

The results of the implementation of the enzootic bovine leucosis (EBL) co-financed eradication program in Estonia in 2010

SCoFCAH, July 2011, Brussels

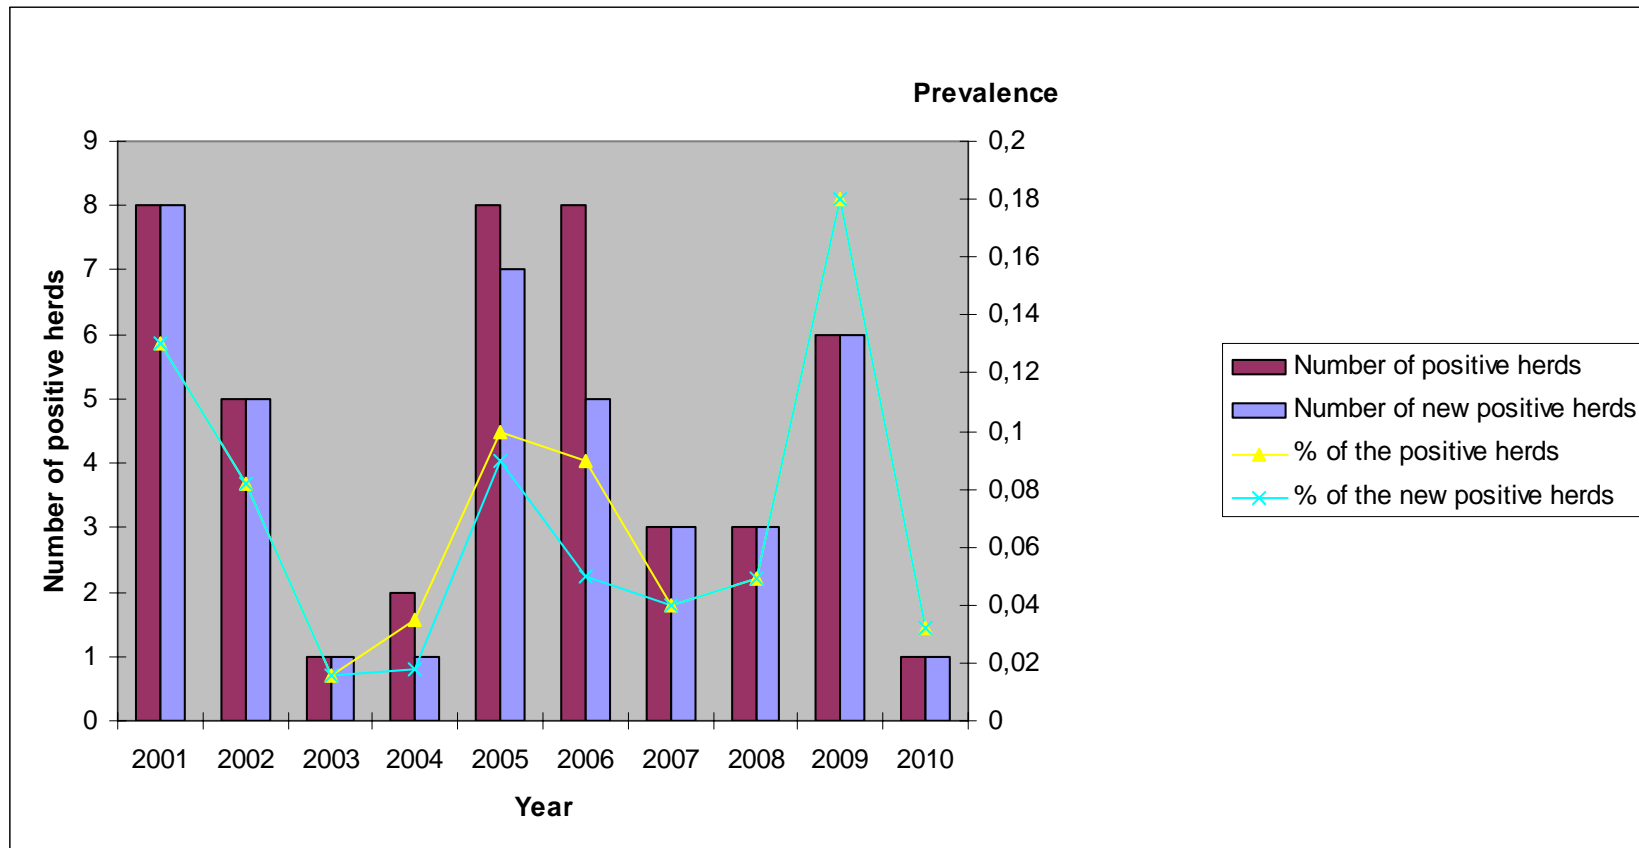

General information

- State Programme on Monitoring and Surveillance of Animal Infectious Diseases
- All bovine animals over 24 months of age are subject to routine serological testing at interval not exceeding 12 months
- Milk samples, blood samples
- Eradicate EBL and get EBL free status in Estonia

Data on bovine herds under the EBL program in Estonia in 2010

Total number of herds	Total number of herds under the programme	Number of herds checked	Number of positive herds
5116	3171	3171	1

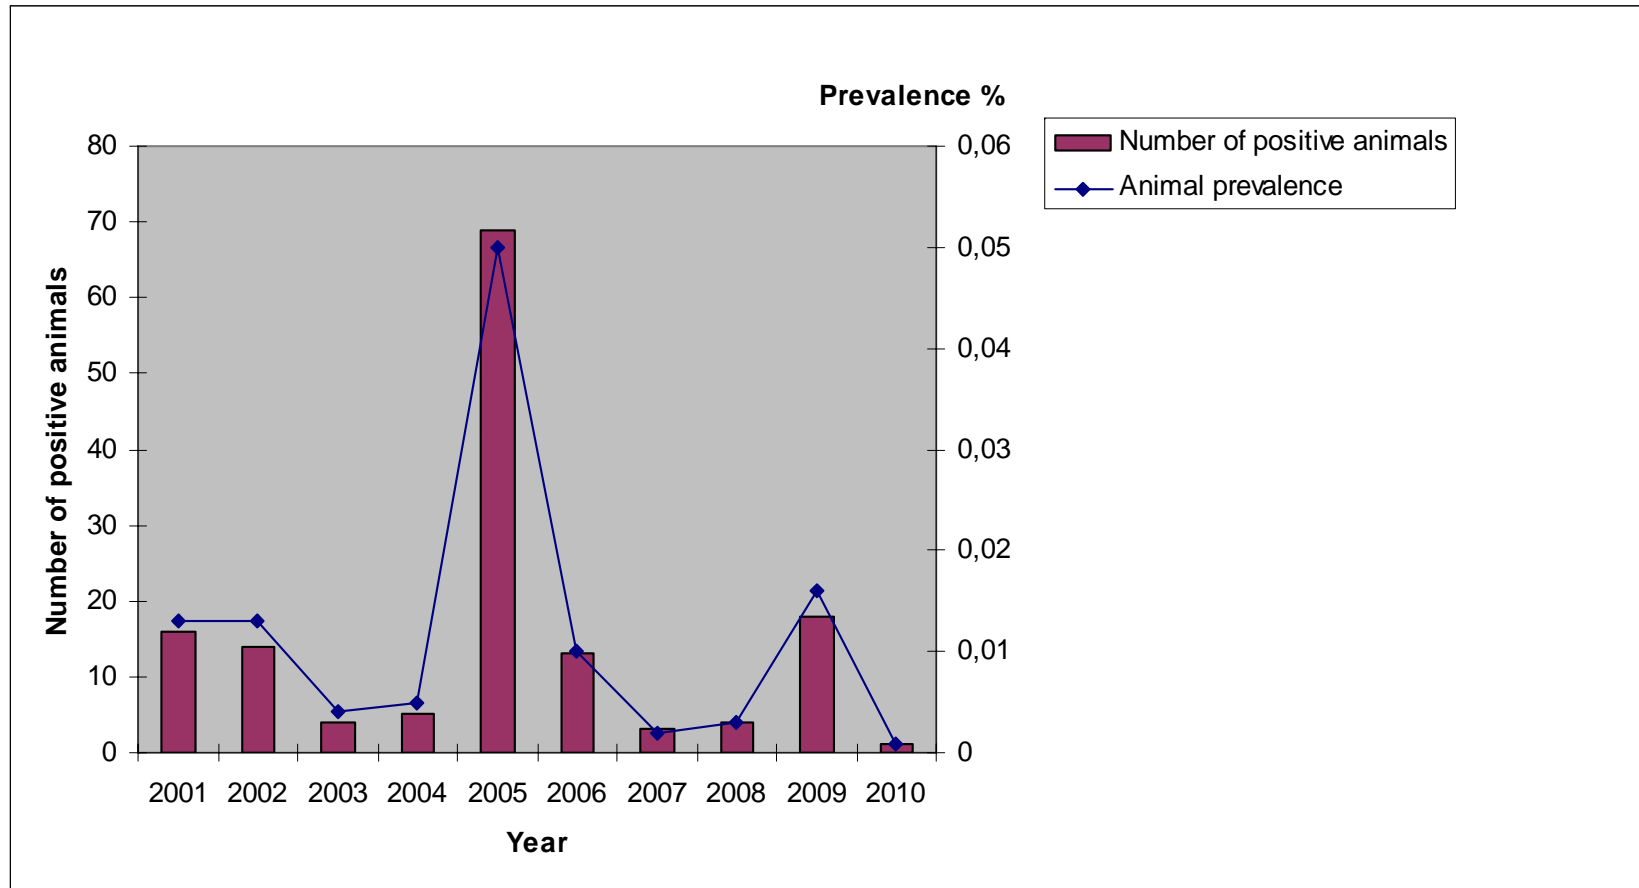

Number of positive herds with EBL and EBL prevalence in Estonia in 2001-2010

Data on bovine animals under the EBL program in Estonia in 2010

Total number of animals	Total number of animals under the program	Number of animals checked	Number of positive animals
234 990	116 447	116 447	1

Number of positive animals with EBL and prevalence in 2001-2010

Diagnostic tests

Disease/Species	Type of sample	Number of tests performed
EBL/Bovine	Milk	93 758
	Blood serum	22 689

Financial aspects

- All main costs: 101 167 EUR
- Cost of the analysis: 34 934 EUR
- Cost of sampling: 63 972 EUR
