QUESTIONS AND ANSWERS

Question: relating to section 5.2.3 technical background, management capability where it states that: A list of contracts of a value of at least 60,000 Euros each, performed by the tender(s), including subcontractors (if any) in the last five years, must be provided. Our company has conducted several of these projects but confidentiality does not allow us to name our clients. With this in mind would we be able to simply list the project names rather than company names and if so would we be marked down on the scoring process?"

Answer: No, it is not compulsory to mention the names of your clients; you will not be marked down for not naming your clients. Just list the projects names/titles.
