### EU Health Award 2016 helps NGOs continue the fight against Antimicrobial Resistance

This year's award recognised European NGOs working to reduce the threat to human health from antimicrobial resistance (AMR). Three winners - selected from 26 candidates – were announced on 6 February 2017 at the Horizon Prize and EU Health Award for NGOs joint ceremony in Leuven, Belgium, where they spoke with the Health-EU newsletter. Each was asked about the main focus of their work and the projected impact of winning the prize.

## Project in the Picture

### ARNA - Antimicrobial Resistance and causes of Non-prudent use of Antibiotics

The ARNA project aimed to identify key factors that drive the sales and imprudent use of antibiotics without a prescription, assess the level of enforcement of the legislation regarding “prescription only” for antimicrobial agents in the EU, document good practices and develop policy options.

### **112 Day: New technology helps identify caller's location in times of distress**

11 February was 112 Day – since 1991, EU citizens have been able to call for help for free, using the Single European Emergency Number 112. Today, the caller's location can be identified in a few Member States, saving countless lives. Some 300,000 callers a year are unable to report their location when calling for help.
