

Greetings to those in a healthier Europe!

I am a non-smoker and a campaigner against smoking by people in my neighbourhood. I am in favour of a complete ban on smoking in public and in enclosed spaces. I just can't grasp how a member of parliament who is a smoker is supposed to vote for a masochistic law against smoking. Maybe I will start praying that those parliamentarians are inspired by the Holy Ghost to create a health space for future generations. How much money is spent on treating the consequences of this pernicious activity and how little is really necessary. I am alarmed by the thought of the girls and expectant mothers who smoke and the example set by older women.

I am keeping my fingers crossed for you and wish you robust health!

Thank you.
