Prague, 7. 1. 2013

Telecommunication and broadcasting solutions

I. COMMENTS:

We welcome this opportunity to provide our opinion to the revision of the Recommendation on relevant markets - 2007/879/EC.

Both companies consider the list and scope of relevant markets in Recommendation as appropriate.

The Recommendation in general adequately maps the current conditions (including technological and market developments) of electronic communications sector and the proposed list of relevant markets in Recommendation is complete.

Individual markets:

Market No. 1, No. 2, No. 3, No. 6, No. 7

Preserve - no change

Market No. 4, No. 5

We propose to merge these markets. Due to the fact that the analysis of markets 4 and 5 are solved together with a partial degree of linking, we consider it appropriate to merge.
