Webinar on the new Participant Portal for H2020

24/06/2014 - 02:00

The Participant Portal, the central web platform for EU research and innovation funding, is improving its user-friendliness and functions for H2020. You can learn more at the webinar on 24 June.

All the grant-related online exchanges of EU research and innovation funding are managed on the Participant Portal. To make the system as user-friendly as possible, the Commission seeks continuous advice from actual users. The next meeting of an external user group is planned for the afternoon of 24 June in Brussels. To allow maximum participation and input from a wide audience, this meeting will be webcast with a live stream. Additionally, a web forum will be used where interested parties can post questions and comments, either directly during the meeting or afterwards.

To prevent spamming from robots, **you will need the following password to access the web forum: *forum***

The video link will only start working on June 24 at 14.00 Brussels time (GMT+1). It will allow you to watch the meeting in real time. The recording of the meeting will be available shortly after at the same address.

A draft agenda is available at the web forum site.
