Ricardo Pizarro, Director

Burgos smart province

- Burgos is a province willing to become smart. For this purpose, Burgos established ABI, an initiative that **promotes research and the Business competitiveness** of the region based on knowledge and the innovation.
- **ABI is currently composed by a large number of committed organisations** from different sectors (SMEs and large), **business associations** (FAE and FEC), together with **local authorities** (Burgos city hall -Ayuntamiento de Burgos-, **province government** - Diputación), chamber of commerce (Cámara de Comercio de Burgos), **research entities** (University of Burgos, research and technology Centers - such as ITCL, CTME), together with Foundations and other legal entities committed with the innovation and the development of the region.

Burgos smart province

ABI has established 6 Working Groups which members working on different action lines:

ICT (Information and Communication Technologies)

ENERGY

AGRO-FOOD/INDUSTRY

CULTURE AND HERITAGE

AUTOMOTIVE

HEALTH

Infracstructure

Burgos offers to the FI PPP a full **energy grid composed of a variety of energy sources** (oil, nuclear, wind, hydraulic power and biomass) to test new ICT models to improve the efficiency and stability of the grid.

Knowledge/Know how

Burgos can provide the **knowledge on the field of energy and the local support** through its University, Technological Institute and the **Province Energy Agency** to the ICT industries, utilities...

Knowledge/Know how

Burgos has **quite good experience** and prizes in the mobility field.

Infraestructure

Burgos offers its **experience on smart mobility and its public transport infrastructure** to test new FI related technologies.

Smart entertainment

Burgos 2016 **European Capital of Culture** is a compendium of past, present and future innovation could muster, tradition and projection in a unique challenge.

Furthermore Promecal, a **transregional communication group** of TV, Radio, Press, Multimedia... is established in Burgos...

Burgos offers the opportunity to use the FI technologies in the candidature of the city to European Capital of Culture as well as on the Media sector.

Smart Health

- A **new hospital** is currently being constructed, replacing the biggest hospital in Burgos city. The new hospital is being designed with the latest health technology, including ICT infrastructure.

- Burgos has an important **amount of villages and old people** living in the rural areas. That's why smart health becomes essential on the service to these citizens

Burgos through the new hospital and the low density of population has an opportunity of developing FI technologies on the Health Sector.
