

15 May 2015: International Day of Families

## Women in the EU gave birth to their first child at almost 29 years of age on average

In 2013, a majority (51.2%) of women in the **European Union (EU)** gave birth<sup>1</sup> to their first child when aged in their 20s, while 40.6% became mothers in their 30s. In addition, more than 127 000 births of first children in the EU in 2013 were to women aged less than 20 (teenage mothers) and around 65 500 to women aged 40 and over. On average, women in the **EU** were 28.7 years old when they became mothers for the first time.

Among the 5.1 million births in the **EU** in 2013, nearly 1 in 5 (or more than 880 000) concerned a third or subsequent child.

On the occasion of the International Day of Families<sup>2</sup> on 15 May 2015, **Eurostat, the statistical office of the European Union**, publishes a selection of demographic data<sup>3</sup> related to families in the EU.

Denmark: 2012 data instead of 2013.

### First time mothers youngest in Bulgaria and Romania, oldest in Italy and Spain

In 2013, the mean age of mothers at the birth of their first child varied significantly between the **EU** Member States, with a gap of almost five years between the youngest and the oldest. The youngest average ages of mothers at the birth of their first child were recorded in **Bulgaria** (25.7 years), **Romania** (25.8), **Latvia** (26.1), **Estonia** (26.5), **Poland** and **Lithuania** (both 26.7) and **Slovakia** (26.9). Conversely, women were oldest on average when giving birth to their first child in **Italy** (30.6 years), followed by **Spain** (30.4), **Luxembourg** (30.0) and **Greece** (29.9).

## Around 15% of first children born to teenage mothers in Bulgaria and Romania

The highest shares of births of first children to teenage mothers were recorded in **Romania** (15.6% of total births of first children in 2013), **Bulgaria** (14.7%) and **Hungary** (11.0%), ahead of **Slovakia** (9.9%), **Latvia** (9.1%) and the **United Kingdom** (8.2%). On the other hand, the lowest shares were observed in **Italy** (1.8%), **Slovenia** (1.9%), the **Netherlands** (2.2%), **Luxembourg** and **Cyprus** (both 2.4%).

At the opposite end of the age range, the highest proportions of births of first children in 2013 to women aged 40 and over were registered in **Italy** (6.1% of total births of first children in 2013), **Spain** (5.1%), **Greece** (4.1%), **Luxembourg** (3.8%) and **Ireland** (3.4%). In contrast, shares of less than 1% were recorded in **Poland** and **Slovakia** (both 0.7%) and **Lithuania** (0.9%).

In 2013, more than half of the women giving birth for the first time were aged in their 20s in a large majority of the EU Member States. Notable exceptions were to be found in the following Member States where the majority of first births were to mothers aged in their 30s: **Spain** (59.4% of births of first children concerned women aged 30-39), **Italy** (54.1%), **Ireland** (52.7%) and **Greece** (51.9%).

### Share of live births of first children by mother's age in the EU Member States, 2013

	Total first births	Proportions by age group				Mean age of women at birth of first child
