

Deploy PROMIS

deployPROMIS aims at providing European SME's and consultants with tailored business services and eTraining in the field of Environment, Health&Safety and Quality (EHS-Q). PROMIS® will support them in complying with the complex legal, commercial and social requirements at national and international level and therefore strengthening their competitive advantage at an affordable price.

Health and safety (H&S) at work, including environmental and plant safety, are major issues of the European Union. SMEs very often lack the time and manpower to implement these safety requirements themselves and therefore use the support of H&S advisors. These consultants in turn need knowledge about updated laws and safety requirements.

The overall aim of the market introduction of PROMIS® is to deliver a cost-efficient and easy-to use internet based Environment, Health&Safety and Quality management service for use by SMEs, their consultants and associations.

PROMIS® is a multilingual, integrated compliance management system, which offers a set of interactive services, methodologies, tools and contents that assist key personnel of an SME to recognise and to comply with the legal and management requirements connected with Environment, Health&Safety and Quality.

PROMIS® provides SMEs and their consultants with easy, cost-effective access to the following tailored services:

- A check on the legal compliance of the SME;
- Identification of the deficits and risks in the SMEs internal management system;
- The best available e-training services to enhance the knowledge, understanding and skills of their employees;
- Empowerment of SMEs to achieve continuous improvement;
- Provision of a personal and bespoke tool -myPROMIS- to help SMEs administer their company
- Provision of information about best practices;
- Support with achieving customer and client requirements;
- Offers qualified consultants to provide online or personal support, as necessary.

By the end of the 3 year project phase, [deployPROMIS](#) will

- Tailor high quality interactive services -qualified also through Code of Conducts and Practice- for the benefit of micro SMEs, SMEs and their consultants;
- Localize the service and replicate it in other countries, tailoring it to the market requirements;
- Organize workshops in Athens, Hamburg, Brussels, Bucharest, London, Rome with the goal to raise awareness, advertise the PROMIS® system, methodology and the brand;
- Consolidate and increase the awareness, visibility and acceptance of the PROMIS® brand which is protected at European level;
- Continuously update the technological capability of the PROMIS® system to ensure it is ideally suited to the needs of SME's and their consultants.
- Roll-out the PROMIS® Service in Italy, Germany, England, Greece and Romania and prepare new countries for the market introduction.
- Set up the PROMIS@Service new company and conclude all necessary contracts and agreements among public and private partners, content providers, user associations and strategic alliance partners.
