1) Annual component from 2004/2005 onwards: 7 variables in the EU-SILC (Statistics on Income and Living Conditions) survey:
   - First 3 variables: Minimum European Health Module (MEHM)
   - Other 4 variables on unmet needs for medical/dental examination or treatment

2) Every 5 years component implemented from 2007/2008 onwards: European Health Interview Survey (EHIS) composed by 4 modules:
   - EHSM (health status)
   - EHDM (health determinants)
   - EHCM (health care)
   - EBM (background variables)

3) Components to be developed* for later implementation:
   - European Disability and Social Integration Module (EDSIM)
   - Inclusion in the future annual European System of Social Statistical Survey Modules (E4SM) of few EHIS questions (annually or every 2 years) and relevant modules developed by SANCO (on an ad-hoc basis)
