

Basic figures on enlargement countries

2016 edition

General information

Enlargement policy has proven to be a powerful tool for transformation: countries that have already become members of the EU and those on the road to join the EU have undergone far-reaching changes driven by democratic, societal and economic reforms.

Eurostat monitors the progress of enlargement countries in complying with the EU *acquis* (the body of EU law) in the field of statistics, collecting a wide range of data from each country. These statistics are considered essential for measuring progress and providing information about the effectiveness of enlargement policies and assistance programmes. Enlargement countries are expected to increase progressively the quantity and quality of their data and to transmit these data to Eurostat. In return, Eurostat provides technical assistance and support to national statistical authorities. The ultimate goal is the provision of harmonised, high-quality data that conforms to European and international standards.

Symbols and abbreviations

:	not available
–	not applicable
Billion	1 000 million

Figures in *italics* are estimates or provisional.

Extraction date

Data were extracted in October 2016.

Data codes

Eurostat online data codes, which are given in the source under each table, provide users with a quick and efficient way to access the most up-to-date statistics. When entered in the 'search' facility on Eurostat's website, these codes provide users with the freshest data and longer time series.

Eurostat, the statistical office of the European Union

Eurostat's mission is to *provide high-quality statistics for Europe*. Eurostat collects data from national statistical authorities.

This short guide presents the latest data available for the **European Union (EU)** and the **enlargement countries**. The Treaty on European Union (Article 49) states that any European country may apply for membership if it respects the democratic values of the EU — a regard for human dignity and human rights, freedom, democracy, equality and the rule of law — and is committed to promoting them. The EU has granted the perspective of EU membership to seven enlargement countries, five of which have candidate country status — Albania, the former Yugoslav Republic of Macedonia, Montenegro, Serbia and Turkey. The other two, namely, Bosnia and Herzegovina and Kosovo (this designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ Opinion on the Kosovo declaration of independence) are potential candidates.

Eurostat releases a range of publications, all of which are **free of charge**, on its website in PDF format. *Key figures on the enlargement countries* provides a comprehensive set of information for a wide-range of statistical themes comparing data for the EU-28 with that for the candidate countries and potential candidates.
