

Martin has spent his entire career in the telecommunications business and has worked in EC Framework Programmes since 1985.

Specifically related to IPv6 ..... in FP5 he assisted Cisco in the management of the project “6NET” which built the first pan-European native IPv6 network, and in FP6 he co-ordinated the IPv6 *dissemination* project “6DISS”, which held IPv6 training workshops throughout the world.

In FP7, he is co-ordinating the IPv6 *deployment* support project “6DEPLOY”, which will also lead the new “IPv6 Cluster”, with the aim of exploiting the synergy between all projects working on aspects of this subject.
