

## Annex 6

### Mapping of EIS objectives (per focus area and per TOM layer) against the current horizontal actions and measures undertaken by the IDABC Programme

When mapping the current IDABC projects to the Target Operating Model layers, it seems that the majority of the projects focus on the “*information exchange*” and the “*service offering*” layers, whereas the next important layer “*politics and legal*” seems to be a new area for the programme to tackle. The Figure below provides an overview of current IDABC’s cross-sector actions and measures mapped on the four TOM layers.
