Clause 3.2.7, 2nd paragraph states that the worldwide efforts are still quite fragmented, however there are lots of aligned activities in ISO/IEC JTC1 SC31 WG4, WG5 and WG6 on global basis. Furthermore, EPCglobal does some international work as well. Hardware aspects are well addressed in ISO/IEC JTC1 SC31, ISO/IEC JTC1 SC17 and ISO/IEC JTC1 SC6. Software aspects are handled partly. The main issue exists in application and data standards. Here a lot has to be done o catch up.
