

C@R Potential Partner -Thematic areas of work

Francisco Pérez Trejo FAO

Living Labs: Knowledge and innovation for sustainable rural development

Policy dimension of innovation and sustainable development

New perspectives in R+D+I Impact Evaluation

Methodological framework: Dealing with complexity

- Based on an interdisciplinary systems approach
- Study of processes at different spatial/temporal scales
- Development of scenarios to evaluate alternative interventions, policies

Expected Contribution

- Strengthening networks for collaboration
- Impact evaluation guidelines and methods
- Indicators of impact (livelihoods, employment)
- Scaling up Living-labs success at regional level
- Policy assessment methodologies
- Partnerships in other regions of the world
- Communication and dissemination strategy
