

# Contents

Preface.....	3
Acknowledgements.....	4
Contents.....	5
Executive summary.....	7
1. Introduction.....	8
1.1 Background.....	8
1.2 Purpose.....	9
2. Preliminary analysis.....	11
2.1 Objective.....	11
2.2 Analysis of available data.....	11
2.3 Detail of compilation.....	11
2.4 Graphical analysis.....	12
2.5 Outlier detection and correction.....	12
3. Forecasting missing data.....	15
3.1 Introduction.....	15
3.2 Model strategies.....	15
3.3 Direct approach.....	16
3.3.1 ADL models.....	16
3.3.1.1 Model selection.....	16
3.3.1.2 Estimation and diagnostics.....	17
3.3.1.3 Available software.....	18
3.3.2 Dynamic factor models ( ).....	18
3.3.2.1. Model selection.....	19
3.3.2.2. Estimation and diagnostics.....	20
3.3.2.3. Available software.....	20
3.4 Indirect approach.....	20
3.4.1 Model selection.....	20
3.4.2 Estimation and diagnostics.....	21
3.4.3 Available software.....	22
3.5 Pure forecasting methods.....	22
3.5.1 ARIMA models.....	22
3.5.1.1 Model selection, estimation, diagnostics and the forecasting stage.....	22
3.5.1.2 Available software.....	24
3.5.2 Structural time series models.....	25
3.5.2.1 Model selection, estimation, diagnostics and the forecasting stage.....	25
3.5.2.2 Available software.....	26

3.6 Multivariate extensions.....	26
3.6.1 Introduction.....	26
3.6.2 VAR modelling approach.....	27
3.6.2.1 Modelling and statistical treatment.....	27
3.6.2.2 Available software.....	29
3.6.3 Multivariate STS models.....	30
3.6.3.1 Modelling and statistical treatment.....	30
3.6.3.2 Available software.....	30
4. Analysis of results.....	31
4.1 Comparative analysis of results.....	31
4.1.1 Measures of dispersion.....	32
4.1.2 Summary error statistics.....	33
4.2 Forecast Encompassing.....	34
4.3 Forecast Combination.....	34
References.....	35
Annex - Questionnaire on estimation methods.....	39
