Latvia Country fact sheet

Every year in the EU, 200 000 firms go bankrupt, resulting in over 1.7 million people losing their jobs.

A well-functioning insolvency framework is essential to support growth and business creation. That is why the European Commission is putting forward modern and streamlined insolvency rules that will facilitate restructuring, give businesses a second chance and improve the efficiency of restructuring, insolvency and debt discharge procedures.

The proposed approach is expected to:

- ✓ Cut down the number of jobs lost due to bankruptcy;
- ✓ Bring more legal certainty for cross-border investors;
- ✓ Turn bad debt into performing credit to facilitate lending;
- ✓ Allow entrepreneurs to restart business activities, to keep innovation going and create an additional three million jobs across the EU.

What will the new rules improve?

The situation today in Latvia ^(?)	With the new rules
There is room to improve the length of insolvency proceedings.	✓ Specialisation and training of judges, use of electronic means of communication and adoption of measures to ensure rapid treatment of procedures will improve its efficiency, reducing their length.
There are few or non-efficient early warning tools alerting debtors to the risk of insolvency and the urgency to act in order to avoid liquidation.	✓ Debtors will have access to early warning tools which can detect a deteriorating business and lead to more restructurings at an early stage. ✓ A culture of resorting early to preventive restructurings will develop.
All creditors are automatically involved in the restructuring process (collective proceedings).	✓ Early restructuring will not have to involve all creditors , but it can only involve part of them, e.g. financial creditors.
