

Europe 2020 education indicators in 2016

# Ever greater share of persons aged 30 to 34 with tertiary educational attainment in the EU...

## ... and ever fewer early leavers from education and training

The share of persons aged 30 to 34 in the **European Union** (EU) who have completed tertiary education continued to steadily increase, from 23.6% in 2002 when the series started to 39.1% in 2016. This pattern was even more significant for women (from 24.5% in 2002 to 43.9% in 2016, meaning above the overall Europe 2020 target) than for men (from 22.6% to 34.4%, meaning still below the overall Europe 2020 target). The Europe 2020 strategy's target is that at least 40% of 30-34-year-olds in the **EU** should have completed tertiary education by 2020.

**Share of population aged 30 to 34 in the EU having completed tertiary education**

Meanwhile, the share of early leavers from education and training (aged 18-24) has steadily decreased in the **EU**, from 17.0% in 2002 to 10.7% in 2016. Young women (9.2% in 2016) are less affected than young men (12.2%). The Europe 2020 target is to reduce the rates of early school leaving in the **EU** to below 10% by 2020.

**Share of early leavers from education and training in the EU**

Today, **Eurostat, the statistical office of the European Union**, publishes the most recent data for the EU and its Member States on achievement against the two Europe 2020 education headline targets.

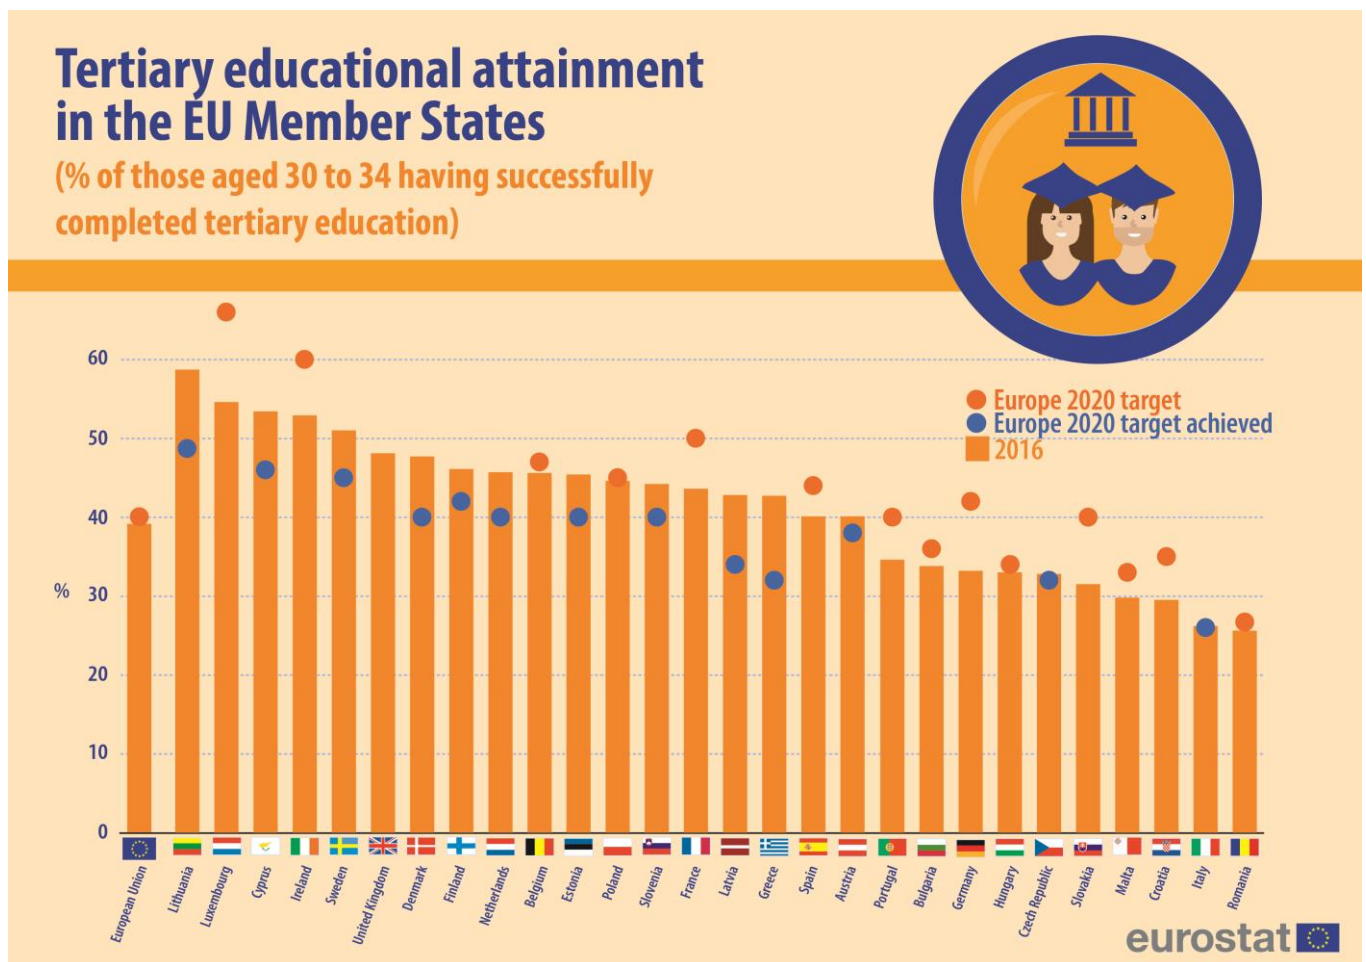

## Highest share of those aged 30-34 with tertiary education in Lithuania, lowest in Romania and Italy

In 2016, the proportion of those aged 30 to 34 who had completed tertiary education increased compared with 2002 in every Member State for which the time-series is available.

In 2016, at least half of the population aged 30 to 34 had completed tertiary education in **Lithuania** (58.7%), **Luxembourg** (54.6%), **Cyprus** (53.4%), **Ireland** (52.9%) as well as **Sweden** (51.0%). At the opposite end of the scale, the lowest proportions were observed in **Romania** (25.6%), **Italy** (26.2%), **Croatia** (29.5%) and **Malta** (29.8%).

Thirteen Member States have already met or exceeded their 2020 national target for this indicator: the **Czech Republic, Denmark, Estonia, Greece, Italy, Cyprus, Latvia, Lithuania, the Netherlands, Austria, Slovenia, Finland** and **Sweden**.

In 2016, the share of persons aged 30 to 34 who have completed tertiary education is significantly higher for women than men in all Member States, except **Germany**.

No national target for the United Kingdom.

The national target for Germany includes post-secondary non-tertiary education (International Standard Classification of Education 1997 level 4).

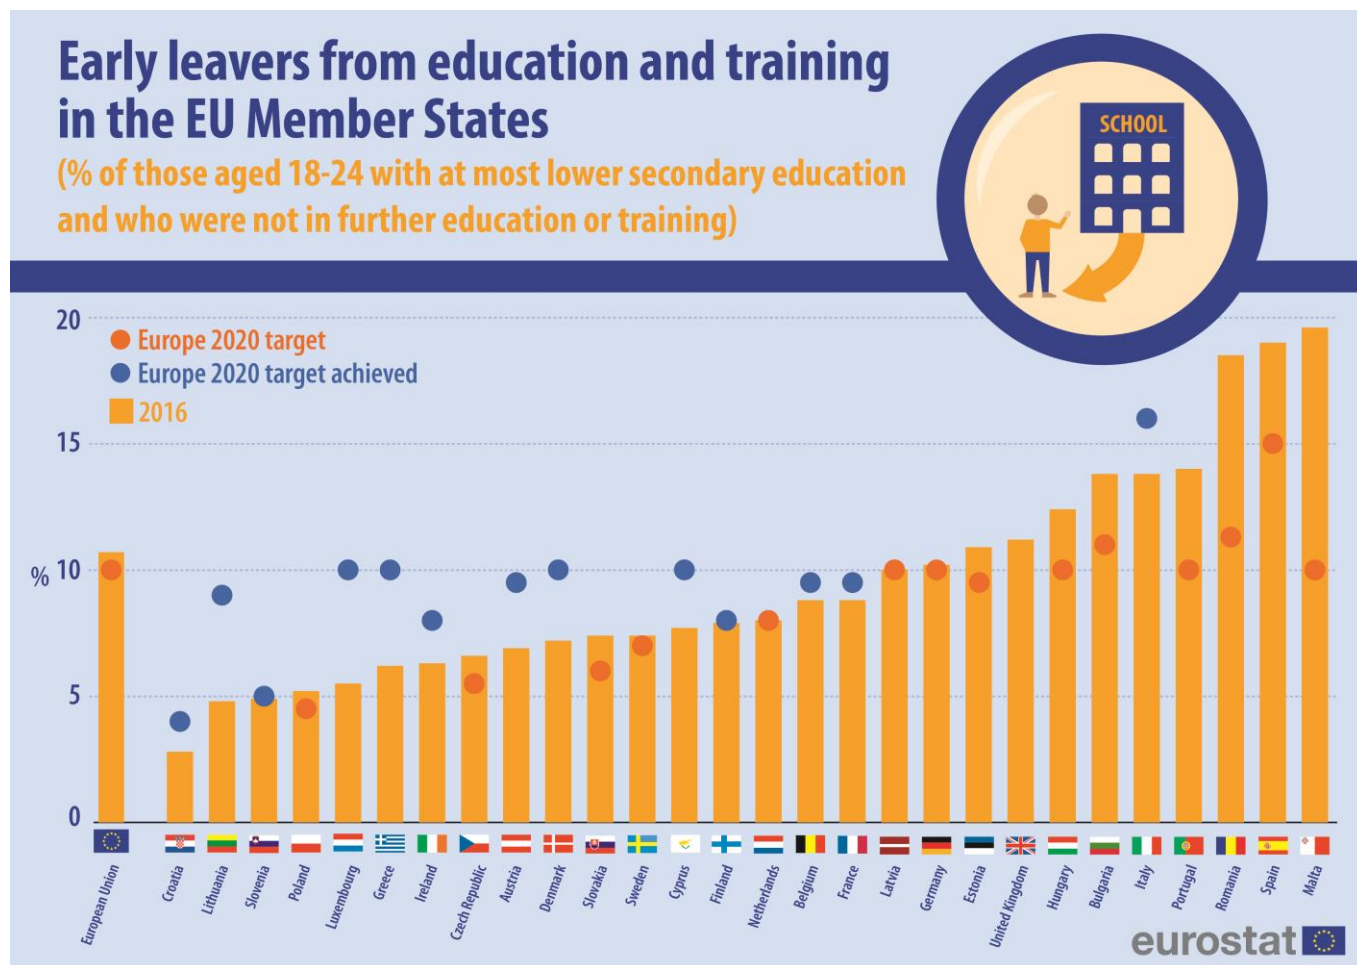

## Lowest share of 'early school leavers' in Croatia, highest in Malta and Spain

Compared with 2006, the proportion of early leavers from education and training decreased in 2016 in all Member States for which the time-series is available, except the **Czech Republic, Romania and Slovakia**.

In 2016, the lowest proportions of 'early school leavers' were observed in **Croatia (2.8%)**, **Lithuania (4.8%)**, **Slovenia (4.9%)** and **Poland (5.2%)**, while the highest shares were recorded in **Malta (19.6%)**, **Spain (19.0%)** and **Romania (18.5%)**.

Thirteen Member States have already fulfilled their 2020 national target for this indicator: **Belgium, Denmark, Ireland, Greece, France, Croatia, Italy, Cyprus, Lithuania, Luxembourg, Austria, Slovenia and Finland**.

In 2016, the share of early leavers from education and training was lower for women than men in every EU Member State, except **Bulgaria, the Czech Republic and Romania**.

No national target for the United Kingdom.

## Geographical information

The **European Union** (EU) includes Belgium, Bulgaria, the Czech Republic, Denmark, Germany, Estonia, Ireland, Greece, Spain, France, Croatia, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Hungary, Malta, the Netherlands, Austria, Poland, Portugal, Romania, Slovenia, Slovakia, Finland, Sweden and the United Kingdom.

## Methods and definitions

Europe 2020 education indicators presented in this news release are based on the EU Labour Force Survey.

The indicator related to **tertiary educational attainment** is defined as the percentage of the population aged 30-34 who have successfully completed tertiary studies (e.g. university, higher technical institution, etc.). This educational attainment refers to ISCED (International Standard Classification of Education) 2011 level 5-8 for data from 2014 onwards and to ISCED 1997 level 5-6 for data up to 2013. The change of ISCED has no impact on the comparability over time of this indicator for all Member States, except Austria.

The indicator **early leavers from education and training** is defined as the percentage of the population aged 18-24 with at most lower secondary education and who were not in further education or training during the last four weeks preceding the survey. Lower secondary education refers to ISCED (International Standard Classification of Education) 2011 level 0-2 for data from 2014 onwards and to ISCED 1997 level 0-3C short for data up to 2013. The change of ISCED has no impact on the comparability over time of this indicator for all Member States, except Estonia.
