Foreword	3
Preface and acknowledgements	4
1. Why do we need this compilation guide?	11
1.1 Introduction	11
1.2 Importance of inventories	12
Changes in inventories — production approach	12
Changes in inventories — expenditure approach	14
Changes in inventories — income approach	15
Recording flows and stocks of inventories	15
1.3 Structure of the guide	16
2. Concepts and definitions	18
2.1 Introduction	18
2.2 Position of inventories on the balance sheet and definitions	18
Position of inventories on the balance sheet	18
Definitions and elaborations of inventory stocks and its aggregates	19
Definitions and elaborations of the components of inventory stocks	20
2.3 Position of changes in inventories on the capital account and its definition	22
Position of changes in inventories on the capital account	22
Definitions of changes in inventories, its aggregate and components	22
2.4 Conceptual issues	24
Inventories in the system of national accounts	24
Stocks	25
Transactions	25
Other flows	25
Other changes in the volume of assets and liabilities	25
Nominal holding gains and losses	27
Valuation	28
Stocks	28
Transactions	28
Other flows	30
Time of recording	33
Stocks	33
Transactions	34
Other flows	34
Netting and consolidation	35

Annex 2A: Separating output due to storage from nominal holding gains and losses	36
2A.1 Introduction	36
2A.2 Type I products	36
2A.3 Type II products	37
Goods with a long production period	37
Goods whose physical characteristics change	37
Goods with seasonal patterns of supply and demand	38
2A.4 Who benefits from the increase in value of goods in storage?	39
2A.5 When is output due to storage recorded?	39
Some examples	39
Example 1	39
Example 2	40
Example 3	41
3. Data sources	42
3.1 Introduction	42
3.2 Types of data available	42
Enterprise surveys	43
Financial reports	43
Government finance statistics	43
Administrative data	44
Economic census	45
Business tendency surveys	45
Price data sources	45
3.3 Illustrative examples of data sources	45
4. Business accounting methods	52
4.1 Introduction	52
4.2 International Accounting Standards	52
4.3 Description of historic cost accounting methods	53
Specific identification method	53
First-in-first-out method	53
Weighted-average cost method	54
Last-in-first-out method	55
Comparison of inventory valuation concepts in business and national accounts	55
4.4 Issues related to business accounting and national accounts accounting	56
Write-down of inventories	56
Recurrent losses and exceptional losses	56
Work-in-progress and finished goods inventories	57
Nominal holding gains and losses on inventories, relationship between nominal gains and inventory valuation adjustment	57

5. Estimation methods changes in inventories	60
5.1 Introduction	60
5.2 Transforming business accounts data on changes in inventories into national accounts — general method	60
Introduction	60
Step 1: Segregate by accounting methods	62
Step 2: Techniques for first-in-first-out and weighted-average cost accounting methods	62
A) Constructing deflators for book values: first-in-first-out and weighted-average cases	62
B) Calculate constant price book values: first-in-first-out and weighted-average cases	68
C) Calculate difference in constant price book values: first-in-first-out and weighted-average cases	69
D) Revalue the volume change: first-in-first-out and weighted-average cases	69
Step 3: Techniques for last-in-first-out accounting method	70
Step 4: Calculate total changes in inventories	71
Strengths and weaknesses	71
5.3 Direct estimation of changes in inventories	72
Introduction	72
Description of the method	73
5.4 Estimating changes in inventories using commodity supply-demand method	78
Introduction	78
Description of the method	78
Annex 5A: Statistical discrepancies and changes in inventories	80
6. Estimation methods inventory stocks	82
6.1 Introduction	82
6.2 Estimating inventory stocks from business accounts	83
Description of the method	83
A) Matching businesses book value data with national accounts	84
B) Revaluing business book value data to be consistent with national accounts	86
C) The coverage multipliers applied to include all corporations in the industry	92
D) Computing total inventory stock for the economy as a whole	92
E) Decomposing value changes into price and volume changes	93
Strengths and weaknesses	97
6.3 Direct estimation inventory stocks	102
Introduction	102
Description of method	102
A) Selection of products to be estimated using direct method	103
B) Quantity data for selected inventory items prepared	103
C) Price data multiplied by quantity data to obtain value of inventory	104
D) Allocation by inventory type, industry and institutional sector	105
E) Decomposing value changes into price and volume changes	106
Strengths and weaknesses	106

6.4	Estimation inventory stocks by using the perpetual inventory method	107
	Introduction	107
	Description of the method	107
	A) Estimate initial stock levels in the base year	109
	B) Calculating price indices	109
	C) Estimate the initial constant price stock of inventories	112
	D) Estimate constant price changes in inventories and constant price stock of inventories in later years	112
	E) Revalue constant price stocks to current price stocks	113
	F) Calculate nominal holding gains and losses and the inventory valuation adjustment	114
	Inventory stocks and flows on the balance sheet	115
	Strengths and weaknesses	116
	Annex 6A: Simplified estimation process stocks and changes in inventories	120
7.	Estimation: product and industry breakdown, sectorisation, supply and use tables	122
7.1	Introduction	122
7.2	Inventories by product, industry, and institutional sector	122
	Introduction	122
	Definitions	122
	Why is a breakdown and cross-classification important?	124
	Breakdown of inventories by industry and product	125
	Inventories of work-in-progress and finished goods (AN.122 and AN.123)	126
	Inventories of materials and supplies (AN.121)	126
	Inventories of goods for resale (AN.125)	127
	Methods of estimating the changes and stocks of inventories by institutional sector or cross-classification	138
	Sectorisation of incorporated and unincorporated enterprises	139
	Indirect estimation with the supply and demand model	140
	Reclassification in and out of a sector	141
7.3	Changes in inventories within supply and use tables	142
	Supply and use tables and their balancing	142
	Valuation	144
	Deflation of supply and use tables	146
8.	Special cases and estimation challenges	152
8.1	Introduction	152
8.2	Agricultural and timber inventories	152
	Agricultural inventories	152
	Agricultural resources and registration of agricultural inventories	153
	Time of recording, valuation and estimation of agricultural inventories	153
	Timber inventories	155
	Types of forests and registration of inventories	155
	Sources and compilation practice	156

8.3	Inventories and the gross fixed capital formation asset boundary	159
	Introduction	159
	Buildings and other structures	159
	SNA 2008 treatment	159
	Treatment in business accounts and implications for the compilation of assets under construction in national accounts	160
	Research and development and software	163
8.4	Treatment of government and military inventories	164
	Government as producers	164
	Government's accounting and time of recording	165
	Definitions and breakdowns government inventories	165
	Military inventories	166
	Issues raised by military inventories	167
8.5	Inventories of finished services	168
	Characteristics of inventories of finished products	169
	Information by industries	169
	Information by products	169
8.6	Treatment of exceptional and recurrent losses	170
	The boundary between exceptional losses and recurrent losses	170
	Business accounting	170
	Insurance claims as a data source for exceptional losses	171
	Recurrent losses and insurance claims	171
	Force majeure	171
8.7	Inventories held under global production	171
	Introduction	171
	Goods sent abroad for processing	172
	Goods under merchanting	173
	Factoryless goods production	176
	How to identify foreign held inventories?	176
8.8	Differences between closing and next period opening stocks in source data	178
	Frequency of inconsistencies of reported inventory stocks	178
	Reasons for inconsistencies of reported inventory stocks	178
	Solutions for inconsistencies of reported inventory stocks	179
8.9	Inventories under high inflation	181
9.	Inventories questionnaire	182
9.1	Overview of the survey	182
9.2	Country practices: results of questionnaire	183
	Annual data sources for inventories (and type of inventory collected)	183
	Estimating the stock of inventories	185
	Estimating changes in inventories	188
	Additional questions	190
	Conclusions	191

Annex 9A. Inventories questionnaire	192
Introduction	192
Background	192
Eurostat-OECD Survey of National Practices in Estimating Inventories	194
A. Annual data sources for inventories	194
B. Estimating the stock of inventories (AN.12)	195
C. Estimating changes in inventories (P.52)	197
D. Additional questions	199
List of abbreviations and acronyms	201
Glossary	203
Bibliography	211
