

Information from Germany on the infectious bovine rhinotracheitis situation in particular in Bavaria

All regions of Germany with the exception of the regional districts of Oberpfalz, Oberfranken, Mittelfranken and Unterfranken in the federal state of Bavaria are currently listed in Annex I to Decision 2004/558/EC

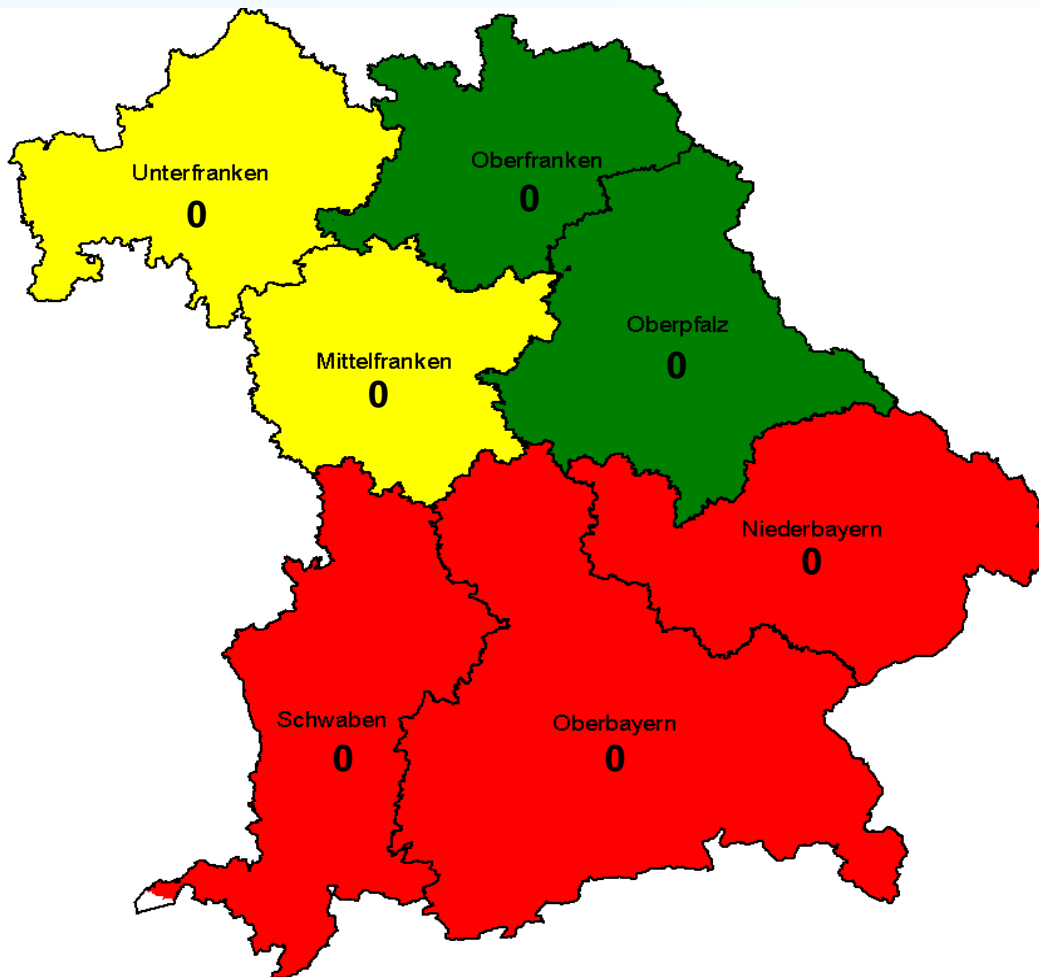

Bayern is one of the 16 Länder of the Federal Republic of Germany with 7 regional districts

These 7 regional districts are regions of Member States according Article 2 of Directive 64/432/EEC

Four of them (Oberpfalz, Oberfranken, Mittelfranken, Unterfranken) are listed in Annex II of Decision 2004/558/EC

„state of play“ in Bavaria

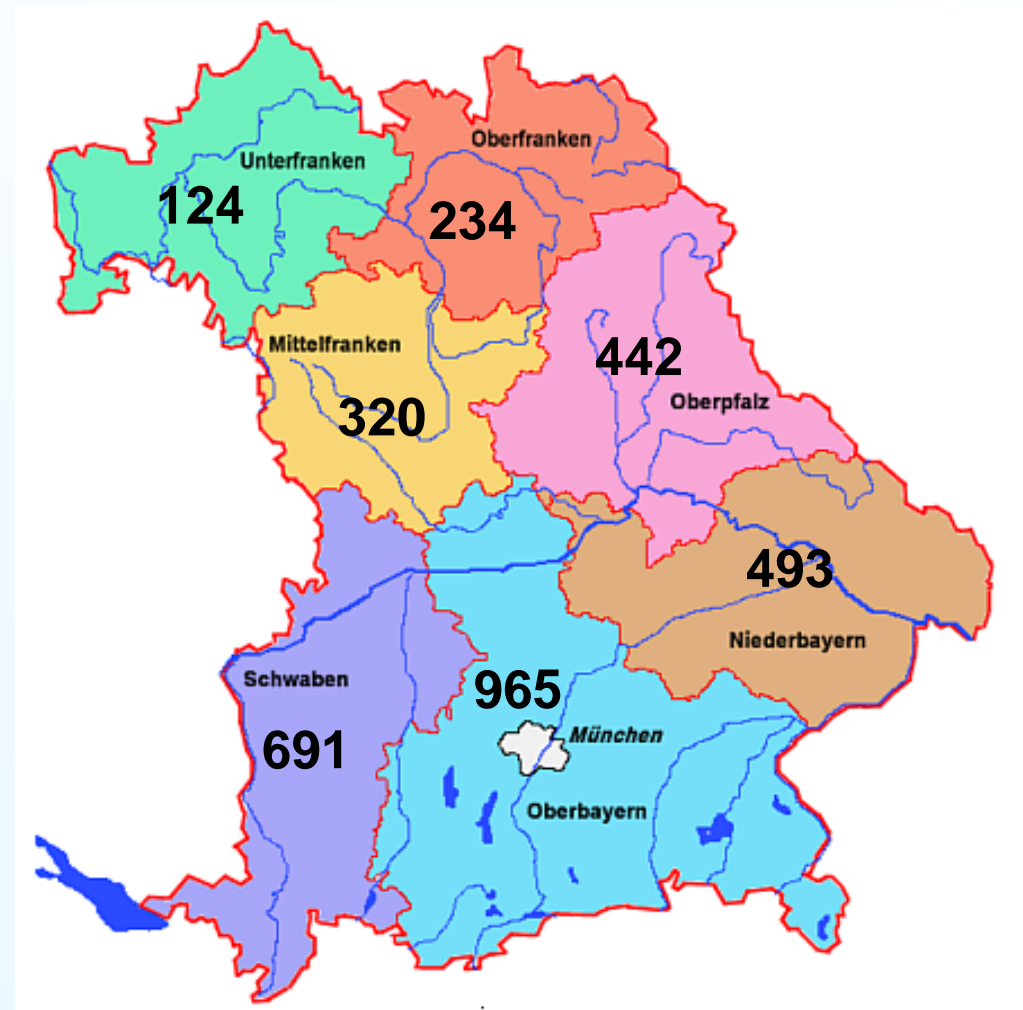

-  Article 10 region since 24.08.2007 (Decision 2007/584/EC)
-  Article 10 region since 06.08.2010 (Decision 2010/433/EC)
-  Article 10 submitted

0 = free of reagents (01.09.2011)

Total number of bovine animals in
Bavaria (in 1000): 3.269

Number of bovine animals in the
regional districts (in 1000):

Eradication of IBR in Oberbayern, Niederbayern and Schwaben

Oberbayern, Niederbayern, Schwaben:

- Start: 18.02.2008
- individual plan of eradication for each holding with seropositive bovine animals

Oberbayern, Niederbayern:

- 01.10.2009 to 31.01.2010: compulsory vaccination of bovine animals of enclosed fattening units
- 01.02.2010: vaccination prohibited
- since 01.02.2010: only seronegative, not-vaccinated animals are allowed to move at the holdings

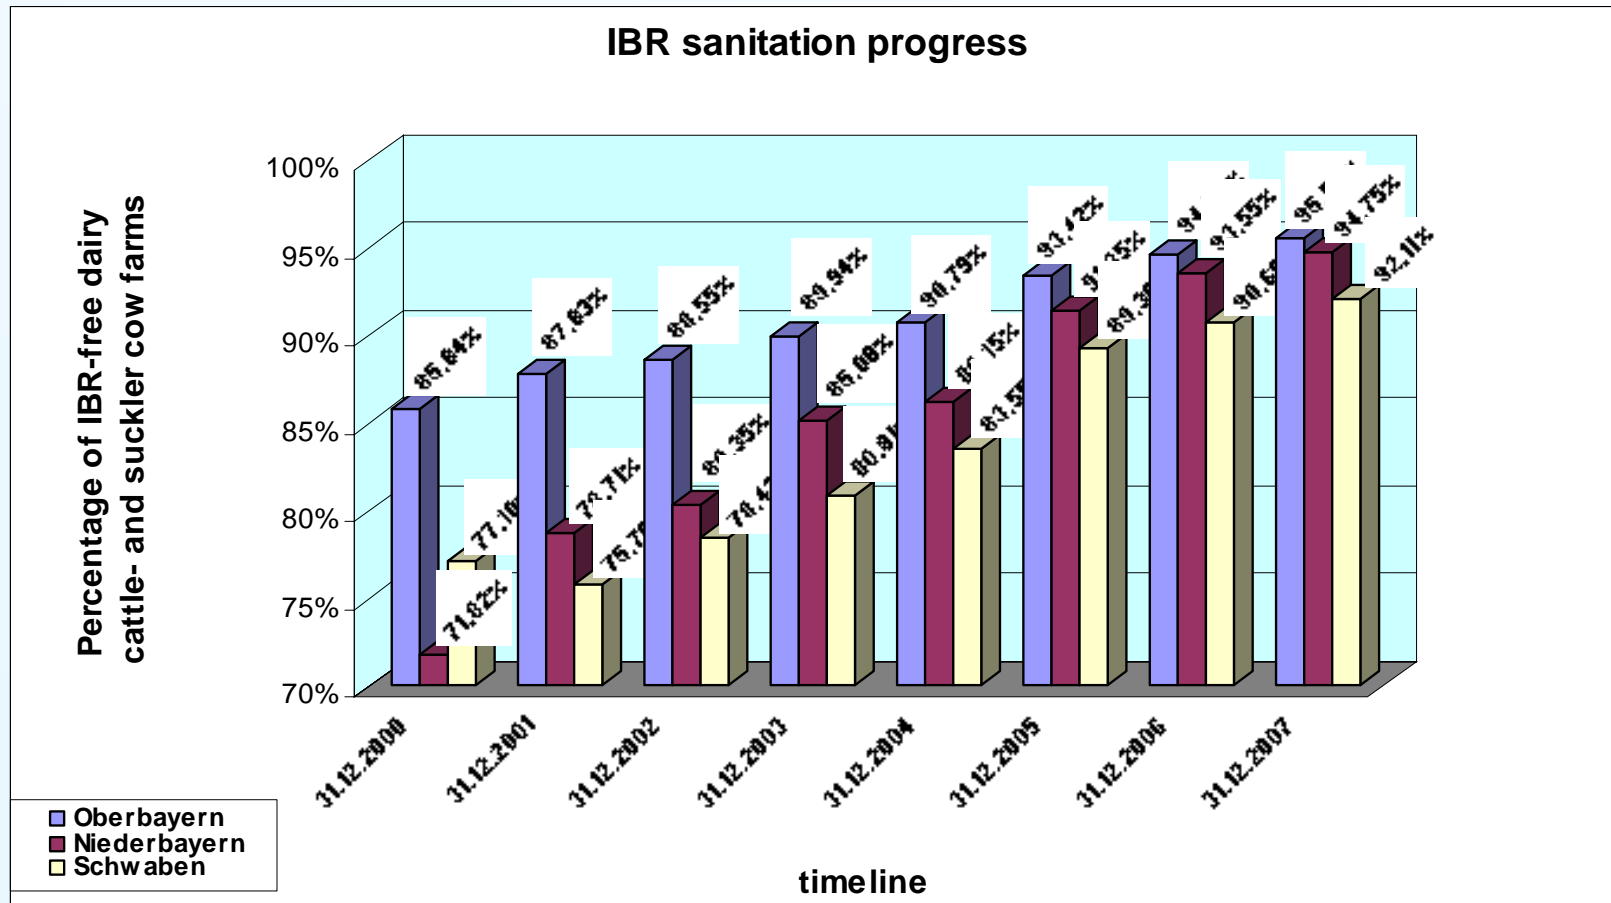

Schwaben

- 01.05.2010 to 31.07.2010: compulsory vaccination of bovine animals of enclosed fattening units
- 01.08.2010: vaccination prohibited
- since 01.08.2010: only seronegative, not-vaccinated animals are allowed to move at the holdings

Oberbayern, Niederbayern, Schwaben:

- ongoing: detected seropositive bovine animals are to be killed/slaughtered immediately
