

Regional Employability Services

Luk Vervenne

“Give me back my data”

- Support the individual to finally become *a stakeholder* instead of *a mere object in a thousand databases*.
 - From LMS to PLE
 - Government data (http://www.cps.org.uk/cps_catalog/it's%20ours.pdf)
 - EPD < Personal Health Records
 - Corporate employment < individual employabilityPortfolios™
- Several FP6/FP7 IPs were initiated and/or (co-)managed by Synergetics (www.prolix.eu, www.TAS3.eu, www.codrive.org)
- This now results in a suite of tools for the *user-centric & lifelong management* of *(1) learning content, (2) competency & (3) employability data*
- We provide this as *base cloud infrastructure* (together with **Cisco**) thus “**organising the communality**” around regional employability services, involving all social stakeholders (see Limburg presentation)

Personal Data

- The Individual als “**Active Identity**” (*Internet of Subjects Manifesto*)
<http://www.iosf.org/>
- Vision: towards *a crossroads bank for employability (data)*
- Individuals as *stakeholders* instead of being “*objects in a thousand databases*”
- **Personal Data Stores** (‘give me back my data’) and/or **employabilityPortfolios** for the management of you own **personal employability data**.
- This user controlled data now becomes :

“The currency of the labour market”

Consortium

- COLO – kenniscentra
- Labour Union (FNV.nl)
- Province of Limburg
- City of Maastricht
- Higher Education
- Ministry of Social Affairs
- Public Employment Services
- Employer organisations

Build infrastructure

- Initial investement + National & Regional funding + EC Research funding
 - FP7 IST IP: Research goals: Massive deployment + reuse former research
 - Needs to be complemented with 'soft' research: ESF, EFRO, EBRD
- 3 regions/countries needed. We now got NL (Limburg), Kortrijk (BE) and UK (Birmingham), and ...?
- Resubmit FP7 IP www.iPDS.eu proposal (Q1 2011)
- Signing Regional commitment needed + definition of working groups
- Cisco/Synergetics provide private cloud platform services
- Research: scalability of services economy

Management regional knowledge infrastructure (employability platform)

- Structural embedding of durable infrastructure
- Public-Private-Partnership (PPP)
- Project office for end-user support
- Initial investment + longterm business model
- Who wins- who pays
- Continuous innovation
- TTP for end2end trust & privacy assurance
- Who own what?
