## eurostat newsrelease euroindicators

Third quarter of 2014

# Business investment rate nearly stable at 21.7\% in the euro area and $22.0 \%$ in the EU28 

Business profit share nearly stable at $38.7 \%$ in euro area and stable at 38.4\% in EU28

## Announcement

As part of the process of improving timeliness, from April 2015 onwards the business News Release of European sector accounts will be issued earlier (at around $t+102$ days) focussing on selected euro area non-financial transactions. The complete set of sectoral data will be updated (at +120 days) in the dedicated section of the Eurostat website.

In the third quarter of 2014, the business investment rate ${ }^{1}$ was $21.7 \%$ in the euro area ${ }^{2}$, compared with 21.6 in the second quarter of $2014^{3}$. This was the result of an increase in both investment ( $+1.1 \%$ ) and gross value added (+0.7\%). Total stocks (materials, supplies and finished goods) fell.

In the EU28 ${ }^{4}$ the investment rate was $22.0 \%$ in the third quarter of 2014 , compared with $21.9 \%$ in the previous quarter.

These data come from a detailed set of seasonally adjusted ${ }^{5}$ quarterly European sector accounts ${ }^{6}$ released by Eurostat, the statistical office of the European Union, and the European Central Bank (ECB).

Investment rate of non-financial corporations (seasonally adjusted)

## Business profit stable in the EU28, nearly stable in the euro area

In the EU28 the business profit share ${ }^{7}$ was $38.4 \%$ in the third quarter of 2014, stable compared with the second quarter of 2014. In the euro area the profit share was $38.7 \%$ in the third quarter, compared with $38.8 \%$ in the previous quarter.

Profit share of non-financial corporations (seasonally adjusted)

The profit share was nearly stable in the euro area as compensation of employees (wages and social contributions) plus taxes less subsidies on production increased at the same pace as value added (+0.7\%).

Nominal growth of components of the investment rate and the profit share (euro area)
(seasonally adjusted data, change compared with the previous quarter)

1. The gross investment rate of non-financial corporations is defined as gross fixed capital formation divided by gross value added. This ratio relates the investment of non-financial businesses in fixed assets (buildings, machinery etc.) to the value added created during the production process.
2. Until 31 December 2014 the euro area (EA18) consisted of 18 Member States: Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland, plus the European Central Bank and European Stability Mechanism. From 1 January 2015 the euro area (EA19) also includes Lithuania.
As part of Eurostat's guidelines for the dissemination of data when the euro area is enlarged, the aggregate data series commented on in this News Release refer to the official composition in the most recent quarter for which data are available. Thus News Releases with data for quarters up to the fourth quarter of 2014 comment on EA18 series, while Releases with data for the first quarter of 2015 onwards will comment on EA19 series. Data for EA19 will be published in July 2015 (first release of sector accounts for the first quarter of 2015).
Eurostat's guidelines can be found on the Eurostat website:
http://ec.europa.eu/eurostat/en/web/products-eurostat-news/-/GUIDE ENLARG 2007
3. Compared with News Release 13/2015 of 20 January 2015, the business investment rate remains unchanged whereas business profit share for the third quarter of 2014 has been revised from $38.8 \%$ to $38.7 \%$ in the euro area. Compared with News Release 163/2014 of 27 October 2014 the business investment rate for the second quarter of 2014 remains unchanged in both the euro area and the EU28. The business profit share has been revised from $38.4 \%$ to $38.8 \%$ in the euro area and form $38.2 \%$ to $38.4 \%$ in the EU28.
4. The European Union (EU28) consists of 28 Member States: Belgium, Bulgaria, the Czech Republic, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom, plus the EU institutions.
5. Seasonal adjustment has been performed using the Tramo-Seats method. The seasonally adjusted series are built up indirectly as the sum of seasonally adjusted components.
6. The compilation of the European sector accounts follows the European System of Accounts 2010 (ESA2010) and covers the period from the first quarter of 1999 to the third quarter of 2014.
Institutional sectors bring together economic units with broadly similar characteristics and behaviour, namely: households (including non-profit institutions serving households), non-financial corporations, financial corporations, government and the rest of the world. In the latter to measure the external transactions of the euro area / EU, it is necessary to remove crossborder flows within the area concerned.
The ECB and Eurostat publish integrated non-financial and financial accounts, including financial balance sheets, for the euro area. Eurostat also publishes the non-financial accounts of the European Union.
Eurostat's website includes detailed annual sector accounts by country and derived key indicators, which also include the indicators that combine non-financial and financial accounts such as additional profitability indicators.
The full set of quarterly sector accounts is published for euro area / EU aggregates only. However, some of the Member States' selective data are available in the Eurostat database and a subset of quarterly key indicators is published around 102 days after each quarter at http://ec.europa.eu/eurostat/sectoraccounts (see "Quarterly data") for 15 out of the 18 members of the European Economic Area (EEA) whose GDP is above $1 \%$ of the EU total, subject to availability. The other 13 EEA members, whose GDP is below $1 \%$ of the EU total, do not have to transmit the quarterly accounts of corporations to Eurostat.
General information on European sector accounts compilation is given in the metadata file available at http://ec.europa.eu/eurostat/cache/metadata/en/nasq 10 nf tr esms.htm
For detailed data and methodology, please see Eurostat's website at: http://ec.europa.eu/eurostat/sectoraccounts and ECB's website at: http://www.ecb.eu/stats/acc/html/index.en.html.
7. The profit share of non-financial corporations is defined as gross operating surplus divided by gross value added. This profitability-type indicator shows the share of the value added created during the production process remunerating capital. It is the complement of the share of wage costs (plus taxes less subsidies on production) in value added.
