

**DRAFT AGENDA
FOR THE WORKING GROUP OF THE STANDING COMMITTEE ON THE
FOOD CHAIN AND ANIMAL HEALTH “PESTICIDES - RESIDUES”
6 February 2006**

Standing Committee on the Food Chain and Animal Health:

1. Exchange of views and possible agreement on a default variability factor for the IESTI equation for short term intake assessment.
2. Exchange of views and agreement on SPS notification on MRLs for **the recent inclusions** of the Existing Active Substances: **MPCA, MPCB, tribenuron** and the New Active Substances: **milbemectin, tepraloxydim, bifenazate, ethoxazole, acetemiprid, S-metholachlor, imazosulfuron, thiacloprid** and **methoxyfenozide** (SANCO/10654/2005).
3. **Annex III to Regulation 396/2005.** State of play regarding the **temporary MRLs**.
4. **Annex II to Regulation 396/2005.** data Gathering.
5. Agreement on SPS notification on MRLs for: **aldicarb, captan, folpet, carbaryl, deltamethrin dichlorvos, endosulfan, ethion, fenithrothion, methidathion, oxamyl, paraquat, phosmet and triazophos.** (SANCO/10105/2006).
6. Exchange of views and agreement on SPS notification on MRL proposals for changed uses of **trifloxistrobin, fenpropimorph** and **chlormequat** (SANCO/10106/2006).

Working Group Residues:

1. Exchange of views on a default variability factor for the IESTI equation for short term intake assessment (see the report of the meeting on 18 Jan and the discussion paper).
2. Exchange of views on MRL Proposals by rapporteur Member States for the recent inclusions of the Existing Active Substances: dithiocarbamates (mancozeb, maneb, propineb, ziram etc) residue definition BE and IT coordinated proposal*, MCPA (It), MCPB (It), chlortoluron (Es), tribenuron (SE), tolylfluanid (FI) , warfarin (IR) and the New Active Substances: thiacloprid (UK), benzoic acid (DE), milbemectin (NL), tepraloxydim (ES), bifenazate (NL), mesosulfuron (F/D), tribenuron (SE), ethoxazole *(FR), 1-methylcyclopropene (UK), acetemiprid (EL/FR), S-metholachlor (BE/NL), imazosulfuron (DE), methoxyfenozide (UK), lamarin (BE/FR), gliocladium (MRLs necessary? FI), ampelomyces (MRLs necessary? FR) and not included substance simazine (Essential uses UK) (SANCO/10654/2005).
3. **Annex III to Regulation 396/2005.** State of play regarding the temporary MRLs and national MRLs list, plus list of commodities.
 - Gathering information on NMRL of substances pending or not included, established after 31 March 2005.

4. Annex II to Regulation 396/2005. Gathering information on NMRL of the MSs Commodities (un-harmonised) of active substances already evaluated to complete Draft Annex II.
5. Remaining substances of concern: aldicarb (?), captan folpet carbaryl, deltamethrin dichlorvos, endosulfan, ethion, fenithrothion, methidathion, oxamyl, paraquat, phosmet, triazophos (Doc SANCO/10105/2006).
6. Exchange of views on new proposals for changed uses of trifloxistrobin (UK), fenpropimorph (D) and extending the expiry date of the temporary MRL for chlormequat on pears (B, requested by NL Doc SANCO/10106/2006).
7. Annex IV to Regulation 396/2005 (Doc SANCO/10094/2006): warfarin, lamarin
8. CODEX: Circular letters and drafting groups JMPR report? Homework Member States received so far
9. Minor uses residue extrapolation project. Final report
10. Coleacp data. Exchange of views and possible designation of a lead MS for evaluating. Extrapolation request from Beans to okra. Who will evaluate the data?
11. CRL news. Quality Control guidelines: www.slv.se/aqc. Update.
12. EFSA News
13. Next Meetings
14. A.O.B

Please note that the deadline to send documents to the Commission to be uploaded on Circa is 30 January at noon. Otherwise, delegates are requested to bring 40 copies for distribution
