

Cody Christman
Director of Product Engineering
NTT Communications | NTT America

As director of product engineering, Cody Christman directs a team of senior engineers in designing products to meet strategic business objectives for the NTT Communications Global IP Network.

Christman is a published IPv6 and network security expert. He leads the North American engineering team on the development of managed security services, content delivery network products, Service Level Agreements, IPv6 access products, L2VPN services, DDoS Mitigation products, and backbone QoS research. Prior to working at NTT Communications, Christman held systems engineering positions with both American Management Systems and U S WEST Technologies.

Christman earned a Bachelor of Science in Electrical Engineering from Montana State University, and a Master of Science in Interdisciplinary Telecommunications from the University of Colorado, Boulder.
