fistname.lastname@pwc.be

Open Data Support is funded by the European Commission under SMART 2012/0107 'Lot 2: Provision of services for the Publication, Access and Reuse of Open Public Data across the European Union, through existing open data portals' (Contract No. 30-CE-0530965/00-17).

pwc

Introduction

Open Data Support is

- A 36-month project that started on 1 January 2013
- Funded by Unit D3 of DG CONNECT
- Led by PwC Enterprise Advisory
- Delivered by a *great team*

**Makx
Dekkers**

Our objective

“To improve the visibility and facilitate the access to datasets published on local and national Open Data portals in order to increase their re-use within and across borders”

Our services

Publishing services

We help Open Data portals and government data publishers prepare, transform and publish their data and metadata.

Training services

We help public administrations in Europe build capacity in Linked Open Government Data.

Consulting services

We provide consulting services in the areas of Linked Open Data technologies, data and metadata licensing, and business aspects and externalities of (Linked) Open Data.

We provide publishing services

We help (potential) Open Government Data publishers prepare, transform and publish reusable metadata descriptions of their datasets.

Target audience

Open Data portals

Gov Data publishers

What is in it for you?

Increase visibility: Make datasets searchable through different access points.

Increase reuse: Enlarge and empower community of re-users.

Improve quality: Enrich OGD with metadata, link data with other data, crowd-source data quality.

How can we help you?

Our publishing services will provide practical support on the following:

- **Selecting** high-value datasets.
- **Cleansing and modelling** your data and metadata.
- **Mapping** your metadata model to the DCAT-AP.
- **Describing** your datasets with the DCAT-AP.
- **Sharing** the metadata of your datasets on ODIP.

What is needed from you?

- To assign a **contact point** for the project;
- To give us **access to your datasets and metadata**, and to any relevant documentation;
- To help us **define the mappings** between your dataset description model and the DCAT Application Profile;
- To consider a **sustainable collaboration** with Open Data Support by:
 - Ingesting in your portal harmonised metadata about your datasets coming from ODIP; and
 - Providing access to metadata hosted on ODIP via your portal.

Your feedback!

We provide training services

We train public administrations across Europe on the value of (Linked) Open Government Data and help them build capacity in effectively and efficiently publishing your data.

Target audience

Policy makers and government officials

Government IT strategists

Government software engineers

What will you learn?

Comprehend and formulate the added value of Linked Open Government Data for your domain.

Understand the life cycle and the publishing requirements of Linked Open Government Data.

Acquire hands-on experience on Linked Government Open Data technologies.

Our training services

All trainings will be freely available online through Joinup.

We provide onsite trainings adapted to your needs.

Training catalogue

	Policy makers and government officials	Government IT strategists	Government software engineers
Topic 1: Introduction to Linked Open Government Data (<i>Foundational modules</i>)			
The PSI Directive and Open Government Data.	✓	✓	✓
Introduction to Linked Data.		✓	✓
Introduction to RDF and SPARQL.		✓	✓
Introduction to Metadata Management.		✓	✓
Topic 2: Publishing Linked Open Government Data and Metadata (<i>Advanced modules</i>)			
The Linked Open Government Data Lifecycle		✓	✓
Open Data Quality and Cleansing of Data and Metadata		✓	✓
Design and manage persistent URIs		✓	✓
Licence your data & metadata	✓	✓	✓
Model your Data and Metadata		✓	✓
Promoting the re-use of open data using ODIP.		✓	✓

 Intended audience

How can we help you?

We will deliver

- **36 onsite trainings** covering national and regional public administrations in all MSs;
- spread over the runtime of the project (between September 2013 and December 2015).

What do we offer?

- Training customised to the needs of the audience.
- Training provided by experts in the field of Linked Open Data.
- Training material including of slides, examples, case studies...
- Certificate of attendance

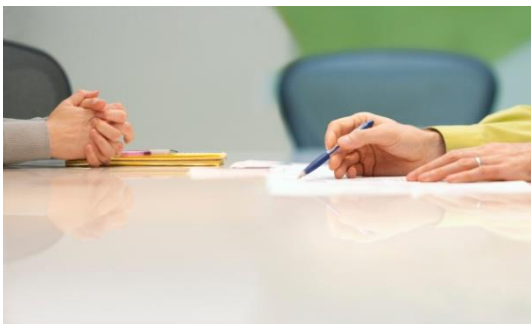

What is needed from you?

- To help us **maximise the attendance and the efficacy** of the training, by providing advice on a suitable training date and location, and by instructing us on the target audience;
- To take care of the **logistics** and the **local organisation** (with our support).

How to request a training?

1. Contact us.
2. We will schedule a meeting to discuss timing, scope and practicalities.

We provide consulting services

We provide consulting services in the areas of Linked Open Data technologies, data and metadata licensing, and business aspects and externalities of (Linked) Open Data.

Target audience

Open Data Portals

Gov data publishers

What is in it for you?

Raise awareness of the economic and social value of open data

Build new knowledge, skills, technical expertise and hands-on experience on Linked Open Data technologies.

How can we help you?

How to opt for a consulting service?

1. Contact us.
2. We will schedule a meeting to discuss your request.
3. We will forward your request to the Commission, who will make the final decision.
4. If positive, we will contact you to define the scope of the service and the expected outcome.
 - NB: consulting services are small-scale assignments.

Thank you!
