

Table of Contents

Author and affiliation	3
Editors	3
Table of Contents	4
Extended summary	6
1 Introduction	18
1.1 Background and aims	18
2 Methods	20
2.1 Guiding principles	20
2.2 Approach followed in Tasks 4 and 5	20
3 Summary of data needs identified in Tasks 1-3 of DireDate	23
3.1 Task 1	23
3.2 Task 2	23
3.3 Task 3	39
4 Common data needs: building blocks principle	48
4.1 Building blocks principle	48
4.2 Common data need for Agri-Environmental Indicators	49
4.3 Common data need for policies	56
5 Conceptual schemes for common data collection	58
5.1 Agri-Environmental Indicators related to fertilizers and manures	58
5.2 Nitrogen and phosphorus flows in farming systems	60
5.3 Data collection for estimating nitrogen and phosphorus flows	63
5.4 Data collection for the other Agri-Environmental Indicators	70
6 Priority data collection	73
6.1 Introduction	73
6.2 Spatial and temporal scales	73
6.3 Required level of detail for Agri-Environmental Indicators related to manure and fertilizer use	74
6.3.1 Total N, P and C excretion by livestock	74
6.3.2 N and P imported and exported as manure	82
6.3.3 Gaseous emissions from livestock, housing and manure storage	82
6.3.4 Manure N application and associated emissions of NH ₃ and N ₂ O	88

6.3.5	N and P excreted during grazing, and the associated emissions of NH ₃ and N ₂ O	89
6.3.6	N and P fertilizer application and associated emissions of NH ₃ and N ₂ O	90
6.3.7	Biological N fixation and atmospheric deposition and associated N ₂ O emission	94
6.3.8	Nitrogen balance	95
6.3.9	Risk of phosphorus leaching	99
6.3.10	Nitrate pollution	100
6.3.11	Total ammonia emission	100
6.3.12	Greenhouse gas emissions	101
6.4	Screening of required level of detail for the other Agri-Environmental Indicators	102
7	Recommendations	106
7.1	Introduction	106
7.2	Data related to inputs of manure and fertilizer use	107
7.2.1	Data and coefficients	107
7.2.2	Approaches and procedures	108
7.3	Data related to emissions of ammonia and greenhouse gases	109
7.3.1	Data and coefficients	109
7.3.2	Approaches and procedures	111
7.4	Data related to N and P in harvested crop products	111
7.4.1	Data and coefficients	111
7.4.2	Approaches and procedures	112
	Annex: Specific recommendations for collection farm data related to gross nitrogen and phosphorus balances and ammonia and greenhouse gas emissions	116
