Research Executive Agency - First class support for European research that matters

14/09/2017

Find out more about the Research Executive Agency (REA), a funding body created to maximise the efficiency and impact of EU research and innovation programmes. REA manages large parts of Horizon 2020 as well as of the Seventh Framework Programme for research, technological development and demonstration activities (FP7).

The banner features a central image of a hand holding a glowing globe with a network of nodes and lines. To the right is a grid of 16 small images illustrating various research fields: agriculture, space, medicine, biology, and technology. The text "RESEARCH EXECUTIVE AGENCY" is prominently displayed in white, with the tagline "First class support for European research that matters" below it. The European Commission logo is visible in the top right corner of the banner area.
