

Future Internet Public-Private Partnership

European Information Day Brussels, 8 July 2010

Future Internet Public-Private Partnership

The public-private partnership as a tool to facilitate deeper integration of:

- the stack of technologies - from network to application in a versatile platform
- the industry sectors (demand/supply) for effective and nimble, yet standardised sector platform implementation.
- the public sector with the private sector, the former holding enormous potential in terms of infrastructure, data and services.

... And test this integration in a number of large scale trials in Europe. The PPP is an innovation instruments in the spirit of EU2020 and the EDA.

Behind us in terms of consultation with public and private stakeholders

- European Technology Platforms NESSI, ISI, seMobility and NEM since 2008
- Consultation with national innovation centres and user industries
- Future Internet Assembly of about 100 EU RTD projects in Challenge 1
- Future Internet Forum – public sector actors platform
- Work programme building with Member countries representatives

Behind us in terms of open awareness raising

- European open constituency building event, Nice, 12 March
 - Two user case workshops, Brussels, January and June
 - 20+ awareness raising events in the Member countries.
- ... today the major European event.

Agenda for today

9:30 – 9:50	Welcome and Introduction to the FI-PPP - European Commission by Luis Rodriguez-Rosello and Mario Campolargo, Directors, DG Information Society
9:50 - 10:50	Scenario for the objectives: <ul style="list-style-type: none">- Objective 1.7 Technology foundation: Future Internet Core Platform (Franco Accordino)- Objective 1.8 Use Case scenarios and pilots experimentation (Max Lemke)- Objective 1.9 Capacity Building and Infrastructure Support (Max Lemke)- Objective 1.10 Programme Management and Support (Franco Accordino)
10:50 - 11:00	Evaluation (criteria, process, timing) - European Commission (Peter Fatelnig)
