statistical Governance Advisory Board.            Output(s): • Quality matters and standards communicated and coordinated in Eurostat. • Quality matters and standards communicated and coordinated in the ESS. • Quality matters and activities reported to the ESSC, DIME/ITDG, ESGAB, as appropriate. • Work on peer reviews and communication on peer reviews coordinated in the ESS through the ESS Task Force on peer reviews. • Quality issues, standards and work, especially related to peer reviews communicated to other stakeholders, as required.</p>	Process
6	<p><b>[666] Implement the quality management system of the European Statistical System</b>            Description: Implementation, coordination and reporting on peer reviews, Implementation of Quality Reviews in Eurostat, Eurostat Error management procedure, Quality reporting in the ESS.            Output(s): • Implementation of a number of peer reviews within the third round of ESS peer reviews to assess the compliance with the CoP (Code of Practice) and identify improvement areas. • Peer reviews in the ESS coordinated and harmonised approach ensured. • Communication campaign on peer reviews supported in Member States through appropriate communication material. • Regular reporting on the implementation of peer reviews to the ESSC and other stakeholders ensured. • Training courses on how to implement peer reviews in the Member States held, if requested. • Quality Review reports for selected domains prepared and agreed. • Reporting on the implementation of quality reviews, including on horizontal issues provided. • Eurostat's Inventory of Error Reports produced. • Presentations, explanations, contributions provided, as appropriate. • Advices and positions on quality reporting provided and published, as appropriate.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
6	<p><b>[857] Promote the quality management system of the European Statistical System</b>            Description: Quality conferences, training courses, international cooperation, communication.            Output(s): • Q2022 conference prepared and successfully organised, reporting on the outcome prepared. • (Internal and external like ESTP) training courses and presentations on quality issues implemented. • Support and guidance on quality projects within statistical cooperation programmes provided. • Contributions to international cooperation/standards provided, as requested. • ESS quality frameworks, standards and initiatives promoted in the ESS and beyond, as feasible • The external Eurostat web pages and internal Cybernews Intranet maintained.</p>	Process
6	<p><b>[IND] Coordinating indicator work and developing conceptual approaches; development, coordination and commentary for the European Statistical Recovery Dashboard.</b>            Description: The Unit has responsibility for coordinating indicator work in Eurostat, in areas such as conceptual approaches and policy use of indicators. In particular this action includes the development and preparation of the European Statistical Recovery Dashboard.            Output(s): • Well-coordinated Eurostat approach to indicators and accompanying conceptual approaches developed as necessary. • Publication of the European Statistical Recovery Dashboard.</p>	Process
6, 7	<p><b>[SDCMA] Statistical confidentiality and microdata access</b>            Description: (1) Management and coordination of statistical confidentiality in Eurostat and within the European Statistical System (2) Methodological support on statistical disclosure control (3) Ensure smooth provision of access to European microdata for scientific purposes and (4) Improving access to European microdata.            Output(s): • Co-ordination of statistical confidentiality. • Support on statistical disclosure control provided. • Continuously improved access to microdata for researchers. • Provision of Public Use Files. • Running of the Microdata Access Network Group and the Expert Group on Statistical Disclosure Control. • Metadata (in the form of DSDs - data structure definitions) for some European microdata sets.</p>	Process
7	<p><b>[372] Enterprise Architecture</b>            Description: Integration and standardisation of EU statistics production processes and data management.            Output(s): • Reference architecture for Eurostat and related implementation roadmaps. • Support the business models for Trusted Smart Statistics. • Enterprise Architecture reviews of Eurostat IT projects for the IT Design Board.</p>	Process
7	<p><b>[901] Methodologies, frameworks and proofs-of-concept for the use of mobile network operator data</b>            Description: Development of methodological frameworks for extracting spatio-temporal statistics from mobile network operator data.            Output(s): • Proofs-of-concept for processing methodologies for population and tourism statistics. • Proofs-of-concept for privacy-enhancing technologies. • Methodological frameworks for the ESS on using MNO data.</p>	Project (2019-2023)
7	<p><b>[IES-T&amp;M] Innovation in European statistics: Traffic and Mobility Data *NEW*</b>            Description: The transport and mobility sector features several types of data, from various sources across all transport modes. The purpose of this project is to exploit available data sources in the transport sector that are fit for integration in the production of official statistics.            Output(s): • Launch of the beta version of the IT platform for data storage and processing.</p>	Project (2021-2023)
7	<p><b>[METHODOLOGY] Methodology in official statistics</b>            Description: Provide within Eurostat and to other DGs methodological expertise, user support and training to improve statistical production processes and quality of output, incl. through the methodological helpdesk and the methodological framework contract. Organisation of and secretariat to DIME/ITDG meetings. (DIME = Directors of Methodology Group, ITDG = Information Technologies Directors Group).            Output(s): • Methodological support provided within Eurostat, incl. results published in the Eurostat Statistical Working Paper collection and R codes shared where relevant. • Methodological support provided to other Commission DGs. • DIME/ITDG plenary and SG, Methodology Working Group meetings organised. • METAC (Methodology Advisory Committee), Eurostat methodological network organised. • Preparation of NTTS (New Techniques and Technologies for Statistics) 2023 conference.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
7	<p><b>[SA(CoE)] Centre of Excellence on statistical methods: Time Series, Seasonal Adjustment</b></p> <p>Description: Activities supporting time series analysis and the testing and the promotion of JDemetra+ (software for seasonal adjustment and time series analysis). User support, training and coaching of Seasonal Adjustment practitioners.</p> <p>Output(s): • Co-ordination of seasonal adjustment in the European Statistical System and with the European System of Central Banks. • Development specifications, testing and support for JDemetra+. • Release of JDemetra+ 3.0 version including plug-ins for benchmarking, high frequency data, analysis of revisions and R package. • Seasonal Adjustment Expert Group. • Running of the Centre of Excellence and its user group.</p>	Process
7	<p><b>[SDC(CoE)] Centre of Excellence on statistical methods: Statistical Disclosure Control</b></p> <p>Description: Development and maintenance of methodology for statistical disclosure control, incl. tools and methods for tabular and micro-data protection.</p> <p>Output(s): • Support, maintenance and development of statistical disclosure control tools. • Improving micro-data access opportunities for the research community. • Development and implementation of methods for the protection of microdata and tabular data. • Running of the ESS statistical disclosure control tools user group.</p>	Process
7	<p><b>[TSSSSH] Trusted Smart Statistics - Smart surveys hub</b></p> <p>Description: This project is to establish a smart surveys platform for the development and provision to Eurostat, the ESS and the European Commission of capabilities for conducting smart surveys and moving towards citizen statistics.</p> <p>Output(s): • European platform for implementing functions and services for NSIs focusing on diary-based surveys. • Solutions for processing the input personal data in a privacy-preserving fashion. • Incentives libraries and templates for promoting citizen engagement. • Quality improvements for diary-based surveys.</p>	Project (2019-2024)
7, 2	<p><b>[TSS-PET] PoC of a general-purpose privacy-preserving computation platform for processing confidential data across organisations *NEW*</b></p> <p>Description: This project aims at designing, building, deploying a minimum viable product, which is seen as an evolution towards a fully operational platform and that will enable to demonstrate and realise the value of privacy-preserving computation paradigm with ESS members and to their partners. The minimum viable product provides a combination of technological and organisational measures that enable to implement an end to end process with a minimal set of features providing immediate value to ESS members, i.e. the capability to implement usage scenario based on the privacy-preserving computation paradigm.</p> <p>Output(s): • IT infrastructure based on advanced technologies in the field of Secure Private Computing, • Organisational measures to achieve strong guarantees of computation security and full compliance with data protection legislation.</p>	Project (2021-2025)
7, 2	<p><b>[TSSWIH] Trusted Smart Statistics - Web intelligence hub</b></p> <p>Description: This project is to establish a Web Intelligence Hub for the development and provision to Eurostat and the ESS of fundamental building blocks for harvesting information from the web.</p> <p>Output(s): • Processes for web scraping and the use of APIs. • Conditions and agreements with trans-national players (platform owners, web aggregators etc.). • Portfolio of multi-purpose text processing and analytics services. • New statistical products based on methodological developments.</p>	Project (2019-2023)
7, 8	<p><b>[794] Trusted Smart Statistics</b></p> <p>Description: Development and implementation of infrastructure, skills, governance and access modalities for the use of new data sources in official statistics.</p> <p>Output(s): • Development and implementation of IT infrastructure strategy. • Development and implementation of strategy on access to new data. • Provision of data lab. • Development and implementation of governance for Trusted Smart Statistics in collaboration with MS, fostering the exploiting of synergies between EU and national level. • Communication and outreach activities. • Development and implementation of partnerships with external stakeholders.</p>	Project (2018-2027)
7, 8	<p><b>[ESTP] European Statistical Training Programme</b></p> <p>Description: Design and implementation of the European Statistical Training Programme (ESTP) in Member States, including programme coordination, contract management and follow-up of courses.</p> <p>Output(s): • Around 50 courses organised for European Statistical System (ESS) staff.</p>	Process
8	<p><b>[IO-manage] Coordinate international cooperation</b></p> <p>Description: Coordinate the implementation of Eurostat's external cooperation strategy. Manage and coordinate Eurostat's relations with international organisations and bodies (UN family, UN Regional commissions, OECD, ISI, WTO, IMF, FAO, CCSA).</p> <p>Output(s): • Management and coordination of relations, exchange of information, support to EU Delegations and other Commission services, participation in meetings, establishment of specific Administrative Arrangements, monitoring of the financial contribution.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
8	<p><b>[SPC] Manage the cooperation with the strategic partner countries in the statistical domain</b></p> <p>Description: Implementation of specific agreements and promote cooperation. This concerns countries on the American continent, Middle East, OECD countries outside of the EU, Russia, and the regional organisations such as GCC-Stat = Statistics Centre of the Gulf Cooperation Council and CIS-STAT = Statistical Committee of the Commonwealth of Independent States.</p> <p>Output(s): • Memoranda of Understanding and specific agreements, activities related to the implementation of roadmaps.</p>	Process
8	<p><b>[EMOS] European Master in Official Statistics</b></p> <p>Description: Implementation of European Master in Official Statistics (EMOS) in university Master programmes in collaboration with national statistical institutes.</p> <p>Output(s): • Implementation of EMOS labelling and development of the EMOS network: secretariat to the EMOS Board meetings, EMOS Workshop, cross-border learning activities such as webinars, study visits and traineeships.</p>	Process
8	<p><b>[405] Implement the SDMX standards and the related validation services in the European Statistical System (ESS)</b></p> <p>Description: • Implement the Statistical Data and Metadata Exchange (SDMX) standard for data exchange in statistical domains. • Implement SDMX-based corporate validation services in statistical domains. • Deliver trainings on the SDMX standards and related data exchange and validation tools. • Manage the structural metadata stored in the Euro SDMX Registry and in RAMON. • Collect feedback and formulate new user requirements for the evolution of the SDMX standard and the supporting IT tools.</p> <p>Output(s): • Implementation of SDMX and the related corporate validation services in statistical domains. • Training on the SDMX standard and the related corporate validation services.</p>	Process
8	<p><b>[409] Management and support of European Statistical System classifications and delivery of legal advice</b></p> <p>Description: • Produce, maintain and disseminate ESS horizontal classifications and related metadata in RAMON (Reference Architecture for Metadata Online - Eurostat's Metadata Server). • Ensure user support for classifications to the ESS, Commission services and professional organisations. • Support the legislation of statistical and technical standards in statistical domains.</p> <p>Output(s): • Standardisation services related to ESS classifications. • Contribution to the Standards Working Group. • Management of the Statistical Classification Task Force (sub-group of the ESS Standards Working Group). • Classification Fora. • Legal advice services related to ESS standards provided.</p>	Process
8	<p><b>[410] Provide input to the international work on statistical standards and metadata (UNECE, UNSD, SDMX)</b></p> <p>Description: Provide input and support to international work on statistical standardisation and metadata by active contribution to the Economic Commission for Europe of the United Nations (UNECE) MOS HLG Supporting Standards Working Group, active participation in the United Nations Statistics Division (UNSD) Expert Group on international statistical classifications and global Statistical Data and Metadata Exchange (SDMX). Latter includes efficient collaboration with the 7 international organisations, the sponsors of SDMX, in the SDMX secretariat and working groups.</p> <p>Output(s): • Events and services supporting international work on statistical standardisation and metadata. • SDMX: coordination of work while contributing to the secretariat and Sponsors committees, the implementation of the SDMX 2025 roadmap and development of a global capacity building concept. • UNECE: Contribution to the organisation and running of the ModernStats World Workshop on standards as Organising Committee member, contribution to the Task Teams maintaining the UNECE standards such as the Generic Statistical Business Process Model (GSBPM) and the Generic Statistical Information Model (GSIM) and to other thematic work.</p>	Process
8	<p><b>[NACEREV] NACE Review and legal implementation with impact assessment</b></p> <p>Description: Analyse requests for change from the different stakeholders and transform them in concrete proposals. Ensure keeping alignment with ISIC, the relevant international classification. Impact assessment of the new NACE. Preparation of legislation. Coordination of implementation of the new NACE.</p> <p>Output(s): • Database with needs for change in the present NACE. Draft revised classification with explanatory notes and introductory guidelines. Relevant correspondence tables. Revised legislation draft.</p>	Project (2019-2024)
8	<p><b>[CostAssess] Cost assessment - production of statistics in Eurostat and the European Statistical System</b></p> <p>Description: Plan and coordinate cost exercises to support priority setting in the ESS.</p> <p>Output(s): • Annual cost analysis of European statistics in the ESS for selected products. • Cost assessment survey of production of official statistics in the ESS (every three years).</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
8	<p><b>[DGINS] DGINS Conference</b>            Description: Organise the DGINS Conference, in collaboration with the host country.            Output(s): • Annual conference with host country.</p>	Process
8	<p><b>[EEA/EFTA] Manage the cooperation with EEA/EFTA countries and Switzerland in the statistical domain. Contribute to discussions regarding an Association Agreement with non-EU Small Western European countries.</b>            Description: Implement specific agreements and promote cooperation in the statistical domain. Contribute to discussions led by EEAS regarding an Association Agreement with non-EU Small Western European countries (in the field of statistics). (EEA = European Economic Area, EFTA = European Free Trade Association, EEAS = European External Action Service).            Output(s): • Memoranda of Understanding and specific agreements, activities related to the implementation of roadmaps.</p>	Process
8	<p><b>[ESGAB/ESAC] Provide the secretariat for ESGAB and ESAC</b>            Description: Provide the secretariat for the European Statistical Governance Advisory Board (ESGAB) and the European Statistical Advisory Committee (ESAC) and manage the relations with these advisory bodies.            Output(s): • Meetings / seminars and respective formal reports, as well as opinions of the advisory bodies. • Peer review of Eurostat by ESGAB.</p>	Process
8	<p><b>[IB-secr] Provide the secretariat for ESS governance bodies and committees</b>            Description: Provide the secretariat for the European Statistical System Committee (ESSC) and the Partnership Group (PG), High-Level Meetings (HLM), extraordinary DGs meetings, informal workshops of DGs and manage the relations with these ESS governance bodies.            Output(s): • Meetings and respective formal reports, opinions of the bodies.</p>	Process
8	<p><b>[230] Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries</b>            Description: Coordinate, design, contract, implement and follow-up cooperation programmes for the Enlargement countries to assist the alignment of their statistical production with the EU acquis.            Output(s): • 2019 IPA (Instrument for Pre-Accession Assistance) statistical cooperation programme implemented. • Contributions to the National IPA programmes provided to ensure that the programmes address relevant EU acquis and are well coordinated with regional cooperation programmes. • Memorandum of Understanding and corresponding annexed SLA (Service Level Agreement) with DG NEAR updated when necessary. • Semi-annual activity reports on IPA programmes provided to DG NEAR as required under the co-delegation of IPA programmes to Eurostat. • Terms of reference of the IPA 2022 statistics programme to be prepared.</p>	Process
8	<p><b>[233] Assess and monitor the statistical systems in the enlargement and European Neighbourhood Policy countries</b>            Description: Monitor the statistical systems in the Enlargement and European Neighbourhood Policy (ENP) countries using different assessment instruments (global assessments (GA), peer reviews (PR), sector reviews, Eurostat annual programming missions).            Output(s): • Assessment reports from GAs and PRs are available for selected enlargement and ENP countries. • Mission reports available for the visited countries. • Sector assessment reports for chosen statistical domains are available for selected enlargement and ENP countries. • Assessments in the EECCA (Eastern Europe, Caucasus and Central Asia) countries and for peer reviews in the enlargement countries are implemented.</p>	Process
8	<p><b>[234] Coordination of statistical cooperation</b>            Description: Support and promote coordination of statistical cooperation activities for the enlargement and European Neighbourhood Policy (ENP) and Central Asia countries through donor coordination, organisation of meetings on statistical cooperation.            Output(s): • Annual donor coordination survey for the enlargement, European Neighbourhood Policy East and South and Central Asian countries implemented and results presented to the Management Group on Statistical Cooperation. • Expert group meeting on statistical cooperation (MGSC) successfully held and key decisions on cooperation taken.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
8	<p><b>[236] Support the EU enlargement policy</b>            Description: Support the EU enlargement policy through participation in sub-committee meetings under the Stabilisation and Association / European Agreements, following-up on commitments on chapter 18 from the negotiation process, contributing to the annual EU reports on the enlargement countries.            Output(s): • Input to sub-committees provided and meetings attended. • Input to the annual EU reports on the enlargement countries including the statistical annex provided to DG NEAR. • Negotiations on the statistics chapter with candidate countries pursued. • Bilateral meetings on chapter 18 with Albania and North Macedonia (once the negotiations are opened by the Council); draft negotiation positions including definition of benchmarks in chapter 18.</p>	Process
8	<p><b>[250] Support the implementation of the EU's European Neighbourhood Policy, Eastern Partnership and policy towards Central Asia</b>            Description: Support the implementation of the EU's European Neighbourhood Policy (ENP), Eastern Partnership (EaP) and Central Asia policy through input to relevant documents, participation in relevant meetings and promotion of the importance of statistics for evidence-based decision making for European policies (design and monitoring).            Output(s): • Advice on statistical matters provided to EEAS, NEAR and other EC services. • Statistics included in relevant policy documents. • Input provided to EC meetings with partner countries (such as association councils, association committees and economic dialogues) and relevant meetings attended. • Statistical data for policy purposes provided through the Eurostat data collection contract for ELARG and ENP countries.</p>	Process
8	<p><b>[251] Support to other Commission services on cooperation programmes with relevance for statistics</b>            Description: Support the planning, design, programming, implementation and evaluation of regional or bilateral cooperation programmes/projects through provision of technical advice on statistical matters for the ENP.            Output(s): • Technical advice on statistics and statistical cooperation provided to EEAS, NEAR and other relevant EC services with regard to regional programmes (STEP, MEDSTAT). • Input provided to relevant documents. • Evaluations of the programmes implemented.</p>	Process
8	<p><b>[252] Support to other Commission services in the design and implementation of cooperation programmes with relevance for statistics in non-EU countries</b>            Description: Support the design and implementation of cooperation programmes through provision of technical advice on statistical matters.            Output(s): • Technical advice to the EC, EEAS and EU Delegations on statistical cooperation with Africa provided.</p>	Process
8	<p><b>[256] Support to production and dissemination of statistics</b>            Description: Support the increased utilisation of statistical and cooperation tools by NSIs and organisations providing technical assistance (donors) through promotion, training, user-friendly dissemination and the visibility of statistics on non-EU third countries and regions through the website and publications.            Output(s): • Training on Eurostat cooperation tools implemented. • Training on Eurostat IT tools implemented.</p>	Process
8	<p><b>[263] Support third countries and their regional organisations to implement their policies and strategies</b>            Description: Support the strengthening of the statistical systems in third countries and their regional organisations through capacity building measures, provision of advice and the promotion of regional models of working like the European Statistical System (ESS).            Output(s): • Regional cooperation promoted and facilitated, by sharing experiences of the ESS model of working. • Statistical capacity of the African Union Statistics Division (Statafric) strengthened.</p>	Process
8	<p><b>[660] Information on European standards in statistics</b>            Description: Collect information on legal acts, data requirements and methodology for the entire statistical acquis. Prepare for launching, processing, finalising and monitoring the compliance of the statistical systems of enlargement countries with EU statistical acquis.            Output(s): • Statistical Requirements Compendium updated. • Reports on compliance evaluation produced annually for each enlargement country.</p>	Process
8	<p><b>[661] Statistical cooperation programmes/projects for ENP regions and Central Asia</b>            Description: Design, contract and implement statistical cooperation programmes and projects for the ENP regions and Central Asia to strengthen the partner countries capacity to develop, produce and disseminate reliable and comparable statistics in line with European and international norms and standards.            Output(s): • Co-delegated large-scale regional programmes (STEP, MEDSTAT) for the ENP countries planned, designed, contracted and implemented. • Smaller scale Eurostat-budget statistical cooperation projects for ENP regions and Central Asia planned, designed, contracted and implemented.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
8	<p><b>[662] Management of high level seminars and meetings with the enlargement and European Neighbourhood Policy countries to promote strategic discussions</b>            Description: Organisation and management of high level meetings and seminars for the enlargement and European Neighbourhood Policy (ENP) countries to stimulate strategic discussions, promotion of European Statistical System initiatives and increased availability of good quality data.            Output(s): • FORUM meeting for the ENP South countries successfully held with key management and cooperation issues decided. • High level seminars for the ENP East and Central Asia countries successfully held with key management and cooperation issues decided. • Policy Group meeting (PGSC) organised and strategic conclusions defined for the enlargement countries.</p>	Process
8	<p><b>[732] Implementation of the PAS II service contract</b>            Description: Implement and follow up the Pan African Statistics (PAS II) service contract and coordinate its activities with the five other PAS II components.            Output(s): • Smooth implementation of the PAS II contract ensured. • Consistency with activities done by other PAS II components. • Requests from DG INTPA met on time. • African Trade Yearbook. • Statistical methodological manuals and guidelines in the fields of national accounts and trade.</p>	Process
8	<p><b>[CPC-ENP] Statistics on enlargement (candidate countries and potential candidates) and ENP countries</b>            Description: Collection of statistical data from the European Neighbourhood Policy (ENP) countries and some selected indicators from enlargement countries. Production of statistical annexes to the EU reports on the enlargement policy. Production of fact sheets and articles in Statistics Explained.            Product(s): • [CPC-ENP] Enlargement and ENP-East and ENP-South countries.            Other output(s): • Public website on cooperation issues updated. • Data available in Eurobase for ENP countries and enlargement countries. • Electronic publications in Statistics Explained as well as fact sheets available for enlargement and ENP countries.</p>	Process
8	<p><b>[671] Committee on Monetary, Financial and Balance of Payments Statistics and ESF activities</b>            Description: Assist in drawing up and implementing work programmes on monetary, financial and balance of payments statistics; offer opinions in these areas and other areas of economic statistics, in particular national accounts; advise on statistical issues related to Excessive Deficit Procedure co-ordinate work of statisticians from National Statistical Institutes and Eurostat together with National Central Banks and the European Central Bank (ECB-DG Statistics); implement cross-cutting issues adopted in the work-programmes of the European Statistical Forum. Manage and coordinate Eurostat's relations with the European System of Central Banks and implement the Memorandum of Understanding between the European Statistical System and European System of Central Banks.            Output(s): • Organisation and participation in the meetings of the CMFB Executive body and CMFB plenary meetings. • Organisation of ESF meetings.</p>	Process
8	<p><b>[228] Support the development of the statistical system in Greece through the provision of technical assistance in national accounts (GNI) and public finance statistics</b>            Description: Support the development of the statistical system in Greece through the organisation and management of technical assistance activities in the areas of public finance statistics, national accounts (GNI) and project management.            Output(s): • Quality of Greek statistical data improved.</p>	Project (2010-2023)
8	<p><b>[Eurotrace] Eurotrace basic (corrective) maintenance</b>            Description: Basic (corrective) maintenance of Eurotrace, an open source statistical software for statistical data treatment and management, currently used by two Member States (Cyprus and Malta) and around 100 non EU countries, including EU Candidate Countries.            Output(s): • Basic maintenance of the Eurotrace open source software.</p>	Process
8, 6	<p><b>[RESEARCH] Research and innovation in official statistics</b>            Description: (1) Support and promote research in official statistics. (2) Develop/support the research lines related to Official Statistics in the Horizon 2020 work programmes. (3) Dissemination modernisation and research project results. (4) Support to collaboration between researchers and official statisticians.            Output(s): • Experimental statistics disseminated. • Support and maintenance for CROS (Collaboration in Research and Methodology for Official Statistics). • Support to research projects on official statistics.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
9(SP)	<p><b>[379] IT Coordination and Management</b></p> <p>Description: Eurostat IT Resource Manager (IRM) for IT Infrastructure. Coordination of relations with DIGIT, organize and chair the internal IT Advisory Committee regular meetings, participate to EC IT Governance meetings, representing Eurostat IRM. Coordinate the preparation of the annual IT Planning process. Management of the Global Memorandum of Understanding (GMOU) with DIGIT which includes all services provided from DIGIT to Eurostat.</p> <p>Output(s): • Governance of IT services across DIGIT and local IT, overall service level management across IT providers. Updated Global MoU DIGIT/Eurostat. • Coordination of annexes to that GMOU. • Reduced financial transfer. • Harmonised charge-back process with DIGIT. • Centralised management of related budget in the unit.</p>	Process
9(SP)	<p><b>[381] Workplace Services management</b></p> <p>Description: Manage Workplace services delivered to ESTAT by DIGIT. Includes provisioning of hardware and software and the 2nd level user support. Includes IT Training coordinator function (ROFI). Coordinate with DIGIT or other IT Service Providers to ensure required Quality of Service is delivered to Eurostat.</p> <p>Output(s): • Regular SLA / Service reviews with service providers. • Client satisfaction surveys and related service improvement plans. • Management of software's licenses for Eurostat specific software (client and server). It includes all licenses for other Units previously financed with their operational budget. • Proper management of hardware used by end-users. This includes the timely provisioning of PCs/laptops to Eurostat staff and the correct inventory of equipment. • Provide 2nd level support for "office automation environment" and ITIC service level management.</p>	Process
9(SP)	<p><b>[795] IT Client Engagement</b></p> <p>Description: Coordinate IT engagement with all units and ensure business plans are correctly reflected in IT plans.</p> <p>Output(s): • User satisfaction feedback on overall IT services. • Alignment of business projects with IT projects. • Regular engagement with Units to collect their feedback on quality of IT services and to collect additional business requirements that need IT support. • Organisation of bilateral meetings on Director level with the business.</p>	Process
9(SP)	<p><b>[797] IT Governance and Project management</b></p> <p>Description: Ensure proper definition and implementation of the IT Governance process in Eurostat. Provide and support tools and dashboards for Eurostat projects, including the maintenance of the IT project repository. Ensure proper coverage of the role of IT Portfolio Manager, including GOVIS updates.</p> <p>Output(s): • Up-to-date IT Strategy document and IT plan; periodic and ad hoc reports. • Up-to-date IT Governance in Eurostat process description. • Coordination of ITAC and ITDB activities, including preparatory documents and reports. • Support for project managers for IT projects. • Up-to-date IT project repository. • Contract management for ESTAT IT Framework Contract.</p>	Process
9(SP)	<p><b>[ITHOSTINGESTAT] IT Hosting management and implementation</b></p> <p>Description: Manage Hosting and Cloud services delivered to ESTAT by DIGIT. Includes coordination of different activities with ESTAT units using the Hosting services provided by DIGIT and the coordination for external on the cloud activities.</p> <p>Output(s): • Regular Service Level Agreement / Service reviews with service providers. • Support and maintenance of ESTAT's secure environment. • Provision of middleware services required by Eurostat and not included in the catalogue of services provided by DIGIT. • Management and monitoring of the hosting costs at Eurostat, including process for regularly identifying opportunities for rationalisation. • Provision of infrastructure management for cloud based infrastructures.</p>	Process
9(SP)	<p><b>[ITSEC-ESS] Coordination of different activities around IT security in the ESS</b></p> <p>Description: Coordinate and follow-up of the process to ensure continuation of the IT security assurance mechanism in the European Statistical System (ESS). Define and put in place with ESS members IT security standards in order to ensure secure and reliable exchange of confidential information. Put in place a decision body related to IT security related issues within the ESS. Support business units in the classification of the information exchanged with the ESS.</p> <p>Output(s): • Follow-up actions related with the IT Security assurance project. • Management of the Expert Group on ESS IT security for elaborating and monitoring security aspects of information (data, email, micro-data, documentation) exchange in the ESS. • Implementation and communication about the common IT security standards for Information exchange. Documentation of ESS hardware and software architectures for security purposes in order to cope with the diversity of the ESS environments. • Security plans for the different applications used for exchanging and processing data with the ESS Members.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
9(SP)	<p><b>[ITSEC-MGT] IT and Information security management</b></p> <p>Description: Follow-up of Eurostat information security policy. Coordinate implementation of security standards in ESTAT, in close relationship with DG HR/DS and DIGIT. Liaison with DIGIT CSIRC (Computer Security Incident Response Capability) for detection of vulnerabilities, reporting on security incident, monitoring, follow-up and provision of recommendations for improving security of Information Systems. Ensure access to confidential data for researchers either through the Eurostat Safe Centre or through the development of a secured remote access facility. Create and maintain an inventory of sensitive/classified information and responsible persons at Eurostat level and related activities. Feedback and advice to Eurostat IT units on protection measures. Management of the S drive. Ensure Eurostat staff and contractors sign the confidentiality agreement.</p> <p>Output(s): • Awareness campaigns on security matters to Eurostat staff. • Management and update of Eurostat information security policy. Report on security standards implementation. Development of security notices for the policy implementation. • Management of access rights, encryption mechanisms and passwords for the following applications: SECEM, RUE, LANCRYPT, NOAH, WINPT/WINPG, security conventions, tokens, specific access rights. • Monitoring and improvement of security of IT systems, screening and checking of BIA (business impact assessment) and security plans. • Follow-up of security of Eurostat environment hosted in DIGIT using ArcSight. • Management of Eurostat Safe Centre: Usage report. • Secure distribution of SUF (scientific use files) to researchers. • Yearly list of sensitive and classified information in Eurostat with DCROs (data collection responsible officer). • Protection measures for Eurostat sensitive information. • List of signed confidentiality agreements. • List of intramuros, extramuros and proximity times and means authorised to enter the BECH building and monitoring. • Manage Oriana accesses (app for requesting access badges).</p>	Process
9(SP)	<p><b>[201] Eurostat control strategy for budget implementation including anti-fraud actions</b></p> <p>Description: The process covers the design and the implementation of the Eurostat control strategy for budget implementation, aiming to provide an adequate set of controls related to Eurostat's financial transactions in order to achieve the control objectives. The strategy covers all control-related activities linked to Eurostat's financial transactions for all types of expenditure managed by Eurostat, ensuring compliance with the requirements regarding legality and regularity of transactions.</p> <p>Output(s): • Annual or multi-annual control programme(s) implemented in compliance with objectives set, in order to prevent, detect and correct errors and irregularities of Eurostat's financial transactions. • Performance of controls taking due account of cost-efficiency and effectiveness considerations. • Error rates of ex post controls for grant transactions. • Number of control failures for procurement transactions. • Number of exceptions and non-compliance events regarding procurement transactions. • Application of corrective measures and dissuasive penalties. • Strengthen Eurostat's anti-fraud capacities and awareness as part of the Commission anti-fraud culture.</p>	Process
9(SP)	<p><b>[EGR+IPT] EGR and IPT support and evolutive maintenance</b></p> <p>Description: Support and evolutive maintenance of the applications of the Euro Group Register (EGR) and the Interactive Profiling Tool (IPT).</p> <p>Output(s): • Evolutive maintenance of all EGR and IPT subsystems.</p>	Process
9(SP)	<p><b>[IT4diss] IT for dissemination of data and metadata</b></p> <p>Description: Maintenance and support of Information Systems for the dissemination of data and metadata - for Eurostat, and for potential sharing in the European Statistical System.</p> <p>Output(s): • Dissemination chain for reference data: support, and corrective and evolutionary maintenance. • COMEXT (Eurostat reference database for external trade statistics production, dissemination and energy statistics).</p>	Process
9(SP)	<p><b>[IT4exchange] IT for data exchange</b></p> <p>Description: Maintenance and support of Information Systems for the exchange of data and metadata in the European Statistical System, including the MDE system for the exchange of microdata and customs data.</p> <p>Output(s): • eDAMIS (Electronic Data files Administration and Management Information System): support, and corrective and evolutionary maintenance. • Modifications on the current IT system for microdata exchange (MDE) to accommodate the new requirements for a full production system. • Modifications on the current IT system for microdata exchange (MDE) to accommodate the exchange of customs data to implement the Customs Data Exchange (CDE) linked to the ITGS2 project. • Census Hub 2021.</p>	Process

SMP heading code	Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)	Project/ Process
9(SP)	<p><b>[IT4metadata] Metadata and standards - tools and services</b>            Description: Maintenance, support and development of tools and services for metadata.            Output(s): • SDMX (Statistical Data and Metadata Exchange) tools: support, and corrective and evolutionary maintenance. • Participation in international activities related to SDMX, in particular representing Eurostat in the SDMX Technical Working Group. • SDMX tools Task Force. • Census hub: support, and corrective and evolutionary maintenance, and information of Member States. • ESS-MH (Metadata Handler): support, and corrective and evolutionary maintenance, including improvements in interoperability with national metadata system.</p>	Process
9(SP)	<p><b>[IT4prod] IT for statistical production - Support and corrective maintenance</b>            Description: Maintenance and support for production chains.            Output(s): • Information systems for statistical production: support and corrective maintenance.</p>	Process
9(SP)	<p><b>[ITcorp] Corporate information systems and tools for statistical production</b>            Description: Maintenance and development of tools for data processing.            Output(s): • Information System for Statistics (IS4STAT), Multi-dimensional tables (MDT), FAME (Statistical production system specialised in processing time series) interfaces. • Jdemetra+ connection to FAME. • FAME tools. • Data virtualization tools. • Validation tools developments. Web-services and IT architecture governance.</p>	Process
9(SP)	<p><b>[ITdev4prod] IT for statistical production – Implementations (projects &amp; evolutionary maintenance)</b>            Description: Implementation and evolutions of production chains using corporate IT tools.            Output(s): New implementations or continuation of on-going implementation projects like: • Energy statistics information system. • PS<sup>2</sup> project. • Migration of "local" production chains towards corporate solutions. • Evolutionary maintenance in existing domains. • Implementation of Reference IT Architecture.</p>	Process
9(SP)	<p><b>[NAPS-III(IT)] Extension of NAPS project - IT part</b>            Description: The goal of this project is to cover different work packages related to the national accounts domain, including consolidation of processing tools, creation of revisions databases and extension of the quality report.            Output(s): • Module A (REGACC) and Module B (NFSA) - concluded. • Module C (Adjustments System) - concluded. • Module B (NAMA), Module D (Revision Databases) and Module E (Consolidation Environment) - work is on-going.</p>	Project (2018-2022)
9(SP)	<p><b>[406] Provide user services for EDAMIS</b>            Description: • Provide first level support for EDAMIS, Eurostat's Single Entry Point for data, to Eurostat and ESS users. • Provide capacity building and user support for EDAMIS. • Collect feedback and formulate new user requirements for the evolution of EDAMIS.            Output(s): • Guidelines, training and end-user support for EDAMIS. • Organisation of the Data Transmission Coordination Group (DTCG).</p>	Process
9(SP)	<p><b>[PMF] Process management framework</b>            Description: Maintenance of Eurostat's process management framework.            Output(s): • Support to Eurostat staff in the description of Eurostat processes. • Maintenance of central process description repository.</p>	Process
9(SP)	<p><b>[TSI] Technical Support Instrument</b>            Description: Coordinate the work on the annual TSI and liaise with DG REFORM.            Output(s): • Collect Eurostat's input on MS requests and submit to DG REFORM (email).</p>	Process
9(SP)	<p><b>[OS] Coordination of development of "other statistics" within the Commission</b>            Description: Coordinate the development of "other statistics" and ensure cooperation and regular dialogue with DGs as stated in the Commission Decision on Eurostat. Support the Commission actions relating to data, information and knowledge management and performance frameworks. Steering of the Statistical Correspondents Network.            Output(s): • Annual update of the inventory of other statistics. • Actions relating to data, information and knowledge management and performance frameworks.</p>	Process
9(SP)	<p><b>[BusArc] Business Architect in macroeconomic statistics</b>            Description: Coordinate and deliver modernisation projects in the production environment of macroeconomic statistics.            Output(s): • Analysis and optimisation of the business functions. • Support to production units to develop and implement modernisation projects in the production environment.</p>	Process

<b>SMP heading code</b>	<b>Activities: [code] title, description, statistical products and/or other outputs, plus the flag *NEW* (when applicable)</b>	<b>Project/ Process</b>
9(SP), 8	<b>[SPP] Strategic Planning and Programming</b> Description: Formulate and review Eurostat's multiannual priorities. Coordinate the work on the priority-setting mechanism in the ESS. Output(s): • ESP multiannual action plan (MAP). • Coordinate work on reviews.	Process
