

Timothy LeMaster is Director of Systems Engineering for US Public Sector with Juniper Networks, and is responsible for driving product development efforts to meet the demands of Government market customers and managing the activities of the federal systems engineering division. He has over 15 year of experience in the telecommunications and networking industry. Prior to Juniper, LeMaster held a position at Veridian/General Dynamics, at which he developed applications aiding the government in the management of a very large SONET/IP network. LeMaster has also held several positions in the government ranging from network operations to network modeling to engineering. LeMaster also spent more than 10 years on active duty with the U.S. Air Force.
