WiFi4EU – FREE WI-FI FOR EUROPEANS

The European Union is bringing Wi-Fi into your parks, squares, libraries, public buildings...

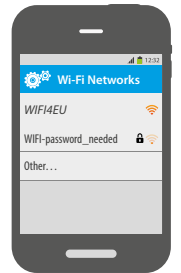

€120 million of EU investments in vouchers

At least 6,000 to 8,000 local communities

WHO WILL BENEFIT?

Everyone: WiFi4EU will give internet access to local residents and visitors throughout the entire EU in the main centres of community life (parks, squares, libraries, public buildings, etc.).

WHO CAN APPLY?

Local public authorities (municipalities or group of municipalities):

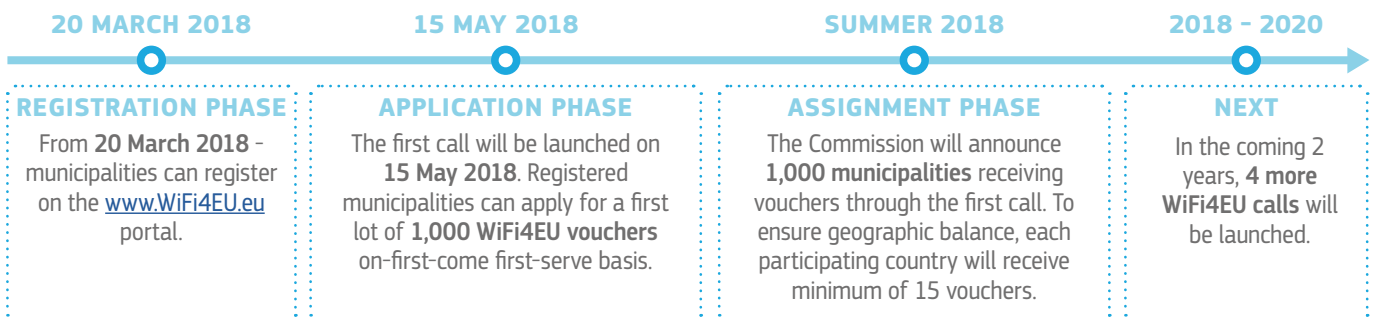

who would like to offer Wi-Fi in areas where a similar public or private offer does not yet exist.

who seek funding for equipment and installation and can provide free connection to their community for several years.

one voucher per municipality
€15,000

HOW TO APPLY?

HOW WILL IT WORK?

Selected municipalities will get a WiFi4EU voucher. They will pay with this money the installation of the Wi-Fi equipment in their chosen centres of local public life.

Municipalities will pay for the **internet access connection and the maintenance** of the network during at least 3 years.

WiFi4EU-funded networks must be free of charge, free of advertising and free from commercial re-use of data.

Installations should not duplicate existing free private or public offers in the same public space.

Municipalities are free to select the installation company of their choice.
