

# Table of contents

<b>Preface</b> .....	<b>3</b>
<b>List of abbreviations and acronyms</b> .....	<b>4</b>
<b>Table of contents</b> .....	<b>6</b>
<b>1. Introduction</b> .....	<b>9</b>
<b>1.1 Scope of economy-wide material flow accounts and its legal base</b> .....	<b>9</b>
<b>1.2 Short historical overview of EW-MFA in Europe</b> .....	<b>10</b>
<b>2. Conceptual foundations of EW-MFA</b> .....	<b>12</b>
The physical economy as a metabolism .....	12
Conceptual roots .....	12
EW-MFA = physical flow accounts .....	12
<b>2.1. Definition of the national economy – an important 'boundary' in EW-MFA</b> .....	<b>13</b>
<b>2.2. Basic EW-MFA concepts as regards material flows between environment and economy</b> .....	<b>14</b>
Simple environment-economy model .....	14
Material flows from the environment to the economy = domestic extraction .....	14
Material flows from the economy to the environment = domestic processed output .....	14
As regards to the 'boundary' between environment and economy, specific EW-MFA recording conventions have been established .....	15
<b>2.3. Basic EW-MFA concepts as regards material flows between economies – the residence principle and the change-in-ownership principle</b> .....	<b>15</b>
Trade = change in ownership between resident unit and non-resident unit .....	16
The national economy vis-a-vis the rest of the world economy (residence principle) .....	16
<b>2.4. Conceptual relation between EW-MFA and SEEA-CF</b> .....	<b>16</b>
The framework of physical supply and use tables (PSUT-framework) .....	16
Types of physical flows: natural inputs, products, and residuals .....	17
EW-MFA articulate only parts of SEEA's PSUT-framework .....	17
Specific EW-MFA recording conventions have been agreed .....	17
<b>2.5. Specific EW-MFA recording conventions</b> .....	<b>18</b>
Bulk material flows of water are excluded from EW-MFA .....	18
Bulk flows of air are excluded from EW-MFA's core accounts; some selected gaseous material flows are recorded under balancing items .....	18
EW-MFA record domestic extraction of material for use in the economy - used versus unused domestic extraction .....	19
Domestic extraction of metal ores and other minerals (non-metallic, fossils) – the 'run-of-mine' concept (ROM) .....	19
Domestic extraction of biomass – the 'harvest' approach .....	21
Domestic processed outputs – the treatment of controlled landfills .....	21
Physical imports and exports follow the 'residence principle' .....	21
'Goods sent abroad for processing' are included in EW-MFA's physical imports and exports .....	21

2.6.	<b>EW-MFA classification of materials .....</b>	<b>22</b>
2.7.	<b>EW-MFA classification of types of flows and derived indicators.....</b>	<b>27</b>
2.8.	<b>Material flow accounts in raw material equivalents (MFA-RME).....</b>	<b>28</b>
2.8.1.	Why raw material equivalents.....	29
2.8.2.	Components of MFA-RME and the derived indicators.....	30
<b>3.</b>	<b>Reporting EW-MFA to Eurostat.....</b>	<b>32</b>
3.1.	The EW-MFA questionnaire .....	32
3.2.	Confidential data – how to report and flag .....	34
3.3.	The quality report.....	35
<b>4.</b>	<b>Compilation guidelines.....</b>	<b>37</b>
4.1.	General remarks on data sources and compilation .....	37
4.2.	Domestic extraction of biomass (Table A) .....	38
4.2.1.	Classification overview.....	38
4.2.2.	Data sources.....	38
4.2.3.	Data compilation .....	39
4.3.	Domestic extraction of metal ores (Table A).....	49
4.3.1.	Classification overview.....	49
4.3.2.	Data sources.....	50
4.3.3.	Data compilation .....	51
4.4.	Domestic extraction of non-metallic minerals (Table A).....	57
4.4.1.	Classification overview.....	57
4.4.2.	Data sources.....	58
4.4.3.	Data compilation .....	59
4.5.	Domestic extraction of fossil energy materials/carriers (Table A).....	68
4.5.1.	Classification overview.....	68
4.5.2.	Data sources.....	69
4.5.3.	Data compilation .....	69
4.6.	Physical imports and exports (Tables B to E).....	71
4.6.1.	Classification overview.....	72
4.6.2.	Data sources.....	72
4.6.3.	Data compilation .....	73
4.6.4.	Physical trade by stage of manufacturing.....	75
4.7.	Domestic processed output (Table F).....	76
4.7.1.	Emissions to air (MF.7.1).....	77
4.7.2.	Waste disposal to the environment (MF.7.2) .....	80
4.7.3.	Emissions to water (MF.7.3) .....	81
4.7.4.	Dissipative use of products (MF.7.4) .....	82
4.7.5.	Dissipative losses (MF.7.5).....	87
4.8.	Balancing items (Table G).....	88
4.8.1.	Balancing items: input side (MF.8.1).....	89
4.8.2.	Balancing items: output side (MF.8.2) .....	93

4.9. Material flow accounts in raw material equivalents (Table I).....	96
<b>5. Use and presentation of material flow data .....</b>	<b>99</b>
5.1. Descriptive presentation of EW-MFA data.....	99
Domestic extraction.....	101
Physical trade flows .....	103
Domestic material consumption .....	106
Direct material input .....	110
5.2. Relating EW-MFA to economic aggregates.....	111
5.3. Presenting material flows in raw material equivalents.....	114
5.4. Analytical applications .....	117
<b>Annex A .....</b>	<b>122</b>
Classification of materials in EW-MFA (cross tabled with type of flows) .....	122
<b>Annex B .....</b>	<b>126</b>
EW-MFA classification of trade by stage of manufacturing .....	126
<b>Annex C .....</b>	<b>127</b>
Overview of Annexes to the EW-MFA questionnaire .....	127
<b>Annex D .....</b>	<b>128</b>
Weight of European hunted animals (kg) .....	128
<b>References.....</b>	<b>134</b>
