\* October 2011. Further objects are contributed by a number of non EU-countries (in particular Norway and Switzerland), or come from EU-wide projects and are therefore not attributed to a particular Member State.

\*\* The indicative targets per Member State are calculated on the basis of a) the size of the population and b) GDP, in line with the overall target of making 30 million digitised objects available through Europeana by 2015. For Member States which would already have reached or would be close to reaching the indicative target now, the calculation is based on the current number of objects they contribute to Europeana plus 30%. All Member States are invited to look also at the qualitative aspects, taking into account the need to make all public domain masterpieces available through Europeana by 2015.

<sup>1</sup> Table appended as Annex II to Recommendation on Digitisation and Digital Preservation, C(2011) 7579, adopted by the Commission on 27 October 2011.
