

**Information from Germany on the infectious bovine rhinotracheitis
situation in particular in Bavaria**

All regions of Germany with the exception of the regional districts of Oberpfalz and Oberfranken in the federal state of Bavaria are currently listed in Annex I to Decision 2004/558/EC

Bayern is one of the 16 Länder of the Federal Republic of Germany with 7 regional districts

These 7 regional districts are regions of Member States according Article 2 of Directive 64/432/EC

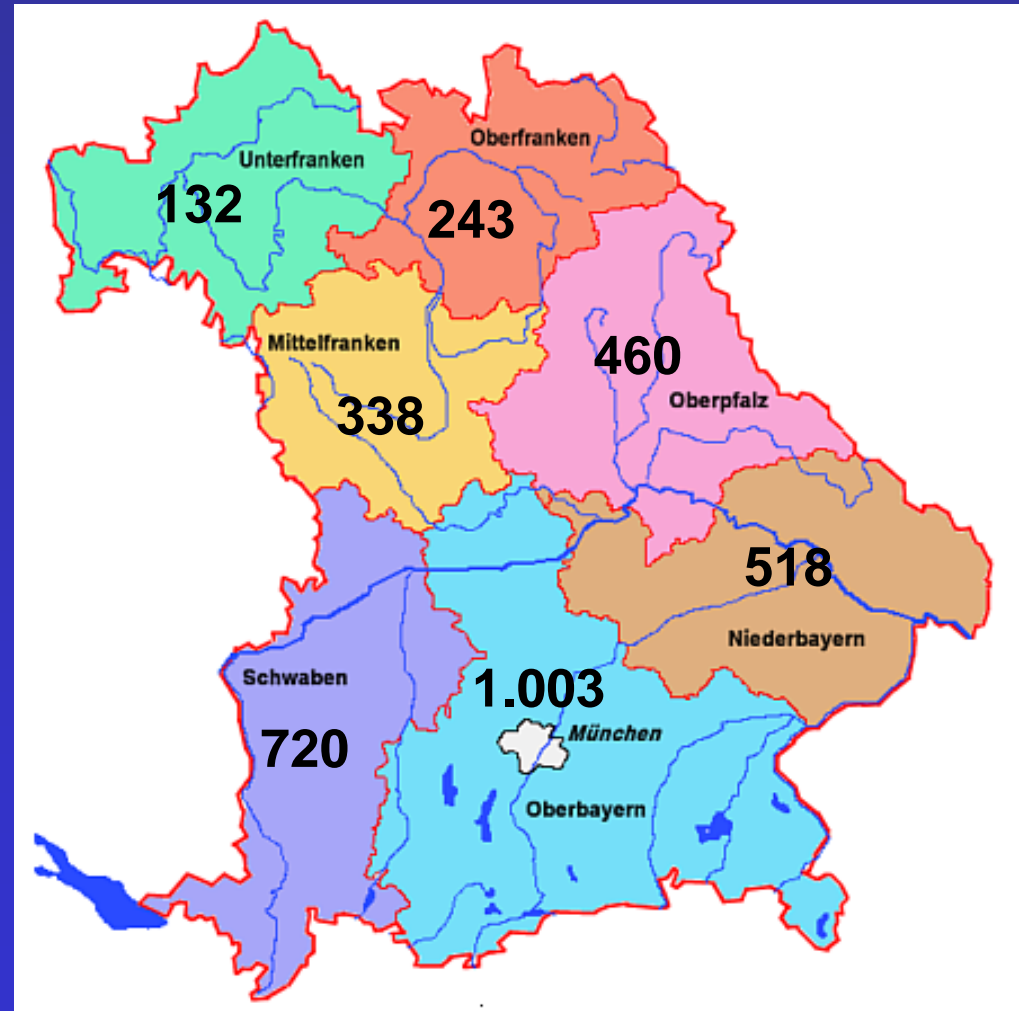

Two of them (Oberfranken, Oberpfalz) are listed in Annex II of Decision 2004/558

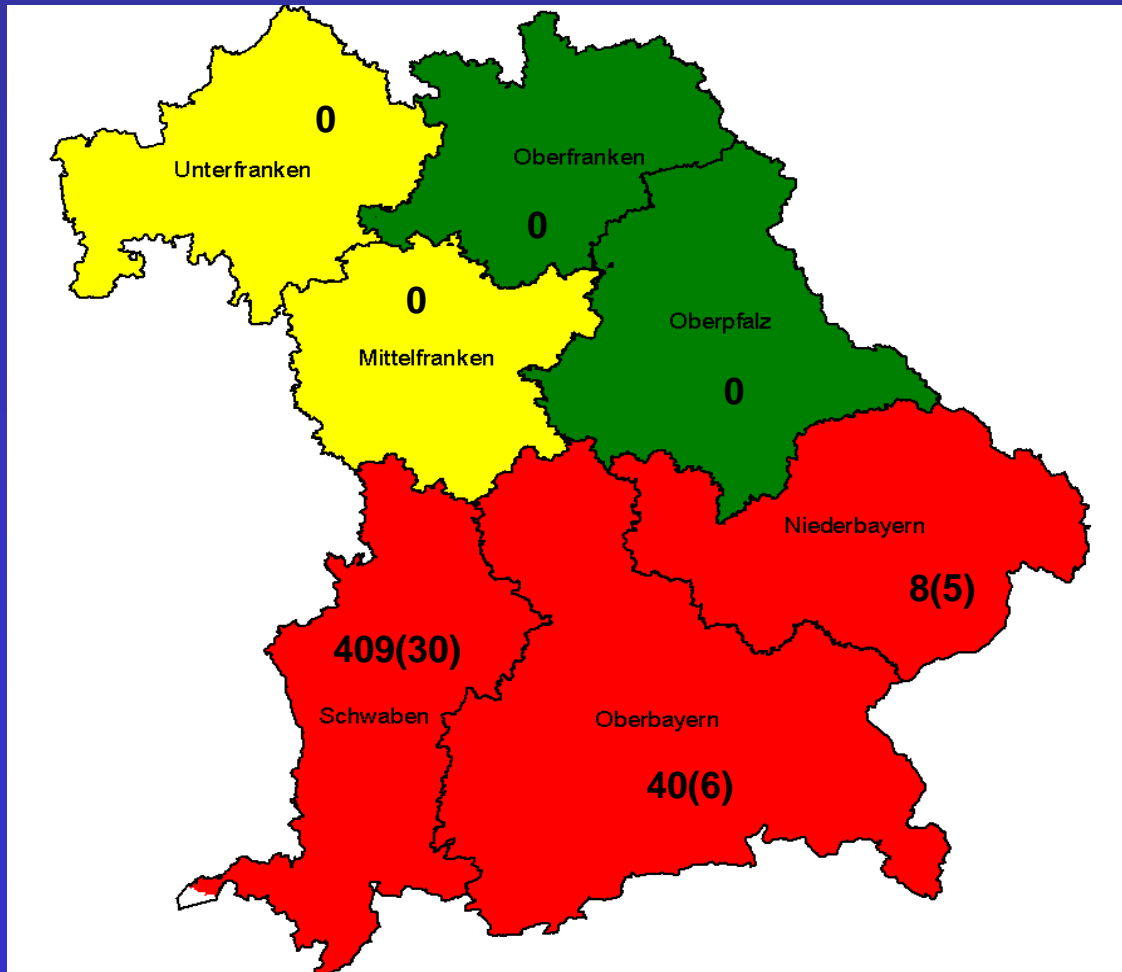

Total number of bovine animals in
Bavaria (in 1000): 3.414

Number of bovine animals in the
regional districts (in 1000):

„state of play“ in Bavaria

- Article 10-Region since 21.08.2007 (Decision 2007/584/EC)
- Article 10 submitted
- Article 10 intended in 2011

0 = free of reagents

X (Y) = X reagents in Y holdings

Eradication of IBR in Mittelfranken and Unterfranken (final step of the strategy)

Start: 01.09.2006

individual plan of eradication for each holding with seropositive bovine animals

01.02.2009 to 14.06.2009: compulsory vaccination of bovine animals of enclosed fattening units

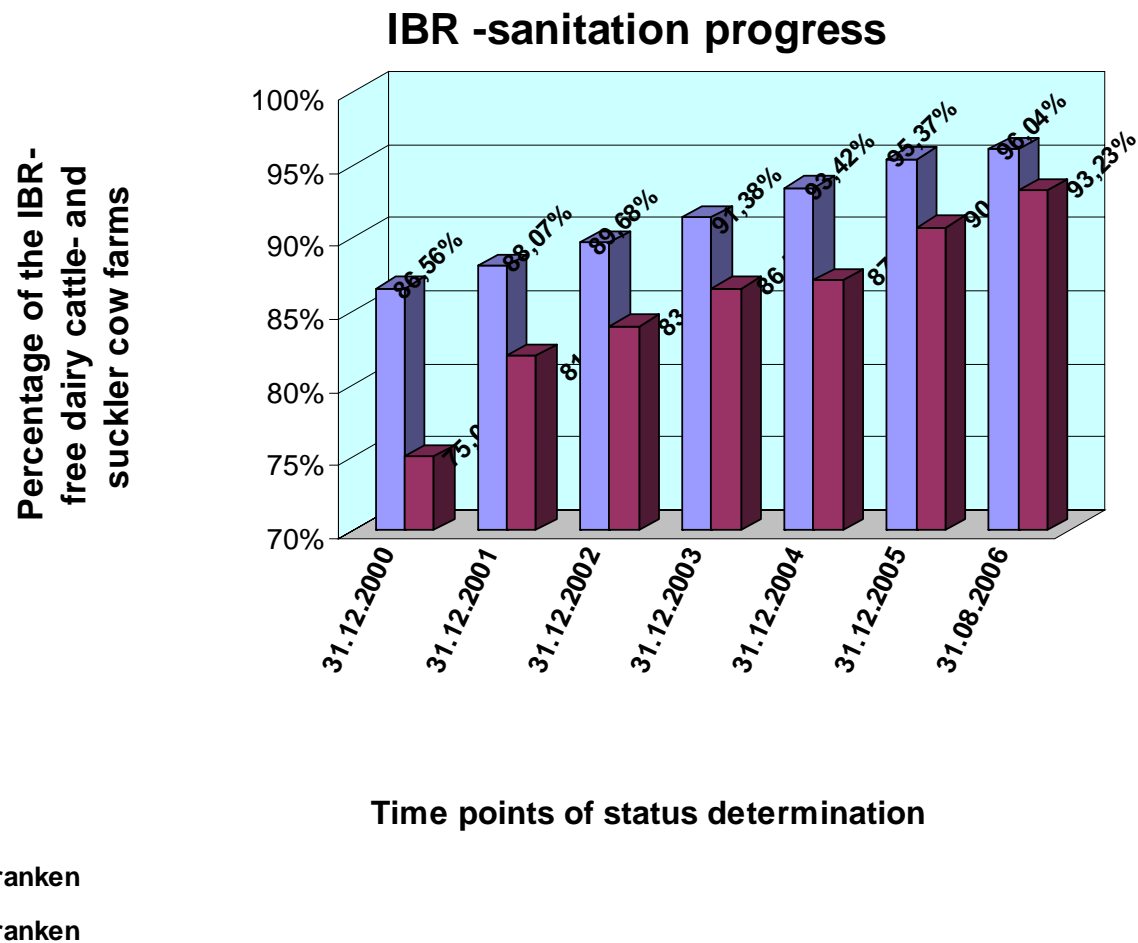

15.06.2009: vaccination prohibited

since 15.06.2009: only seronegative, not-vaccinated animals are allowed to move at the holdings

ongoing: detected seropositive bovine animals are to be killed/slaughtered immediately

Eradication of IBR in Mittelfranken and Unterfranken („start“)

Eradication of IBR in Mittelfranken and Unterfranken („final lap“)

Regional District	number of	number of				number of			
	dairy cattle	dairy cattle and calf raising farms				reagents in the			
	holdings	containing reagents				dairy farms and calf raising farms			
	Status	Status	Status	Status	Status	Status	Status	Status	
	1/01/2010	1/06/2006	1/01/2008	1/01/2009	25/06/2010	1/09/2006	1/01/2008	1/01/2009	25/06/2010
Mittelfranken	4.739	128	45	11	0	2.556	1.127	214	0
Unterfranken	8.125	98	12	2	0	1.919	214	10	0
Sum	6.864	226	57	13	0	4.475	1.341	224	0

Unterfranken

- may 2009: no seropositive animals (first time)
- may 2009 until 25 of june 2010: 26 seropositive animals in 5 holdings
- since 25 of june 2010: no seropositive animals

Mittelfranken:

- october 2009: no seropositive animals (first time)
- october 2009 until 25 of june 2010: 75 seropositive animals in 18 holdings
- since 25 of june 2010: no seropositive animals

Further actions to be taken:

- to continue the eradication programme in the remaining three regional districts following the same strategy
- Oberbayern und Niederbayern: since 01.02.2010 vaccination is prohibited
- Schwaben: up from 01.08.2010 vaccination will be prohibited
- with the stop of vaccination : only sero-negative, not-vaccinated animals may move at the holdings
- ongoing: detected sero-positive bovine animals are to be killed/slaughtered immediately

Objective to be achieved:

the whole territory of Bavaria listed in Annex II to Decision 2004/558/EC in the year 2011

Thank you for your attention!
