

eHealth ERA - Towards establishing a European eHealth Research Area

Analysing Member State eHealth Strategy Priorities and RTD Opportunities

Dr. Veli Stroetmann for the eHealth ERA Team

Contact: era@empirica.com

eHealth Stakeholders' Group Brussels 08/12/2005

Overall goals:

- **analyse MS eHealth strategies, roadmaps and RTD initiatives**
- **identify opportunities for multilateral joint activities**
- **take steps towards further integration of eHealth deployment across MSs**

Project objectives and outputs

Concrete objectives: contribute to

- **greater transparency across Member States on eHealth strategies and related RTD policies**
- **analysis of priority deployment goals and RTD needs resulting there from,**
- **exchange of experience in developing and managing eHealth strategies and programmes,**
- **suggestions for sustainable mechanisms for viable and effective trans-national cooperation for mutual benefit**

Key project outputs

- **improved knowledge of key actors and stakeholders in MS and at the Union level**
- **website on national eHealth activities**
- **structured overview of European eHealth strategies, roadmaps and RTD initiatives**
- **focus on priorities common to several MS (two topic clusters detailing strategic opportunities for joint activities of MS)**
- **suggestions for joint RTD and deployment activities in eHealth**
