- [Reports/Studies](#) [1]

The COFET project aims to support the future development of the FET programme within Horizon 2020 based on a dialogue between science, policy, industry and society. Three conferences will address three different topics, with this report presenting the outcomes and discussions from our Conference held in Pisa, Italy on the 30th and 31st January 2014, and which was focused on all aspects of outreach and stakeholder engagement. The ultimate objective was to move FET projects, and potentially the FET Programme, beyond the traditional view of dissemination and towards a more holistic value driven view encompassing outreach, engagement and citizen science.
