News

Emerging pollutants: a growing concern for our oceans

The majority of chemicals on a combined list of more than 2700 potential marine contaminants are what's known as 'emerging pollutants': substances that have the potential to enter the environment and cause adverse ecological and human health effects, but are still largely unregulated.

Save the date: high level conference on smart specialisation

3 - 4 May 2018 — Sofia (Bulgaria)

Smart Specialisation and Technology Transfer as Innovation Drivers for Regional Growth

Under the auspices of the Bulgarian Presidency of the Council of the EU, this high level conference will bring together policymakers, scientists, businesses, regional authorities and universities to consider the opportunities and challenges for Europe, notably South-east Europe and including the Western Balkans, in research, development, education, employment and innovation and in particular, the process of skills creation, knowledge and technology.

It will serve as a platform to discuss and commit to place-based innovation as a priority. After setting the scene and presenting the innovation landscape in Europe, participants will engage in a debate on good practices and key success factors to inspire countries, regions and stakeholders willing to reap the potential of smart specialisation, technology transfer and digital transformation.

The draft agenda and registration will soon be available. **For more info please contact JRC-InnovGrowth-Conf@ec.europa.eu**

Events

23 February 2018 — Brussels (BE)

First Annual JRC Alumni Network Event

This event will bring together alumni from all JRC sites and leading JRC experts in Brussels. There will be scientific discussions, workshops and a poster session where alumni will have the chance to present their current projects, followed by an awards ceremony and reception.

1 March 2018 — Online

New JRC course on monitoring smart specialisation

In March the JRC will launch a Massive Online Open Course (MOOC) exploring how to build effective monitoring systems to help regions meet their long-term research and innovation goals.

The course is open to anyone interested in monitoring knowledge-based regional development, and in particular monitoring Smart Specialisation Strategies. Whilst it is designed with EU regions and member states specifically in mind, the principles and ideas discussed should be of relevance to a broader audience.

The MOOC will answer key questions related to monitoring RIS3, addressing conceptual, policy and empirical aspects.
