

regions for research

Consortium

- **Stockholm Region**
- **Jozef Stefan Institute**
- **Fundació Catalana per a la Recerca i la Innovació**
- **Provincie Noord Brabant**
- **Regione Veneto + Veneto Innovazione**
- **Mazovia Region**
- **Vlaamse Overheid - Departement Economie, Wetenschap en Innovatie**
- **Sofia Municipality**

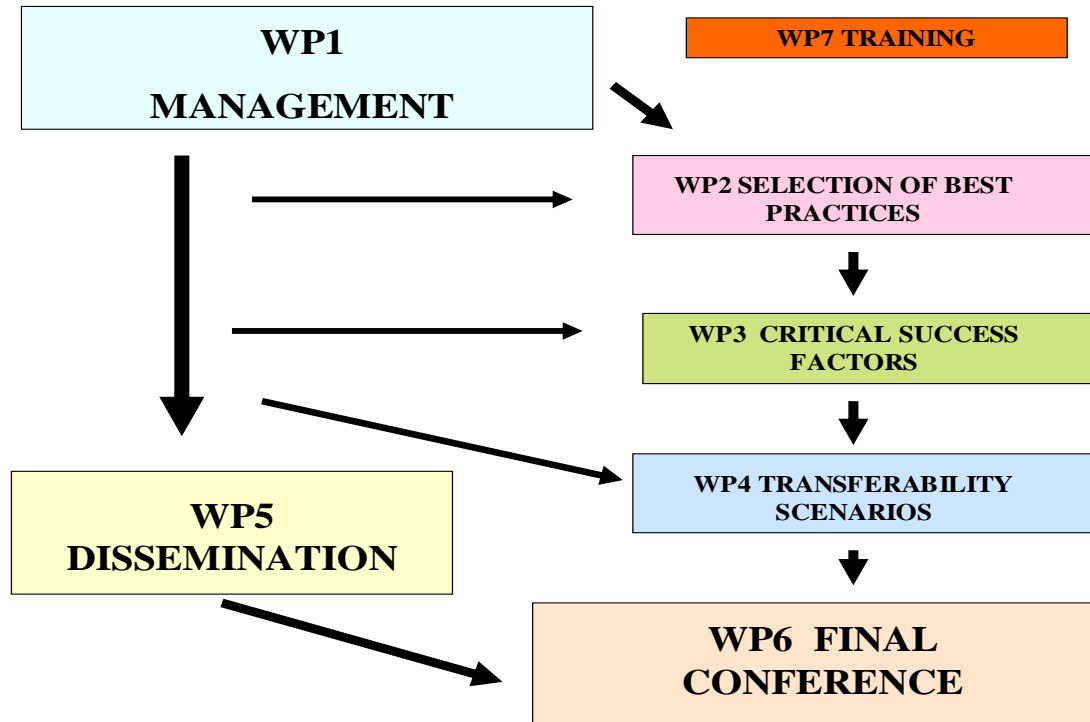

Objectives

- **To build up expertise in the public administrations in designing, implementing and monitoring Knowledge Transfer systems by producing and implementing a methodology to identify, model, adapt and transfer best practices in the partner regions**

Structure

Approach and Methodology

- **Joint planning and distribution of tasks and responsibilities**
- **Development of a common toolkit for Best Practice Description**
- **Local data collection and Best Practice identification**
- **Application of CREST framework to Best Practice clustering**
- **Success and transferability analysis from partner's inputs**
- **Collective implementation of transfer scenarios**

Success factors

- **Well defined management structure and decision-taking mechanisms.**
- **Very intense communication among partners**
- **Realistic calendar and definition of the project limits and boundaries**
- **Joint participation and responsibility of all partners in all tasks and Deliverables**
- **Common methodological framework**
- **Involvement of local actors**

Difficulties

- **Late identification and commitment of local actors.**
- **Unrealistic evaluation of available information**
- **Different partner involvement in proposal preparation**

Lessons learned

- **Involve actively all partners in the proposal preparation**
- **Identify, inform and if possible commit local stakeholders at proposal preparation time**
- **Research as much as possible local state of art at proposal preparation time**
