President FTTH Council Europe

Response to the second public consultation on Recommendation on regulated access to Next Generation Access Networks (NGA)

Dear Madame/Sir

Europacable, the European Confederation of Associations of Manufacturers of Insulated Wires and Cables welcomes the opportunity to contribute to the consultation on the European Commission's 'Recommendation on regulated access to Next Generation Access Networks (NGA)'. Europacable represents approx. 85% of all European cable manufacturers, employing roundabout 58.000 people with a total production of > 25 billion €.

We would like to state our full support and endorsement to the document prepared by FTTH Council Europe sent to you on 22 July. Our member companies engaged in the manufacture of optical fibre and optical fibre cables are members of the FTTH Council Europe and have contributed to the preparation of the document. Europacable itself is in the process of signing a Memorandum of Understanding with FTTH Council Europe to formalize and extend the relationship and cooperation which has been maintained by a direct involvement of our member companies since the establishment of FTTH Council Europe.

Should you have any further questions, please do not hesitate to contact us.

Sincerely yours

T. Neesen
Secretary-General
