LIST OF TABLES, GRAPHS AND MAPS	12
SYMBOLS AND COUNTRY ABBREVIATIONS USED	20
1. POPULATION AND SOCIOECONOMIC BACKGROUND	21
1.1. Population structure	21
1.2. Births and deaths; net inward migration	24
1.3. Life expectancy	25
1.4. Socioeconomic background	25
2. LIFESTYLES	49
2.1. Nutrition	49
2.1.1. Daily intakes	49
2.1.2. Food consumption	51
2.1.3. Expenditure on food	51
2.1.4. A good and balanced diet?	53
2.1.5. Choosing the food	53
2.2. Physical activity	54
2.3. Smoking	56
2.3.1. People smoking	56
2.3.2. Expenditure on tobacco	57
2.3.3. Very young smokers	58
2.3.4. National controls on the sale and advertising of tobacco	58
2.3.5. Cigarettes available on the market	59
2.4. Alcohol	59
2.4.1. Alcohol available on the market	59
2.4.2. Expenditure on alcohol	60
2.4.3. Proportion of drinkers	60
2.4.4. Very young drinkers	60
2.5. Drug use	61
2.5.1. Prevalence of the use of drugs	61
2.5.2. Attitudes and opinions of young people on drugs	62
2.6. Teenage pregnancy	64
2.7. Social exclusion	66
3. RISKS ASSOCIATED WITH THE ENVIRONMENT, WORKING CONDITIONS, LEISURE AND TRAFFIC	113
3.1. Environment	113
3.1.1. Emissions of sulphur dioxide (SO ₂)	113
3.1.2. Emissions of nitrogen oxides (NO _x)	113
3.1.3. Emissions of carbon dioxide (CO ₂)	113
3.1.4. Emissions of non-methane volatile organic compounds (NMVOCs)	114
3.1.5. Emissions of heavy metals in air	114
3.1.6. Population connected to a sewerage system	115
3.1.7. Treatment of urban wastewater	115
3.1.8. Emissions of particles	116
3.1.9. Air pollution from ozone	118
3.1.10. Noise exposure	119
3.2. Working conditions	121
3.2.1. Safety at work	123
3.2.2. Work environment	124
3.3. Home and leisure accidents	125
3.4. Traffic accidents	127
4. HEALTH STATUS	143
4.1. Self-reported health	143
4.1.1. Self-rated health	143
4.1.2. Health interview surveys (HIS)	144

4.1.3.	Self-reported chronic conditions	146
4.1.4.	Self-reported chronic conditions in children	146
4.2.	Anthropometric characteristics	146
4.3.	Dental health	147
4.4.	Disability and restrictions	148
4.4.1.	Disability-free life expectancy	148
4.4.2.	Disability	149
4.4.3.	Temporary cutdown in usual activities	151
4.4.4.	Specific impairments	151
4.4.5.	Employment of disabled people	152
4.4.6.	Attitudes of Europeans towards disability	152
4.5.	Stress	155
4.6.	Well-being and social isolation	155
4.7.	Diagnostic-related morbidity	156
4.7.1.	Communicable diseases	156
4.7.1.1.	Diseases preventable by vaccination	157
4.7.1.2.	Sexually transmitted diseases	161
4.7.1.3.	HIV/AIDS	161
4.7.1.4.	Viral hepatitis	165
4.7.1.5.	Food- and waterborne diseases and diseases of environmental origin	165
4.7.1.6.	Diseases transmitted by non-conventional agents	167
4.7.1.7.	Airborne diseases	168
4.7.1.8.	Zoonoses (other than those in Subsection 4.7.1.5)	169
4.7.1.9.	Serious imported diseases	170
4.7.1.10.	Streptococcal diseases	170
4.7.1.11.	Nosocomial infections	171
4.7.1.12.	Antimicrobial resistance	172
4.7.2.	Non-communicable diseases	172
4.7.2.1.	Cancer (malignant neoplasms)	172
4.7.2.2.	Congenital anomalies	175
4.7.2.3.	Cardiovascular diseases	177
4.7.2.4.	Diabetes	178
4.7.2.5.	Occupational diseases	179
4.7.2.6.	Work-related health problems	180
4.7.2.7.	Musculoskeletal diseases: osteoporosis	181
4.7.2.8.	Allergy and asthma	182
4.7.2.9.	Dementia	184
4.7.2.10.	Other neurological and neurodegenerative diseases	184
4.7.2.11.	Mental disorders	186
4.7.2.12.	Rare diseases	191
5.	MORTALITY	263
5.1.	Infant and childhood mortality	263
5.2.	Mortality by cause	266
5.3.	Special causes of death	267
6.	HEALTH CARE	295
6.1.	Human resources	295
6.1.1.	Human resources in the health and social work sector	295
6.1.2.	Physicians	296
6.1.3.	Medical specialists	299
6.1.4.	Dentists	300
6.1.5.	Pharmacists	300
6.1.6.	Nurses and midwives	300
6.1.7.	Physiotherapists	301
6.2.	Facilities and use of services	302
6.2.1.	Hospital beds and stay	303
6.2.2.	Long-term care beds	304
6.2.3.	Hospital beds: the regional dimension	305
6.2.4.	Nights spent in hospital	305

6.2.5.	Hospital discharges and average length of stay	.307
6.2.6.	High-tech medical facilities	.309
6.2.7.	Ambulatory care: consultations with health professionals	.309
6.2.8.	Home care	.310
6.2.9.	Consumption of pharmaceuticals	.310
6.2.10.	Easy access to some health services	.311
6.2.11.	Satisfaction with health systems	.312
6.3.	Some treatments and medical procedures	.313
6.3.1.	Immunisation coverage as a result of vaccination	.313
6.3.2.	Surgical procedures	.314
6.3.3.	Caesarean sections	.314
6.3.4.	Organ transplants	.314
6.3.5.	Dialysis	.315
6.3.6.	Assisted reproductive technology	.315
6.4.	Economic dimensions of health care — Production value, health expenditure, costs and financing	.317
6.4.1.	Health care production value in the System of National Accounts	.318
6.4.2.	Health expenditure: the OECD approach	.319
6.4.3.	Pharmaceutical expenditure	.319
6.4.4.	The System of Health Accounts	.320
6.4.5.	The boundaries of the health systems: Eucomp	.321
6.4.6.	Health care expenditure in the social protection schemes	.321
6.4.7.	Final consumption expenditure of private households on health in the System of National Accounts	.322
6.4.8.	Final consumption expenditure of private households on health in Household Budget Surveys	.323
6.4.9.	Research and development on human health	.323
ANNEXES		.429
I.	Organisation of health systems	.429
II.	Overview of home-care systems (home-nursing and home-help services)	.430
III.	Description of out-of-pocket payments:	
(i)	Main cost-sharing measures for medical treatment and hospital stays, 2001	.434
(ii)	Main cost-sharing measures for other provisions on health care, 2001	.440
GLOSSARY		.452
