Vigi'Fall received Gold Medal at the Paris international Concours Lépine, which rewards the most promising inventions of the 2014 edition.

[1]

The FallWatch, an EU-funded research project, brought together a wealth of European technology and expertise in a tiny triangular patch called Vigi'Fall that can be worn by the user in a non-intrusive, permanent manner.

Unique Vigi'Fall fall detection solution, developed within the project, could help save 500,000 hospitalisations and 40,000 premature deaths caused by falls in Europe every year.
