

INVESTPROMO PRESS RELEASE
----- **Europe Unlimited raises eTEN Project awareness within the
European investor community** -----

The eTEN InvestPromo Project aims to develop and advance eTEN Projects within the realms of the European Investor, Venture Capital and Technology Community.

The main goal of all support actions is to provide the eTEN Projects with access to the pan-European investor community and to assist the eTEN Project companies prepare fund-raising and full deployment within the domain of European financing.

The eTEN InvestPromo consortium is composed of Europe Unlimited, VIP Park and the sub-contractor EuroConseils.

Europe Unlimited specialises in connecting investors and companies seeking funding on a cross-border basis by organising business-to-business events like the Nordic Venture Summit and the European Tech Investment Forum. Their events have a proven formula and track record: out of the 430 companies that presented at the first 10 editions of the European Tech Investment Forum, 80 companies are known to have raised in excess of €300M following their participation.

eTEN Projects seeking funding for deployment will be assisted by Europe Unlimited through allying with their existing investment events. This will create interest in the eTEN Project companies from over 1.000 public and private financing organisations from across Europe.

Europe Unlimited will stimulate and encourage the potential deployment of eTEN Projects by giving selected eTEN Project companies the opportunity to participate and present at the above-mentioned events. They also have the opportunity to participate in the Venture Academy® (the day before) which gives vital tools that the projects need to present their businesses effectively and helps them to present themselves to potential investors and corporate partners.

VIP Park is a consulting and research company based in the Czech Republic. They will organise eTEN Investor Workshops alongside 3 additional events in the New Member States to increase awareness and deployment of eTEN Projects within the newest accession countries.

Upcoming events are the Nordic Venture Summit on 4 October 2005 in Copenhagen and the European Tech Investment Forum in Munich on 7 December 2005.
